RE: **Timeline for Adjusted Primary Care Service Rate Program Claims**

Dear Provider,

The Adjusted Primary Care Service Rate Program under the Patient Protection and Affordable Care Act (ACA) ended 12/31/2014. This federal program allowed for adjusted Medicaid payments for certain primary care services furnished by eligible physicians to Medicaid eligible individuals between January 1, 2013 and December 31, 2014. The eligibility of physicians required active enrollment in KY Medicaid, as well as having an attestation on file, during the detail date of service. The federal government did not extend this program; however, states are expected to account for claim run-out as a result of timely filing guidelines.

A six month claim run out period will be utilized to allow for the billing/payment of provider claims with dates of service in CY 2014 not yet submitted/processed; as well as any claim adjustments/corrections. We are encouraging you to file any applicable new claims and/or claim adjustments/corrections for 2014 by June 30, 2015, to be processed. We anticipate any final payments being issued by August 15, 2015.

Your cooperation is appreciated as we move to wrap up this program. For questions, please contact Amy Simpson in the Division of Policy and Operations at **502-564-6890**.

Sincerely,

Lisa D. Lee, Commissioner
