

# The Kentucky Laboratory Sentinel

July 2006

## Sentinel Exercise Wrap Up

We had a 89% return rate on the Sentinel Exercise!  
Kudo's, Kudo's, Kudo's!

I hope everyone felt this was a worthwhile exercise and training that could be used in your laboratory. I will be sending out a general after action report and the individual checklist that I followed when your boxes came back.

I appreciate your patience with me as I learned through this exercise. If anyone has suggestions on how this exercise can be improved PLEASE email me. We hope you can use this in your laboratory as rule out training.

Thanks again for participating.

## Feeling Antsy?

Why don't anteaters get sick?

Because they are full of ant-ibodies

What do you call an ant who lives with your great uncle?

Your great-ant!

How many ants are needed to fill an apartment?

Ten-ants
