F 000	<p>INITIAL COMMENTS</p> <p>An abbreviated/partial extended survey investigating Complaint #KY21295 was conducted on 02/06/14 through 02/19/14 to determine the facility's compliance with Federal requirements. #KY21295 was substantiated with deficiencies cited. Immediate Jeopardy was identified on 02/11/14, and determined to exist on 01/31/14, at 42 CFR 483.20 Resident Assessment, F-282 and 42 CFR 483.25 Quality of Care, F-309, at a scope and severity of a "J". Substandard Quality of Care was identified at 42 CFR 483.25, Quality of Care. The facility was notified of the Immediate Jeopardy on 02/11/14.</p> <p>On 01/16/14, Resident #1 started chemotherapy for gastric cancer. The care plan included to monitor for signs/symptoms of infection, increased temperature, nausea, vomiting, diarrhea, and abdominal cramping. The resident began having nausea, vomiting, diarrhea, and a temperature of 101.8 degrees Fahrenheit (F) on 01/27/14. New orders were received from the resident's primary physician to include Tylenol 650 milligrams (mg) suppository every six (6) hours as needed for an increased temperature. Labwork was collected on 01/30/14 with results received on 01/31/14, indicating a low white blood cell count of 0.9 (normal 4.0-10.0). The resident was moved to a private room at this time on reverse isolation precautions, as a nursing intervention. On 01/31/14 at 5:29 PM, the Certified Nurse Aide documented the resident had a temperature of 100.5 degrees F. and made the nurse aware of the temperature; however, there was no documented evidence licensed staff assessed the resident or administered medication for the temperature at that time. Furthermore,</p>	F 000

F 000	Continued From page 1 there was no documented evidence the licensed nurses conducted ongoing assessments for the remainder of the shift (till 11:00 PM) on 01/31/14 and on the next shift from 11:00 PM until 7:00 AM on 02/01/14. The resident was found in bed deceased on 02/01/14 at 8:00 AM with visible signs of rigor mortis.	F 000	<i>This Plan of Correction is the center's credible allegation of compliance.</i>  <i>Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law.</i>	
F 282 SS=J	An acceptable Allegation of Compliance (AoC) was received on 02/18/14 alleging the removal of Immediate Jeopardy on 02/19/14. The State Survey Agency validated, on 02/19/14, the Immediate Jeopardy was removed on 02/19/14, as alleged. The scope and severity was lowered to a "D" at 482.20 Resident Assessment, F-282 and 485.25 Quality of Care, F-309 while the facility develops and implements the Plan of Correction (PoC) and the facility's Performance Improvement Committee monitors the effectiveness of the systemic changes. 483.20(k)(3)(ii) SERVICES BY QUALIFIED PERSONS/PER CARE PLAN  The services provided or arranged by the facility must be provided by qualified persons in accordance with each resident's written plan of care.  This REQUIREMENT is not met as evidenced by: Based on interview, record review, and review of the Hospital's Office Follow-up Report, and the facility's Condition Change of a Resident policy, it was determined the facility failed to ensure services were provided by qualified persons in accordance with each resident's written plan of care for one (1) of seven (7) sampled residents	F 282	Resident #1 no longer resides at the facility. On February 3, 2014 the Director of Nursing conducted assessment education with the Licensed nurse who provided care for resident #1, including assessments for gastrostomy tube verification, gastric residual checks, and flushing of gastrostomy tubes. A review of the care plans for resident #1 and facility interview with the licensed nurse revealed she did follow the plan of care, but failed to document all her assessment and monitoring information. The following information has been placed with the resident record and the Licensed nurse was reeducated on her documentation skills on Feb 3, 2014. On the nightshift beginning at 2300 on January 31, 2014 at approx 11:30pm the licensed nurse entered resident #1 room and checked the resident O2 saturation with a reading of 96%. At that time resident #1 was sitting up on the side of the bed wearing a t-shirt. The licensed nurse did not check the tube feeding for placement or residual at that time, as no medications were due and the tube feeding was running at the time. At that time the LN asked the resident if resident #1 was ok and resident #1 replied yes. The resident did not complain of any nausea/vomiting/diarrhea, no abdominal cramping, no fatigue, and no complaints of	02/24/14

F 282 Continued From page 2  
(Resident #1). The facility failed to monitor Resident #1 according to the care plan while receiving chemotherapy treatment.

On 01/16/14, Resident #1 started chemotherapy for gastric cancer. The care plan included to monitor for an increased temperature, signs/symptoms of infection, nausea, vomiting, diarrhea, abdominal cramping, increased fatigue, sores in the mouth, sore tongue, skin breakdown, and signs/symptoms of dehydration while receiving chemotherapy. On 01/31/14 at 5:29 PM, the facility documented the resident had a temperature of 100.5 degrees Fahrenheit (F); however, there was no documented evidence the licensed staff monitored the resident according to the care plan at that time or throughout the remainder of the shift. In addition, there was no documented evidence the resident was monitored on the next shift (on 02/01/14 11:00 PM-7:00 AM). The resident was found in bed deceased, on 02/01/14 at 8:00 AM with visible signs of rigor mortis.

The facility's failure to ensure each resident was provided services by qualified persons in accordance with each resident's written plan of care has caused or is likely to cause serious injury, harm, impairment, or death to a resident. Immediate Jeopardy was identified on 02/11/14 and determined to exist on 01/31/14. The facility was notified of the Immediate Jeopardy on 02/11/14. An acceptable Allegation of Compliance (AoC) was received on 02/18/14 alleging the removal of Immediate Jeopardy on 02/19/14. The State Survey Agency validated, on 02/19/14, the Immediate Jeopardy was removed on 02/19/14, as alleged. The scope and severity was lowered to a "D" at 482.20 Resident

The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law.*

The licensed nurse noted no shortness of air, heard no audible wheezing and noted the resident had no cough.

The licensed nurse observed the resident gastrostomy tube site and assessed the dressing to be clean and dry. The licensed nurse also assessed visually the abdomen was not distended. The licensed nurse assessed the resident to have no signs or symptoms of dehydration as evidenced by observing moist lips and mouth. The licensed nurse also noted the resident's skin to be warm and supple when she palpated resident #1 hand. The licensed nurse also assessed the resident's tracheostomy to be clean and at midline. These findings were documented as completed on the Medication and Treatment Record by the licensed nurse on 2-1-14.

Shortly after 11:30pm- The CNA reported to the licensed nurse obtaining a tympanic temperature of approx 98 degrees. The CNA also told the licensed nurse the resident wanted the feeding pump off due to feeling full. Due to the resident not having any complaints shortly before when the licensed nurse was in the resident room, and the licensed nurse knowing the resident had a history of

F 309 F 309 SS=J	<p>Continued From page 10</p> <p>483.25 PROVIDE CARE/SERVICES FOR HIGHEST WELL BEING</p> <p>Each resident must receive and the facility must provide the necessary care and services to attain or maintain the highest practicable physical, mental, and psychosocial well-being, in accordance with the comprehensive assessment and plan of care.</p> <p>This REQUIREMENT is not met as evidenced by: Based on interview, record review, and review of the facility's Condition Change of a Resident policy, and the Hospital Office Follow-up Report, it was determined the facility failed to ensure each resident was provided the necessary care and services to attain or maintain the highest practicable physical, mental, and psychosocial well-being in accordance with the plan of care for one (1) of seven (7) sampled residents (Resident #1). The facility failed to provide ongoing assessments for Resident #1 while on Chemotherapy and after staff identified an increased temperature.</p> <p>Resident #1 started chemotherapy for gastric cancer on 01/16/14. The resident began having nausea, vomiting, diarrhea, and a temperature of 101.8 degrees Fahrenheit (F) on 01/27/14, with a new order from the resident's primary physician which included Tylenol 650 milligrams (mg) suppository every six (6) hours as needed for an increased temperature. Labwork was collected on 01/30/14 with results received on 01/31/14, indicating a low white blood cell count of 0.9</p>	F 309 F 309	<p><i>This Plan of Correction is the center's credible allegation of compliance.</i></p> <p><i>Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law.</i></p> <p>Resident #1 no longer resides at the facility. On February 3, 2014 the Director of Nursing conducted assessment education with the Licensed nurse who provided care for resident #1, including assessments for gastrostomy tube verification, gastric residual checks, and flushing of gastrostomy tubes. A review of the care plans for resident #1 and facility interview with the licensed nurse revealed she did follow the plan of care, but failed to document all her assessment and monitoring information. The following information has been placed with the resident record and the Licensed nurse was reeducated on her documentation skills on Feb 3, 2014. On the nightshift beginning at 2300 on January 31, 2014 at approx 11:30pm the licensed nurse entered resident #1 room and checked the resident O2 saturation with a reading of 96%. At that time resident #1 was sitting up on the side of the bed wearing a t-shirt. The licensed nurse did not check the tube feeding for placement or residual at that time, as no medications were due and the tube feeding was running at the time. At that time the LN asked the resident if resident #1 was ok and resident #1 replied yes. The resident did not complain of any nausea/vomiting/diarrhea, no abdominal cramping, no fatigue, and no complaints of pain.</p>	02/24/14

F 309	<p>Continued From page 11 (normal 4.0-10.0) The resident was moved to a private room at this time on reverse isolation precautions, as a nursing intervention. The Oncologist ordered Neupogen injections, to increase the resident's white blood cell count. On 01/31/14 at 5:29 PM, the facility documented the resident's temperature of 100.5 degrees F; however, there was no documented evidence of a resident assessment or administration of medication for the increased temperature at that time. In addition, there was no documented evidence the licensed staff had conducted ongoing assessments of Resident #1 for the remainder of that shift, until 11:00 PM; and on the next shift (11-7 AM on 02/01/14). Resident #1 was found in bed deceased, on 02/01/14 at 8:00 AM, with signs of lividity, blood pooling in lowest parts of his/her body with darkening of the skin in the independent parts of the body, and rigor set in as illustrated by the fixed position of the resident's extremities. (Refer to F282)</p> <p>The facility's failure to ensure each resident received necessary care and services related to the failure to provide an on-going assessment of Resident #1 after a change in condition has caused or is likely to cause serious injury, harm, impairment, or death to a resident. Immediate Jeopardy was identified on 02/11/14 and determined to exist on 01/31/14. The facility was notified of the Immediate Jeopardy on 02/11/14. An acceptable Allegation of Compliance (AoC) was received on 02/18/14 alleging the removal of Immediate Jeopardy on 02/19/14. The State Survey Agency validated, on 02/19/14, the Immediate Jeopardy was removed on 02/19/14, as alleged. The scope and severity was lowered to a "D" at 482.20 Resident Assessment, F-282 and 485.25 Quality of Care, F-309 while the</p>	F 309	<p><i>This Plan of Correction is the center's credible allegation of compliance.</i></p> <p><i>Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law.</i></p> <p>The licensed nurse noted no shortness of air, heard no audible wheezing and noted the resident had no cough.</p> <p>The licensed nurse observed the resident gastrostomy tube site and assessed the dressing to be clean and dry. The licensed nurse also assessed visually the abdomen was not distended. The licensed nurse assessed the resident to have no signs or symptoms of dehydration as evidenced by observing moist lips and mouth. The licensed nurse also noted the resident's skin to be warm and supple when she palpated resident #1 hand. The licensed nurse also assessed the resident's tracheostomy to be clean and at midline. These findings were documented as completed on the Medication and Treatment Record by the licensed nurse on 2-1-14.</p> <p>Shortly after 11:30pm- The CNA reported to the licensed nurse obtaining a tympanic temperature of approx 98 degrees. The CNA also told the licensed nurse the resident wanted the feeding pump off due to feeling full. Due to the resident not having any complaints shortly before when the licensed nurse was in the resident room, and the licensed nurse knowing the resident had a history of</p>

F 309	<p>Continued From page 14</p> <p>Interview with Certified Nurse Aide (CNA) #8, on 02/11/14 at 1:55 PM, revealed she worked on 01/31/14 from 11:00 PM to 7:00 AM. She stated she obtained the resident's temperature at the beginning of the shift; however, she could not remember the results. She stated the resident had complained his/her stomach was hurting and wanted his/her feeding shut off. She stated she told LPN #1. She stated she checked on the resident several times and he/she was still in bed and she thought the resident was asleep. She stated it was dark and the lights were off.</p> <p>Interview with LPN #1, on 02/06/14 at 2:40 PM and on 02/10/14 at 10:50 AM, revealed she was the nurse on 01/31/14 from 11:00 PM to 7:00 AM. She stated the resident was visualized at the beginning of her shift and had an oxygen saturation of 96 percent (%). She asked the resident how he/she was feeling and the resident responded "the same". She told the resident to use the call light if he/she needed assistance. She stated the aide reported to her that the resident wanted his/her feeding tube turned off. She stated she went to the room approximately ten (10) minutes after the aide told her. The LPN stated the resident had his/her back to her and was in the fetal position. She stated she did not bother him/her, just noted that the pump was turned off and it was still hooked to the resident. She stated she should have assessed the resident and talked to the resident about why the pump was turned off. The LPN revealed she went back in between 3-3:30 AM to turn the pump back on, but did not assess the resident at the time. She stated the resident was in the same position.</p> <p>Review of the Nurse's Note, dated 02/01/14 at</p>	F 309	<p><i>This Plan of Correction is the center's credible allegation of compliance.</i></p> <p><i>Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. F 309	Continued From page 16 related to nursing assessments.  The facility implemented the following actions to remove the Immediate Jeopardy:  - On 02/18/14, all current residents were assessed head to to by the DON, Unit Managers, Case Management, Staff Development Coordinator, and a Registered Nurse. All current resident care plans were reviewed to ensure the interventions were appropriate and implemented in accordance with the care plan. Care plans were revised, if indicated.  - On 02/03/14, the DON conducted assessment education with LPN #1, who provided care for Resident #1, including assessments for gastrostomy tube verification, gastric residual checks, flushing gastrostomy tubes, and documentation skills.  - On 02/10/14, the RN Staff Development Coordinator and/or the DON and/or Unit Managers initiated education with all Licensed Nurses related to the use of Situation, Background, Assessment and Recommendation (SBAR)/interact program for identification of resident changes in condition. The assessment and care plan education consisted of the use of Interact III Critical Pathways, use of shift reports to communicate resident status, follow up assessment and monitoring of residents with a change of condition using an alert charting system. Education would be ongoing until all licensed nurses have attended. Any licensed nurse that had not received the education by 02/13/14, would not be allowed to work until receiving the education.	F 309	<i>This Plan of Correction is the center's credible allegation of compliance.</i>  <i>Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law.</i>  72 hour alert charting tools, care plan updates, and shift reports daily until deemed unnecessary as determined by the Performance Improvement Committee. Audit findings will be documented on a Resident Change of Condition/Assessment audit (Attachment A), and the <u>Unit Manager and/or Weekend Supervisor</u> will date and initial the gold copy of the Physician Telephone Orders sheet. The <u>Unit Managers and/or Registered Nurse Weekend Supervisor</u> will also review all new physician orders for any medications with serious side effects and validate care plans updated with appropriate interventions. Any identified concerns will be corrected immediately by the <u>Unit Manager</u> and/or <u>Registered Nurse Weekend Supervisor</u> with appropriate follow-up with the licensed nurse. All audit findings will be reviewed at the weekly <u>Performance Improvement Committee</u> .  The Committee will meet weekly until substantial compliance is achieved.

F 322	Continued From page 21 metabolic abnormalities, and nasal-pharyngeal ulcers and to restore, if possible, normal eating skills.  This REQUIREMENT is not met as evidenced by: Based on interview, record review, and review of the facility's policy/procedures, it was determined the facility failed to ensure a resident who was fed by gastrostomy tube received the appropriate treatment and services to prevent aspiration pneumonia, diarrhea, vomiting, dehydration, and metabolic abnormalities for one (1) of seven (7) sampled residents (Resident #1).  The findings include:  Review of the facility's Tube Placement Verification and Gastric Residual Volume (GRV) policy/procedure, released 04/28/13, revealed GRV was checked in enterally fed patients to protect against aspiration pneumonia and to monitor tolerance of enteral feeding and gastric emptying. The placement of the gastric tube was checked by aspiration to validate that the tube was in the stomach. The frequency of placement verification and GRV was before each feeding and/or flush via syringe, and every 6-8 hours for a gastrostomy tube depending on the patient's tolerance of feeding.  Review of the Flushing Feeding Tube policy/procedure, revised 04/28/11, revealed the feeding tube was flushed before initiating a pump	F 322	<i>This Plan of Correction is the center's credible allegation of compliance.</i>  <i>Preparation and/or execution of this plan of correction does not constitute admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of federal and state law.</i>  Resident #1 no longer resides in the center. All current residents with tube feedings were reviewed by the Director of Nursing or Unit Manager 02/10/14 to validate physician orders in place regarding checking placement of the tube before each feeding and/or flush via syringe, and every 6-8 hours for a gastrostomy tube depending on the patient's tolerance to feeding. This review also included validating tolerance to the ordered tube feeding. Any concerns were addressed with physician and Registered Dietician notification. License Nurse #1 was educated on tube feeding verification by the DNS on 02/03/14 prior to OIG coming to facility. License Nurse #1 did not check for residual at the start of her shift, as no medications were due at that time. All Licensed Nurses were educated by the Staff Development Coordinator RN on PRO 66006 Tube Placement Verification and Gastric Residual Volume beginning on 02/10/14 and concluding on 02/19/14. Education will be ongoing until all licensed nurses have attended. Any licensed nurse that has not received the education by 02/24/14 will not be allowed to work until receiving the education. Any newly hired nurses will receive this training as part of General Orientation.	02/24/14

F 322	<p>Continued From page 23</p> <p>and 11:45 PM. She revealed it was not uncommon for the resident to turn off his/her enteral feeding as his/her stomach felt "full." LPN #1 stated she went into the resident's room approximately ten (10) minutes later, and the enteral feeding was off. She stated she did not speak to the resident as his/her back was turned away from her and she did not conduct an assessment of the resident at that time. She revealed between 3:00 AM and 3:30 AM, she went back into the room and turned the resident's enteral feeding on. She did not flush the feeding tube, check placement, residual, or assess the resident prior to the initiation of the feeding.</p> <p>Interview with the Primary Physician, on 02/07/14 at 9:50 AM and on 02/11/14 at 9:45 AM, revealed he was not specifically aware of the resident having his enteral feeding turned off due to stomach issues. He revealed it would not be uncommon as the resident was receiving a high rate of feeding. He expected the nursing staff to check the residual and hold the feeding, if necessary. He expected staff to follow the orders per the facility protocol.</p> <p>Interview with the Oncologist, on 02/11/14 at 11:10 AM, revealed the resident was receiving chemotherapy for a gastric mass. He indicated the mass could cause "fullness" when the enteral feeding was initiated. He indicated if he had been made aware of the problem, he would possibly have decreased the rate of enteral feeding.</p> <p>Interview with the Registered Dietician, on 02/11/14 at 10:00 AM, revealed she was not aware of the resident having issues with his/her enteral feeding at night. She would expect staff to notify her as she would have assessed the</p>	F 322
