Program Information

The Kentucky Department for Behavioral Health, Developmental and Intellectual Disabilities is committed to better serving youth and young adults transitioning to adulthood. Youth with behavioral health issues face significant challenges as they transition to adulthood. Research has shown that youth with behavioral health issues who have support in coordinating their transition age years have much greater positive outcomes in employment and high school and college achievement as well as being less likely have behavioral health issues that interfere with their lives. The expectation is that through these efforts, youth with, or at risk of, behavioral health issues will have **earlier, faster, and easier access** to the developmentally appropriate care that they need and that the champions who work with transition age youth will have the specialized skills necessary to support them through their transition age years.

Program Description

The CMHC shall operate TAYLRD (Transition Age Youth Launching Realized Dreams) Drop-in Center Site(s) which includes: an array of behavioral health (both mental health and substance use) services that are provided within an environment that is easily accessible, engaging and inviting to transition age youth (TAY). Supports will be targeted to transition age youth between the ages of 16-25 years old with or at risk of developing serious behavioral health issues (SED/SMI/SUD). **This programming will provide seamless services for this population and minimize gaps between child, adolescent and adult mental health and substance use programs.**

Please complete this quarterly reporting form in collaboration with the TAYLRD Drop-in Center Site Manager and Youth Leadership Coordinator.

Objective

Objective Statement

The CMHC shall operate TAYLRD Drop-in Center Site(s) which includes: an array of behavioral health (both mental health and substance use) services that are provided within an environment that is easily accessible, engaging and inviting to transition age youth (TAY). Supports will be targeted to transition age youth between the ages of 16-25 years old with or at risk of developing serious behavioral health issues (SED/SMI/SUD).

Measurement Methods

Report the following information for TAY between 16-25 years old that are accessing supports through the TAYLRD Drop-in Center(s). If your region operates more than one TAYLRD Drop-in Center, please report on the collective number.

Objective Narrative

In the following table, please complete the information requested as indicated for each quarter. The year-to-date (YTD) field will automatically calculate. Transition Age Youth (TAY) Population of Focus for this information is 16-25 year olds.
