The views expressed in written conference materials or publications and by speakers and moderators do not necessarily reflect the official policies of the Department of Health and Human Services, nor does the mention of trade names, commercial practices, or organizations imply endorsement by the U.S. Government.

Logo Use for Conference and Other Materials: Neither the Department of Health and Human Services (HHS) nor the CDC logo may be displayed if such display would cause confusion as to the funding source or give false appearance of Government endorsement. Use of the HHS name or logo is governed by U.S.C. Part 1320b-10, which prohibits misuse of the HHS name and emblem in written communication. A non-federal entity is unauthorized to use the HHS name or logo governed by U.S.C. Part 1320b-10. Moreover, the HHS Office of the Inspector General has authority to impose civil monetary penalties for violations (42 CFR Part 1003). Accordingly, neither the HHS nor the CDC logo can be used by the grantee without the express, written consent of either the CDC Project Officer or the CDC Grants Management Officer. It is the responsibility of the grantee to request consent for use of the logo in sufficient detail to ensure a complete depiction and disclosure of all uses of the Government logos. In all cases for utilization of Government logos, the grantee must ensure written consent is received from the Project Officer and/or the Grants Management Officer.

CDC defines equipment as tangible non-expendable personal property (including exempt property) charged directly to an award having a useful life of more than one year AND an acquisition cost of \$5,000 or more per unit. However, consistent with grantee policy, a lower threshold may be established. Please provide the information to the Grants Management Officer to establish a lower equipment threshold to reflect your organization's policy.

The grantee may use its own property management standards and procedures, provided it observes provisions of in applicable grant regulations and OMB circulars.

Federal Information Security Management Act (FISMA): All information systems, electronic or hard copy, that contain federal data must be protected from unauthorized access. This standard also applies to information associated with CDC grants. The current regulations are pursuant to the Federal Information Security Management Act (FISMA), Title III of the E-Government Act of 2002, PL 107-347.

FISMA applies to CDC grantees only when grantees collect, store, process, transmit or use information on behalf of HHS or any of its component organizations. In all other cases, FISMA is not applicable to recipients of grants, including cooperative agreements. Under FISMA, the grantee retains the original data and intellectual property, and is responsible for the security of these data, subject to all applicable laws protecting security, privacy, and research. If/When information collected by a grantee is provided to HHS, responsibility for the protection of the HHS copy of the information is transferred to HHS and it becomes the agency's responsibility to protect that information and any derivative copies as required by FISMA. Payment Management System Subaccount: Effective October 1, 2013, a new HHS policy on subaccounts requires the CDC setup payment subaccounts within the Payment Management System (PMS) for all grant awards. Funds awarded in support of approved activities have been obligated in a newly established subaccount in the PMS, herein identified as the " P Account". A P Account is a subaccount created specifically for the purpose of tracking designated types of funding in the PMS.

All award funds must be tracked and reported separately. Funds must be used in support of approved activities in the FOA and the approved application.

The grant document number and subaccount title (below) must be known in order to draw down funds from this P Account.

Grant Document Number: **002419RP14**
Subaccount Title: **CE141401RAPEPREVEDUC**

Acceptance of the Terms of an Award: By drawing or otherwise obtaining funds from the grant Payment Management Services, the grantee acknowledges acceptance of the terms and conditions of the award and is obligated to perform in accordance with the requirements of the award. If the recipient cannot accept the terms, the recipient should notify the Grants Management Officer within thirty (30) days of receipt of this award notice.

Certification Statement: By drawing down funds, the grantee certifies that proper financial management controls and accounting systems, to include personnel policies and procedures, have been established to adequately administer Federal awards and funds drawn down. Recipients must comply with all terms and conditions outlined in their NoA, including grant policy terms and conditions contained in applicable HHS Grant Policy Statements, and requirements imposed by program statutes and regulations and HHS grants administration regulations, as applicable; as well as any regulations or limitations in any applicable appropriations acts.

CLOSEOUT REQUIREMENTS

Grantees must submit closeout reports in a timely manner. Unless the Grants Management Specialist/Grants Management Officer (GMS/GMO) approves a deadline extension the grantee must submit all closeout reports within 90 days after the last day of the final budget period. Reporting timeframe is **February 1, 2014** through **January 31, 2019**. Failure to submit timely and accurate final reports may affect future funding to the organization or awards under the direction of the same Project Director/Principal Investigator (PD/PI).

All manuscripts published as a result of the work supported in part or whole by the cooperative grant must be submitted with the progress reports.

An original plus two copies of the reports must be mailed to the GMS for approval by the GMO by the due date noted. Ensure the Award and Program Announcement numbers shown above are on the reports.

The final and other programmatic reports required by the terms and conditions of the NoA are the following.

Final Performance Report: An original and two copies are required. At a minimum, the report should include the following:

- Statement of progress made toward the achievement of originally stated aims.
- Description of results (positive or negative) considered significant.
- List of publications resulting from the project, with plans, if any, for further publication.

Final Federal Financial Report (FFR, SF-425): The FFR should only include those funds authorized and actually expended during the timeframe covered by the report. The Final FFR, SF-425 is required and must be submitted through eRA Commons no later than 90 days after the end of the project period. This report must indicate the exact balance of unobligated funds and may not reflect any unliquidated obligations. Should the amount not match with the final expenditures reported to the Department of Health and Human Services' Payment Management Services (PMS), you will be required to update your reports to PMS accordingly. Remaining unobligated funds will be de-obligated and returned to the U.S. Treasury.

If no inventions were conceived under this assistance award, a negative report is required. This statement may be included in a cover letter.

CDC ROLES AND RESPONSIBILITIES

Roles and Responsibilities: Grants Management Specialists/Officers (GMO/GMS) and Program/Project Officers (PO) work together to award and manage CDC grants and cooperative agreements. The GMS/GMO is responsible for the business management and administrative functions. The PO is responsible for the programmatic, scientific, and/or technical aspects. The purpose of this factsheet is to distinguish between the roles and responsibilities of the GMO/GMS and the PO to provide a description of their respective duties.

Grants Management Officer: The GMO is the federal official responsible for the business and other non-programmatic aspects of grant awards including:

- Determining the appropriate award instrument, i.e.; grant or cooperative agreement

GMO Contact: See Staff Contacts below for the assigned GMO

Grants Management Specialist: The GMS is the federal staff member responsible for the day-to-day management of grants and cooperative agreements. A thorough review of the annual performance report has been performed. The review considered the evaluation criteria published in the funding opportunity announcement. Based on the review, the followings were identified:

A. Current Budget Period Progress report:

Summary of Major Strengths:

- Kentucky provided an excellent overview of its statewide implementation of Green Dot, selected by its State Prevention Team and in line with Kentucky's Sexual Violence Prevention Plan goals and activities.
- The applicant uses the public health approach to implement the sexual violence prevention strategy of Green Dot in 13 Rape Crisis Centers in Kentucky.
- For the past five years rigorous evaluation (randomized intervention trial) of Green Dot in Kentucky was conducted in conjunction with the University of Kentucky. Green Dot in Kentucky High Schools was determined to be significantly successful in reducing the rates of sexual violence in the participating intervention high schools.
- Applicant did an excellent job of outlining the risk and protective factors associated with the selected strategy and the process for selecting a bystander intervention for Kentucky in conjunction with the Kentucky Association of Sexual Assault Programs (coalition), and the 13 Regional Rape Crisis Centers.
- Applicant provided good description of program success (evaluation results of high school adaptation of Green Dot). Success story was attached to application.
- Applicant also provided information on challenges related to the sustainability of training protocol of Green Dot in Kentucky and on sustaining fidelity.
- Kentucky provided a good overview of its approach to Training and Technical Assistance to the 13 RPE-funded agencies and also provided an excellent overview of its participation in CDC sponsored activities.

Summary of Major Weaknesses:

- Kentucky's description of Component 1 activities was actually a work plan and did not include any mention of activities completed, only activities planned and on-going. Performance measures were included, as was responsible staff. However, quantitative measures under each objective and measure were not included. It is noted that the applicant did state that many of the data points requested in the Annual Performance Report for the budget period were not known elements prior to the onset of the grant cycle, and that reporting forms have now been updated.

B. New Budget Period Proposal Objectives (Year 2 Workplan):

Summary of the Project:

Kentucky Cabinet for Health and Family Services, Dept. of Public Health is requesting RPE funds, \$495,197, to implement KY's selected primary prevention curriculum: Green Dot in KY High Schools. Funding will be provided to the state's Sexual Assault Coalition and the Prevention Educators from each of the 13 regional rape crisis centers to implement and evaluate the intended outcomes of the curriculum in participating KY high schools.

Summary of Major Strengths:

- Kentucky clearly describes how the public health approach will be used for program implementation in FY15.
- The applicant has included performance measures for each activity to assess the effectiveness of the project. Some of the measures are quantifiable, many involve review of meeting minutes (the applicant did not include number of meetings in many of the activities).
- The goals, objectives and activities included in Kentucky's FY15 work plan are related to implementation of state sexual violence prevention plan priority strategy of Green Dot implementation.
- The applicant included sufficient rationale for selection of the Green Dot strategy in Kentucky. This information was primarily included in Section 1 of this report and implied for the FY15 work plan.
- Kentucky has included 1 goal, several objectives and several activities related to implementation of legislatively authorized prevention strategies in the work plan.
- The applicant adequately described training/technical assistance resources and infrastructure for program implementation. The training appears responsive to the locally funded Rape Crisis Centers, the effective prevention principles, prevention strategy selection, implementation, and evaluation.
- Kentucky identified plans for participation in CDC-sponsored program activities (Annual RPE Meeting).

Summary of Major Weaknesses:

- *The Kentucky F15 work plan was not submitted in a format which included reference to all three components of the original Funding Opportunity Announcement. Only one goal was indicated. Other major goals were listed as objectives.
- *Goals and objectives in the workplan were not in the SMART format (Specific, measurable, achievable, realistic, and time specific). Applicant can work with project officer on SMART goals and objectives.

Recommendations:

- The emphasis for this FOA will be on the use of the public health approach and effective prevention principles by RPE-funded organizations to guide their strategy selection, implementation, and evaluation efforts. The Public Health Approach is outline according to the following components and activities:
 - Using data (e.g., national, state, community, surveillance, programmatic SV-related data) for the following, but not limited to: define the problem, define the population of need, select the program strategy, inform strategic and program planning, inform partnership or

coalition build , monitor burden, progress, and impact, o form other decision-making processes.

- Identifying risk and protective factors, for the following, but not limited to: incorporate what is currently known to select programs and strategies, identify target population, and assess SV-related outcomes
- Developing prevention strategies using best available evidence and evaluating prevention strategies for the following, but not limited to: assuring proper implementation, identifying areas for improvement, identifying promising practices, and supporting decision-making for future strategy selection.
- Preparing for spread of emerging or promising practices, which may occur after the 5-year grant cycle.

Moving forward, the grantee should begin to apply the public health approach to facilitate the selection of evidence-informed and evidence-based strategies for the modification of sexual violence-related risks, protective factors, and other positive outcomes, including impacts on sexual violence perpetration and victimization. CDC will work with the grantee to provide guidance and technical assistance on using the public health approach to identify project goals and activities.
