## ABOUT THE ORGANIZATION & PROGRAMS

Child Care Aware of Kentucky is the statewide regional network for Child Care Resource and Referral (CCR&R) services supporting access to safe, affordable, quality child care for families and professional development for child care providers and trainers.

Child Care Aware of Kentucky is housed at the Human Development Institute at the University of Kentucky. The Human Development Institute is Kentucky's University Center for Excellence in Developmental Disabilities Education, Research and Service. Projects focus on improving lifelong opportunities and services for individuals with disabilities, their families, and the community.

This report was developed in part with Child Care Block Grant funds through a contract to the Human Development Institute from the Kentucky Cabinet for Health and Family Services, Division of Child Care (Contract Number PON2 736 2000001765).

### **2020 Child Care Market Rate Report**

Historically, 2020 will be a year primarily remembered for the COVID-19 global pandemic. This public health emergency affected the early care and education community in Kentucky just as it affected the entire world. The first case of COVID-19 was reported in Kentucky on March 6<sup>th</sup>; the public school system was closed across the state on March 13<sup>th</sup>; and all child care programs were shut down on March 20<sup>th</sup>. This unparalleled emergency shutdown had a tremendous financial impact on providers and some closed permanently.

The reopening of child care programs with strict safety protocols began on June 8<sup>th</sup> for Certified Family Child Care Homes and on June 15<sup>th</sup> for Licensed Child Care Centers. Child care facilities were allowed to operate with reduced class sizes and heightened safety requirements. When facilities experienced confirmed cases or exposure to the virus, they were required to contact their local department of public health for direction. Facilities often had to shut down temporarily for a period until they could safely reopen.

A Market Rate Report and Workforce Survey had already been planned for FY19-20. In order to be more efficient and to gather additional data related to the pandemic, a combined Market Rate and Workforce Survey was sent to every Licensed Child Care Center (Type I and Type II) and Certified Family Child Care Home across the Commonwealth of Kentucky. This survey was available to any provider who had been open for any portion of the 2020 calendar year.

The analyses of these survey data will be provided in two phases. The first phase includes the current Market Rates across Kentucky as detailed by tables in this report. These are reported by geographical regions, by urban or rural status, and statewide. We also report market rates in relation to quality levels and acceptance of child care subsidy. These figures are calculated in order to support the setting of CCAP reimbursements for the state. The additional data that

were collected will be analyzed separately. A larger combined Work Force and Market Rate Report will be shared before June 30, 2021, the end of the state fiscal year.

### Data Collection

Survey invitations were sent to the contact email address for all child care facilities (Type I, Type II, and Family Child Care Homes) on 12/7/2020. Notices were placed on social media, messages were sent by the DCC ListServ, and Child Care Aware coaches reminded providers that the survey was available. Early care and education stakeholder groups also were encouraged to share information about the survey. As an additional incentive, a random drawing for eight \$25 Visa gift cards was included to any provider who completed the survey.

The survey remained open throughout the winter holiday break. In January 2021, a final push was made to all providers to encourage them to participate. Additional DCC ListServ messages and social media posts were made. Child Care Aware coaches followed up with their own caseloads to encourage providers to look for the survey in their email, or to fill out a survey via an anonymous link. The anonymous link was created for those who could not find the original invitation or who might have had a change in email. Participants added their licensing information so that it could be matched to the larger list of providers.

Data collection concluded on January 15, 2021. The overall response rate to the survey was 1029 out of a possible 2052 for a response rate of 50.15%. This rate is strong particularly considering the numbers of providers that closed on a temporary or a permanent basis as well as the tremendous stress that the entire community was undergoing.
