

# CCBHC Data Fields & Data Submission Instructions (2025)

*The information contained in this document is proprietary and the property of KY DMS. Unauthorized disclosure or sharing of this information is prohibited without the express permission of KY DMS.*

## Objective

Certified Community Behavioral Health Centers (CCBHCs) will provide KY DMS data from their electronic health records, consumer scheduling systems, billing systems, etc. to facilitate KY DMS's completion of the required quality measure workbook. The data provided will be data pertaining to Provider Type 16 consumers exclusively.

Each CCBHC will generate two files to be transmitted to ODA on the 30<sup>th</sup> day of the month following the end of each quarter. In each file, CCBHC will ensure the accurate collection and reporting of the data fields requested.

Please refer to the Kentucky CCBHC Quality Measures Manual for specific details about the quality measures calculations.

## Definitions

- **Demographic Data File**

Demographic data on all consumers who made initial contact with the CCBHC or received services during the demonstration measurement year will be submitted in this file on a quarterly basis. This file will be updated quarterly with any important changes to the consumer's information that the CCBHC may be aware of (example: house situation, insurance status, death).

- **Measures Data File**

Service details, including diagnosis, for consumers who received any allowable CCBHC service during the reporting period. These codes are listed on the CCBHC Quality Measures Value Set List. The most recent copy of value set list can be found on the CCBHC webpage.

- Not all value sets and/or codes may be used by your organization. All were made available for your convenience, use the ones that apply to your organization.

## File Naming Convention:

- Files will be forwarded by the MOVEit process to this location:  
<https://ftp.ky.gov/>
- With the following naming conventions:
  - o CCBHC\_QMData\_DD\_name\_YYQ#\_[day file created]YYYYMMDD.txt (demographic data file)  
Example: CCBHC\_QMData\_DD\_NewVista\_22Q1\_20220430.txt
  - o CCBHC\_QMData\_MD\_name\_YYQ#\_[day file created]YYYYMMDD.txt (measures data file)  
Example: CCBHC\_QMData\_MD\_SevenCounties\_22Q1\_20220430.txt

ODA will download the CCBHC data submission files from MoveIT and then delete the files from MoveIT. ODA will load and review the files before providing an individual Data Submission Form for each file to inform the CCBHC if the file was accept or reject, along with any changes that may be needed. ODA may request changes on the data even if the file is accepted in order to inform the CCBHC of potential data irregularities.

## Variables:

- **Field:** The field name should remain the same across all data submissions and be in the same order.
- **Description:** Details about what information should be provided in the field and definitions for the acceptable information. If codes are listed in description to describe categories then identified codes must be used.
- **Date Type:** Expected format of the field

- **Length:** Expected maximum length of the field unless designated codes for specific categories are noted in the description then code should match the maximum field length.
- **Example:** Example and/or formatting of the field, clinics need to follow formatting for dates especially
