

Commonwealth of Kentucky Section 1115 Substance Use Disorder (SUD) Demonstration Implementation Plan

Date: 11-04-19 Amended

Overview

The Commonwealth of Kentucky is facing a substance use crisis of epic proportions. ¹ In 2016, the commonwealth lost 1,404 Kentuckians due fatal drug overdoses. Over the past 5 years Kentucky has seen a 38% increase in overdose deaths. Historically among the Substance Use Disorder (SUD) population the number of patients who have one of the common co-morbidities associated with SUD are much greater than patients without an SUD. For example, the state has seen a rapid increase (nearly 115%) in cases of Neonatal Abstinence Syndrome (NAS). ² Of those cases, Medicaid accounted for over 80%. In 2016 the Center for Disease Control (CDC) identified 220 counties in the United States that are most susceptible for Human Immunodeficiency Virus (HIV) outbreak, of the 220 counties 54 reside in the Commonwealth of Kentucky.

Kentucky has created multiple initiatives to combat the SUD crisis and increase awareness. Below are a number of programs that have either been implemented or are under development:

- o In 2012, Kentucky passed sweeping legislation that has become a national model. This statute required; the use of Prescription Drug Monitoring Program (PDMP) for all prescribers of controlled substances, regulated pain clinics by requiring them to be physician or hospital owned, and fostered increased cooperation among the PDMP, Kentucky licensure boards and law enforcement.
- o In 2015, Kentucky passed several harm reduction measures including; Syringe Exchange, Naloxone Distribution and the Good Samaritan Law.
- o In 2015, the Kentucky Board of Medical Licensure (KBML) promulgated a regulation containing buprenorphine prescribing guidelines to help improve the effectiveness of medication assisted treatment with buprenorphine.

¹Slide 5 SUD DMS Provider Forums 2017 (using 2011-2016 data)

² Produced by the Kentucky Injury Prevention and Research Center, May 2016. Kentucky Inpatient Hospitalization Claims Files, Frankfort, KY, [2000-2015]; Cabinet for Health and Family Services, Office of Health Policy. Data for 2010-2015 are provisional; therefore these results are subject to change.

- o In 2017 House Bill 333 Introduced as the professional standard of a 3-day prescribing limit on Schedule II controlled substances for acute pain.
- o Kentucky Opioid Response Effort (KORE) Initiatives:
 - ER Bridge Clinics Established Bridge Clinics in three (3) major Hospital Systems, where individuals admitted to the Emergency Room as a result of drug overdose will have the option to begin treatment at a "Bridge Clinic", which will then be able to provide Medication Assisted Treatment (MAT). Peer Support Specialists will also meet with individuals in the ED to provide support around accessing treatment and recovery services. Following discharge, Peer Support Specialists as well as other treatment staff (e.g., case managers, certified providers, and licensed evaluator) will contact individuals as part of an assertive, ongoing engagement effort. Individuals accepting services will have rapid access to treatment, including MAT, by being transferred to a Bridge clinic located nearby.
 - Sponsoring opioid stewardship aimed at prescriber education and reducing the dependence on opioids for pain management.
 - Expand prevention programs Sources of Strength in middle, high and post-secondary institutions.
- Department for Behavioral Health Developmental and Intellectual Disabilities (DBHDID) Grant > Behavioral Health & Primary Care Integration.
- o State Wide Screening referral service for substance abuse treatment Helpline.
- o In 2018 Kentucky will implement –a Web based treatment locator designed for referrals from Primary Care Physicians, Emergency Room and Health Departments.
- o Addition of Methadone coverage for SUD treatment via state plan.

Section I – Milestone Completion

Milestones

1. Access to Critical Levels of Care for OUD and Other SUDs

To improve access to Opioid Use Disorder (OUD) and SUD treatment services for Medicaid beneficiaries, it is important to offer a range of services at varying levels of intensity across a continuum of care since the type of treatment or level of care needed may be more or less effective depending on the individual beneficiary.

- Outpatient Services;
- Intensive Outpatient Services;
- Medication assisted treatment (medications as well as counseling and other services with sufficient provider capacity to meet needs of Medicaid beneficiaries in the state);
- Intensive levels of care in residential and inpatient settings; and
- Medically supervised withdrawal management

Milestone Criteria	Current State	Future State	Summary of Actions Needed
Coverage of outpatient services	Department for Medicaid Services (DMS) currently provides a comprehensive array of behavioral health services including; Screening, Assessment, Crisis Intervention, Partial Hospitalization, Individual, Group and Family therapies, Peer Support, Targeted Case	Will add treatment plan development for alcohol and/or substance abuse to the array of services allowed in State Plan. Will continue providing coverage of outpatient services through the State Plan.	 Amend State Plan to include service planning for SUD treatment. Update regulations to reflect added service. DMS Division of Policy and Operations will oversee completion of tasks.

	Management, and residential service for SUD. DMS also provides medication assisted treatment with buprenorphine, and vivitrol. These services will continue under Kentucky's State Plan. Click Here for State Plan Amendment		 DMS Senior Behavioral Health Policy Advisor will oversee completion of tasks. Estimated completion September 12, 2019.
Coverage of intensive outpatient services	Intensive Outpatient Program (IOP) is currently a covered service through Kentucky's State Plan and is an alternative to or transition from inpatient hospitalization or partial hospitalization for mental health or substance use disorders. IOP must be provided at least three (3) hours per day and at least three (3) days per week. This service will continue under Kentucky's State Plan. Partial Hospitalization is a short-term (average of four (4) to six (6) weeks), less than 24 hour, intensive treatment program for individuals experiencing significant impairment to daily functioning due to substance	Currently Partial Hospitalization may be provided in a hospital or Community Mental Health Center (CMHC). Propose to add Behavioral Health Services Organization (BHSO) as an allowable setting to perform partial hospitalization services. Will continue to cover IOP throughout the demonstration under State Plan.	 Amend regulations adding partial hospitalization to the service array for a BHSO. DMS Senior Behavioral Health Policy Advisor will oversee completion of tasks. September 12, 2019 completion time from approval of implementation plan.

	use disorders, mental health disorders or co-occurring mental health and substance use disorders. This service is designed for individuals who cannot effectively be served in community-based therapies or IOP. Click Here for State Plan Amendment		
Coverage of medication assisted treatment (medications as well as counseling and other services with sufficient provider capacity to meet needs of Medicaid beneficiaries in the state)	DMS currently covers MAT for Buprenorphine and Vivitrol.	DMS will expand MAT to cover Methadone for the treatment of Substance Use Disorders.	 DMS will amend the State Plan to include coverage of Methadone for MAT. Amend behavioral health services organization regulation to include narcotic treatment program. DMS Senior Behavioral Health Policy Advisor will oversee completion of tasks. Estimated Time Frame: September 12, 2019.
Coverage of intensive levels of care in residential and inpatient settings	DMS currently provides coverage of residential services for Substance Use Disorders (SUD) in the State Plan. Services must be provided under the medical direction of a physician and provide continuous nursing	Kentucky will develop a provisional residential level of care certification program. Department for Medicaid Services will issue residential providers a provisional certification based on selfattested ASAM level of care	 State Plan Amendment and Regulation changes to reflect certification levels DMS Senior Behavioral Health Policy Advisor will oversee completion of tasks.

services in which a registered nurse shall be on-site during traditional first shift hours, continuously available by phone after hours' and on-site as needed in follow-up to telephone consultation after hours. Residential coverage have two levels of treatment. Short term services should have twenty-four (24) hour staff and have a duration of less than thirty (30) days. Long term services should have twenty-four (24) hour staff as required by licensing regulations with lengths of stay thirty (30) to ninety (90) days. DMS will not pay for this service in a unit of more than 16 beds or multiple units operating as one unified facility with more than 16 aggregated beds except for services furnished pursuant to the state plan benefit "inpatient psychiatric services for individuals under twentyone (21)" (section 1905(a)(16) of the Act; 42 CFR 440.160) or pursuant to an exclusion for individuals age 65 or older who reside in institutions that

for residential services in the current edition of The ASAM criteria. Provisional Certification will be issued by the DMS Behavioral Health Policy Team by completing desk audits to review attestations.

- Desk Audits completed by February 15, 2020.
- Provisional Certification effective April 1, 2020.

	are Institution for Mental Disease (IMDs) (section 1905(a) of the Act; 42 CFR 440.140.). Require BHSO to be licensed as a non-medical and non-hospital based alcohol and other drug treatment program in accordance with state licensing regulations. Click Here for State Plan Amendment		
Coverage of medically supervised withdrawal management(WM)	DMS currently covers medical detox in a hospital setting.	DMS will incorporate all levels of withdrawal management (Level 1 –WM Ambulatory withdrawal management without extended on-site monitoring, Level 2-WM Ambulatory withdrawal management with extended on-site monitoring, Level 3-WM Residential/inpatient withdrawal management and Level 3.2-WM Clinically managed residential withdrawal management, Level 3.7-WM medically monitored inpatient withdrawal management and Level 4- WM Medically managed intensive inpatient	 Amend service definitions to include withdrawal management at appropriate levels of care within State Plan and KY regulations. DMS Senior Behavioral Health Policy Advisor will oversee completion of tasks. Completed by September 12, 2019.

REALIN			
		withdrawal management)	
		within the continuum of care	
		offered in Kentucky.	

Kentucky defines the following categories of providers that are able to provide State Plan Services Behavioral Health and Substance Use Disorder services:

- Individual Practitioner: An individual practitioner who is licensed by the respective board in the Commonwealth of Kentucky or who is supervised by a licensed practitioner to render health services and/or bill DMS. The practitioners include: Licensed Professional Art Therapist, Applied Behavior Analyst, Licensed Professional Clinical Counselor, Licensed Clinical Social Worker, Licensed Marriage and Family Therapist, Licensed Psychological Practitioner, Licensed Psychologist, Physician, Advanced Registered Nurse Practitioner with Psychiatry Specialty Physician Assistant, and Licensed Clinical Alcohol and Drug Counselor.
- Provider Group: A group of more than one individually licensed practitioner who forms a business entity to render behavioral health services and bill DMS.
- Licensed Organization: A business entity that employs licensed and non-licensed health professionals and is licensed to render behavioral health services and bill DMS. This organization must also meet the following criteria:
 - (1) Be enrolled as a Medicaid provider in the Commonwealth of Kentucky;
 - (2) Demonstrate experience serving the population of individuals with behavioral health disorders relevant to the particular services provided;
 - (3) Have the administrative capacity to provide quality of services in accordance with state and federal requirements;
 - (4) Use a financial management system that provides documentation of services and costs; and
 - (5) Demonstrate capacity to document and maintain individual case records in accordance with state and federal requirements.

The Licensed Organizations include: Behavioral Health Services Organization and Community Mental Health Centers.

All providers must operate within the scope of their license. Providing services to Medicaid recipients outside a provider's licensure is considered fraud.

2. Use of Evidence-based, SUD-specific Patient Placement Criteria

Implementation of evidence-based, SUD-specific patient placement criteria is identified as a critical milestone that states are to address as part of the demonstration. To meet this milestone, states must ensure that the following criteria are met:

- Providers assess treatment needs based on SUD-specific, multi-dimensional assessment tools, e.g., the ASAM Criteria, or other patient placement assessment tools that reflect evidence-based clinical treatment guidelines; and
- Utilization management approaches are implemented to ensure that (a) beneficiaries have access to SUD services at the appropriate level of care, (b) interventions are appropriate for the diagnosis and level of care, and (c) there is an independent process for reviewing placement in residential treatment settings.

Currently DMS, through Managed Care Contracts require the use of ASAM Criteria for authorization regarding Level of Care (LOC) for SUD treatment. Managed Care Organizations (MCO) apply ASAM to both outpatient and residential services with no predetermined limits of care established for these services. Continued involvement in a level of care is based on individual need determined through medical necessity criteria. DMS will continue to require ASAM Criteria for authorization of treatment and recovery services for individuals with an SUD through the contractual requirement with the MCO's. Below is the language utilized in the MCO contracts to address utilization management.

³The MCO's shall have in place mechanisms to check the consistency of application of review criteria. The written clinical criteria and protocols shall provide for mechanisms to obtain all necessary information, including pertinent clinical information, and consultation with the attending physician or other health care provider as appropriate. The Medical Director and Behavioral Health Director shall supervise the UM program and shall be accessible and available for consultation as needed. Criteria approved under a prior contract must be resubmitted to ensure it meets the requirements of this Contract.

.

³ Language from MCO SFY 18 Contracts

Decisions to deny a service authorization request or to authorize a service in an amount, duration, or scope that is less than requested, must be made by a physician who has appropriate clinical expertise in treating the Member's condition or disease. The clinical reason for the denial, in whole or in part, specific to the Member shall be cited. Physician consultants from appropriate medical, surgical and psychiatric specialties shall be accessible and available for consultation as needed. The Medical Necessity review process shall be completed within two (2) business days of receiving the request and shall include a provision for expedited reviews in urgent decisions. Post-service review requests shall be completed within fourteen (14) days or, if the Member or the Provider requests an extension or the Contractor justifies a need for additional information and how the extension is in the Member's interest, may extend up to an additional fourteen (14) days.

- A. The MCO's shall submit its request to change any prior authorization requirement to Department for Medicaid Services (DMS) for review.
- B. For the processing of requests for initial and continuing authorization of services, the Contractor shall require that its subcontractors have in place written policies and procedures and have in effect a mechanism to ensure consistent application of review criteria for authorization decisions.
- C. In the event that a Member or Provider requests written confirmation of an approval, the Contractor shall provide written confirmation of its decision within three working days of providing notification of a decision if the initial decision was not in writing. The written confirmation shall be written in accordance with Member Rights and Responsibilities.
- D. The Contractor shall have written policies and procedures that show how the Contractor will monitor to ensure clinically appropriate overall continuity of care.
- E. The Contractor shall have written policies to ensure the coordination of services:
- 1. Between settings of care, including appropriate discharge planning for short term and long-term hospital and institutional stays;
- 2. With the services the Member receives from any other MCO;
- 3. With the services the member receives in Fee for Service (FFS); and
- 4. With the services the Member receives from community and social support providers.
- F. The MCO shall have written policies and procedures that explain how prior authorization data will be incorporated into the MCO's overall Quality Improvement Plan.

DMS providers perform an assessment and collect other relevant information that will assist in determining the most appropriate level of care. DMS does not require the provider to utilize one specific multi-dimensional tool. In regulation, DMS defines assessment to include gathering information and engaging in a process with the individual that enables the provider to:

- o Establish the presence or absence of a mental health disorder, substance use disorder, or co-occurring disorders;
- o Determine the individual's readiness for change;
- o Identify the individual's strengths or problem areas that may affect the treatment and recovery processes; and
- o Engage the individual in developing an appropriate treatment relationship;
- Establish or rule out the existence of a clinical disorder or service need;
- Include working with the individual to develop a treatment and service plan; and
- Does not include psychological or psychiatric evaluations or assessments.

As part of the new waiver benefit, Kentucky will require utilization of ASAM's six dimensions of multidimensional assessment to ensure consistency in the assessment and treatment planning process for treatment of substance use disorders. The dimensions will assist the provider to create a holistic, biopsychosocial assessment of the recipient that will assist the provider with development of the treatment planning for any person seeking SUD services. The dimensions include acute intoxication and/or withdrawal potential; biomedical conditions and complications; emotional, behavioral or cognitive conditions and complications; readiness to change; relapse, continued use, or continued problem potential and recovery/living environment.

DMS will ensure that providers are utilizing the appropriate clinician to perform the assessment which include a credentialed counselor or clinician, a certified addiction registered nurse, a psychologist or a physician. DMS will require all SUD providers to incorporate these dimensions as part of their assessment by July 1, 2019. DMS will outline requirements within regulations and ensure all providers will be trained on ASAM criteria. The estimated timeline for completion of changes in regulations related to assessment criteria is July 1, 2019. DMS Division of Policy and Operations will oversee completion of task.

3. Use of Nationally Recognized SUD-specific Program Standards to Set Provider Qualifications for Residential Treatment Facilities

Through the new Section 1115 initiative, states will have an opportunity to receive federal financial participation (FFP) for a continuum of SUD services, including services provided to Medicaid enrollees residing in residential treatment facilities that qualify as institutions for mental diseases. To meet this milestone, states must ensure that the following criteria are met:

- Implementation of residential treatment provider qualifications (in licensure requirements, policy manuals, managed care contracts, or other guidance) that meet the ASAM Criteria or other nationally recognized, SUD-specific program standards regarding the types of services, hours of clinical care and credentials of staff for residential treatment settings;
- Implementation of a state process for reviewing residential treatment providers to assure compliance with these standards; and
- Implementation of a requirement that residential treatment facilities offer MAT on-site or facilitate access off site.

Currently DMS only reimburses residential SUD treatment with providers who have less than sixteen (16) bed facilities or for recipients who are under the age of twenty-one (21) or over the age of sixty-four (64). CMHC's, BHSO's and hospitals are DMS provider types licensed through Office of Inspector General (OIG) and provide residential SUD services. These services are based on individual need and may include screening, assessment, service planning, peer support, individual, group and family outpatient therapy. DMS requires residential services be provided under the medical direction of a physician and provide continuous nursing services on site during traditional first shift hours Monday through Friday and continuously available for telephone consultation afterhours and onsite as needed.

The Commonwealth of Kentucky will conduct two (2) statewide surveys to assess the current landscape of behavioral health providers and determine what level of care residential providers are able to provide. We began with a survey sent out to all Medicaid enrolled substance use disorder providers to determine the current landscape of available services. The purpose of the second survey (self-attestation) was for the residential providers to self-attest to their level of ASAM residential care. The landscape survey was completed on October 15, 2018. This will align with the DMS led certification process. Based on the results of the second self-attestation (survey) Kentucky would allow for reimbursement of residential services up to 96 beds in an IMD pending certification by the State conducted certification process. Based on the result of the provider self-attestation, the temporary waiver of the IMD exclusion began on April 01, 2019. DMS is internally considering payment adjustment based on residential level of care.

In order for a SUD residential provider to be eligible for the Institution of Mental Disease (IMD) exclusion, Kentucky will require the provider to be certified to the ASAM residential levels of care which are; 3.1 Clinically Managed Low-Intensity Residential Services, 3.3 Clinically Managed Population Specific High Intensity Residential Services, 3.5 Clinically Managed High-Intensity Residential Services, 3.7 Medically Monitored Intensive Inpatient Services. Kentucky Revised Statutes (KRS) 216B.015 defines the Office of Inspector General, Division of Health Care responsible for inspecting, monitoring, licensing and certifying all health care facilities. This includes acute care hospitals, which DMS designate as Medically Managed Intensive Inpatient Services. Kentucky feels the licensure requirement is sufficient and does not require this level of care to be certified. The SUD residential providers that are

ASAM certified will then be able to receive the IMD exclusion for up to 96 beds for residential treatment. Residential treatment stays are eligible for statewide average length of stay of thirty (30) days.

Kentucky will issue provisional certification for residential levels: 3.1 Clinically Managed Low-Intensity Residential Services, 3.3 Clinically Managed Population Specific High Intensity Residential Services and 3.5 Clinically Managed High-Intensity Residential Services and 3.7 Medically Monitored Intensive Inpatient Services based on provider self-attestation. Kentucky's Department for Medicaid Services Behavioral Health Policy team will review all completed attestations containing staffing, co-occurring capacity, and programming utilizing state created forms. Provisional Certification for residential SUD providers will be effective April 1, 2020.. DMS will continue to engage with ASAM for level of care certification program updates.

DMS currently offers all the service components of MAT within the State Plan. Methadone is currently payable for pain not for SUD treatment. DMS is adding the coverage of Methadone to our State Plan services for the treatment of SUD and will ensure residential providers are providing MAT on-site or facilitating access off site, by conducting a provider survey. The offsite facilitation of MAT for residential providers that do not provide medication as part of their treatment continuum will allow individuals who opt for medication as a part of their plan of care to receive the medication services outside of the residential provider. As part of the care coordination in a residential setting, the care coordinator will assist in the logistics of locating, scheduling and transporting an individual for their offsite medication services.

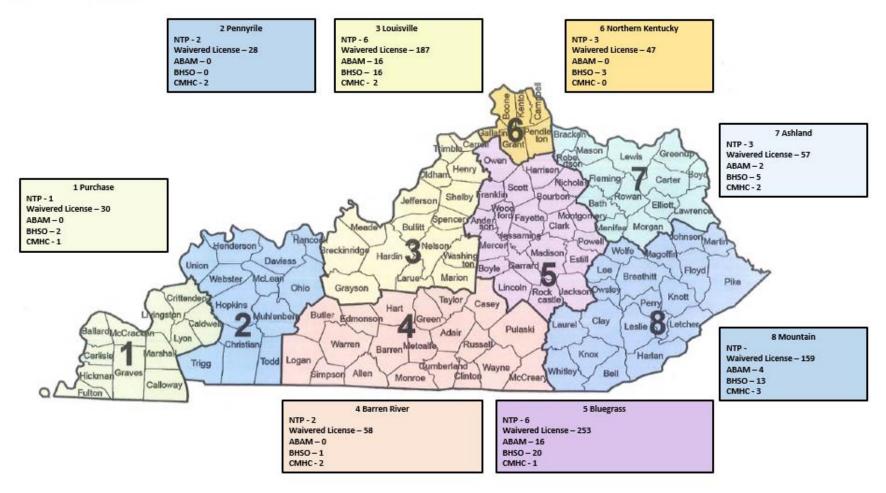

Kentucky has legislation to require the Cabinet of Health and Family Services (CHFS) to develop enhanced licensure and quality standards. These will be based on nationally recognized and evidence-based standards for substance use disorder treatment and recovery that include residential, outpatient and medication-assisted treatment (MAT) services. This legislation requires enhanced and streamline licensure requirements for SUD treatment providers as well as create statewide standards and outcome measures to ensure quality. DMS Division of Policy and Operations Senior Behavior Health Policy Advisor will oversee completion. Estimated for completion by September 12, 2019.

4. Sufficient Provider Capacity at Critical Levels of Care including for Medication Assisted Treatment for OUD

To meet this milestone, states must complete an assessment of the availability of providers enrolled in Medicaid and accepting new patients in the critical levels of care listed in Milestone 1. This assessment must determine availability of treatment for Medicaid beneficiaries in each of these levels of care, as well as availability of MAT and medically supervised withdrawal management, throughout the state. This assessment should help to identify gaps in availability of services for beneficiaries in the critical levels of care.

DMS to develop and conduct a survey for Medicaid and Non-Medicaid providers to determine what services they provide related to SUD levels of care and potential for Medicaid enrollment. As part of the survey, Kentucky will be looking at medication assisted treatment (MAT) service capability. Through onsite visits we will verify MAT is offered on-site or facilitated offsite. Completion of provider survey will be within twelve (12) months of Implementation Plan approval. DMS Division of Policy and Operations is responsible for completion of task.

Milestone Criteria	Current State	Future State	Summary of Actions Needed
Completion of assessment of the availability of providers enrolled in Medicaid and accepting new patients in the following critical levels of care throughout the state (or at least in participating regions of the state) including those that offer MAT: Outpatient Services; Intensive Outpatient Services; Medication Assisted Treatment (medications as well as counseling and other services); Intensive Care in Residential and Inpatient Settings; Medically Supervised Withdrawal Management.		Kentucky Medicaid is conducting a statewide survey of treatment providers that currently offer outpatient, Intensive Outpatient services, MAT and Residential services. With pending changes to licensure requirements for SUD treatment and recovery providers, Kentucky Medicaid will create a Preferred prescriber program that incorporates DMS Pharmacy prescribing program. Participation in the preferred provider program will reduce the administrative burden on the provider. The following are the requirements for participation: • Providing treatment under the license of a buprenorphine waivered practitioner and co-located credentialed addiction treatment practitioners, • Can distribute buprenorphine products during induction • Provide prescriptions for buprenorphine products • Provide psychosocial	 DMS removed prior authorization for al. MAT medications. Due to this change the need for preferred prescriber program has been eliminated. DSM Senior Behavioral Health Policy Advisor and DMS Pharmacy Director will oversee completion of task. Completion by September 12, 2019
		treatment for opioid use disorder that include	

assessment of psychosocial needs, individual and/or group counseling, linkage and referral to community based services and support systems, care coordination of on-site and off-site treatment services, medical/prescription
monitoring.

5. Implementation of Comprehensive Treatment and Prevention Strategies to Address Opioid Abuse and OUD

To meet this milestone, states must ensure that the following criteria are met:

- Implementation of opioid prescribing guidelines along with other interventions to prevent prescription drug abuse;
- Expanded coverage of and access to naloxone for overdose reversal; and
- Implementation of strategies to increase utilization and improve functionality of prescription drug monitoring programs.

Milestone Criteria	Current State	Future State	Summary of Actions Needed
Implementation of opioid prescribing guidelines along with other interventions to prevent opioid abuse	Prescribers are required to; obtain a report on beneficiaries from the prescription drug monitoring program (PDMP), obtain drug screens and encourage the patient's active participation in a behavioral modification program.	Revised buprenorphine criteria to increase response access and treatment. Streamlined administrative burden for quality care and qualified providers.	Develop program draft including revised clinical criteria and prior authorization forms -DMS Pharmacy Director is responsible for completion of this task -Expected on or before 11/1/18. 1/25/19 PA for bup over 24 mg and other bup

		utilization controls being	
		unitzation controls being	

reviewed include: limitations on Short Acting (SA) opioids for the treatment of acute pain, limitations on the treatment of chronic, noncancer pain in non-hospice patients, other class limitations such as age limits, daily dose limits, limits on cough and cold opioid containing products, limits on codeine and tramadol products, and required review of overlapping claims for opioids and benzodiazepines. The MME dosing limitations involve a claim by claim analysis of current member utilization of both Long Acting (LA) and SA opioids. Once complete we will have a better understanding of how members may be utilizing multiple prescriptions to achieve higher cumulative MME and their per day dosing. A simplified conversion factor of 4 MME/unit for methadone will be used to resolve the IT systems limitations

surrounding sliding scale as

recommended by CMS, until there is a new software release. Analysis will reveal the most common products contributing to the MME per day over 180 and over 300 both for FFS and the MCO populations. The program will allow exceptions for certain disease states such as cancer, sickle cell, and hospice. Additional considerations will apply for others like Long Term Care (LTC), acute surgical procedures, and Narcotic Treatment Program (NTP). We will establish MME thresholds for SA, LA, and combo use of opioids. And employ a step down methodology to reduce overall MME. Prior Authorizations will be revised to allow for new initial limits of opioids without PA up to a certain threshold MME (eg.. 90MME/day), while higher quantities require post limit PA, with an overall max MME threshold (eg.. 200MME/day). Post limit PA

		approvals will be limited in duration for acute pain treatment (30 days) but one year for chronic pain care. This will include some required patient reassessment interval (eg.3 mo.) which exceptions for those actively battling cancer.	
Expanded coverage of, and access to, naloxone for overdose reversal	All Kentucky Health Plans currently cover naloxone Nasal Spray and syringes without a co-pay or prior authorization. Although a prescription is required, under a collaborative care agreement pharmacists throughout the Commonwealth are permitted to initiate protocol driven orders for naloxone products. As part Kentucky's Opioid Response Effort, Narcan kits (set of 2 doses) are distributed in the highest-risk regions of the Commonwealth through the Department for Public Health's mobile pharmacy as well as individual pharmacies who enter into an agreement with KPhA to dispense KORE-funded kits.	Increase access to Medication Assisted Treatment (MAT) providers to connect services between emergency room discharge for overdose or high risk to primary provider care and treatment. Resources and connectivity to those for beneficiaries in treatment or within a high risk populations will also be increased.	This effort to educate; beneficiaries, prescribers, dispensers, families and schools will be on-going.

HEALIH		
	KPhA is also helping to establish partnerships between community pharmacies and residential treatment programs to ensure individuals have free take-home Narcan upon discharge. A pharmacist comes to the treatment centers to provide the kits as well as training on their use. People Advocating Recovery (PAR) is distributing Narcan kits in community settings targeting eastern Kentucky, other underserved counties, and Oxford Houses. In addition to training on use, education is provided on signs and symptoms, stigma, and Good Samaritan law. In addition 1,000 Narcan kits are being distributed across four Emergency Departments (UK, UL, St. Elizabeth, and St. Claire) to individuals having experienced or at risk	
	(UK, UL, St. Elizabeth, and	

6. Improved Care Coordination and Transitions between Levels of Care

To meet this milestone, states must implement policies to ensure residential and inpatient facilities link beneficiaries, especially those with OUD, with community-based services and supports following stays in these facilities.

DMS is in the early stages of a learning opportunity with other states related to integration of primary and behavioral health care. This learning lab will assist Kentucky with development of a strategic plan to implement policy for integration of physical and behavioral health. Kentucky's vision is to improve outcomes and reduce cost for; adults with serious mental illness and/or substance use

disorder, criminal justice, children and youth with social-emotional disturbance, children in state custody who may have juvenile justice involvement.

Through the Learning Lab opportunity Kentucky intends to improve linkages among health, behavioral health and criminal justice data.

Section II – Implementation Administration

Please provide the contact information for the state's point of contact for the Implementation plan.

Name and Title: Ann Hollen, Senior Behavior Health Policy Advisor

Telephone Number: (502) 564-6890 Email Address: ann.hollen@ky.gov

Section III – Relevant Documents

Please provide any additional documentation or information that the state deems relevant to successful execution of the implementation plan.

Attachment A – Template for SUD Health Information Technology (IT) Plan

Section I.

As a component of Milestone 5, Implementation of Strategies to Increase Utilization and Improve Functionality of Prescription Drug Monitoring Programs (PDMP), in the SMD #17-003, states with approved Section 1115 SUD demonstrations are generally required to submit an SUD Health IT Plan as described in the STCs for these demonstrations within 90 days of demonstration approval.

The SUD Health IT Plan will be a section within the state's SUD Implementation Plan Protocol and, as such, the state may not claim FFP for services provided in IMDs until this Plan has been approved by CMS.

In completing this plan, the following resources are available to the state:

- a. Health IT.Gov in "Section 4: Opioid Epidemic and Health IT."
- b. CMS 1115 Health IT resources available on "Medicaid Program Alignment with State Systems to Advance HIT, HIE and Interoperability" and, specifically, the "1115 Health IT Toolkit" for health IT considerations in conducting an assessment and developing their Health IT Plans.⁵

As the state develops its SUD Health IT Plan, it may also request technical assistance to conduct an assessment and develop its plan to ensure it has the specific health IT infrastructure with regards to the state's PDMP plan and, more generally, to meet the goals of the demonstration. Contacts for technical assistance can be found in the guidance documents.

In the event that the state believes it has already made sufficient progress with regards to the health IT programmatic goals described in the STCs (i.e. PDMP functionalities, PDMP query capabilities, supporting prescribing clinicians with using and checking the PDMPs, and master patient index and identity management), it must provide an assurance to that effect via the assessment and plan below (see Table 1, "Current State").

SUD Demonstration Milestone 5.0, Specification 3: Implementation of Strategies to Increase Utilization and Improve Functionality of PDMP

The specific milestones to be achieved by developing and implementing an SUD Health IT Plan include:

- Enhancing the health IT functionality to support PDMP interoperability; and
- Enhancing and/or supporting clinicians in their usage of the state's PDMP.

The state should provide CMS with an analysis of the current status of its health IT infrastructure/"ecosystem" to assess its readiness to support PDMP interoperability. Once completed, the analysis will serve as the basis for the health IT functionalities to be addressed over the course of the demonstration—or the assurance described above.

The SUD Health IT Plan should detail the current and planned future state for each functionality/capability/support—and specific actions and a timeline to be completed over the course of the demonstration—to address needed enhancements. In addition to completing the summary table below, the state may provide additional information for each Health IT/PDMP milestone criteria to further describe its plan.

Prescription Drug Monit	oring Program (PDMP) Fu	nctionalities		
Enhanced interstate data sharing in order to better track patient specific prescription data	1.1 The Kentucky PDMP (KASPER) is housed in the Cabinet for Health and Family Services (CHFS) Office of Inspector General (OIG). KASPER is currently able to share data with 12 states including our six border states that have PDMPs. 1.2 Interstate data is available for prescriber and pharmacist PDMP users. KASPER users currently have no tools or analytics available to assist them with identifying other state PDMPs for which a data request may be appropriate for a specific patient (informed data sharing.)	1.1 CHFS plans to enhance KASPER to support more efficient onboarding of additional states. 1.2 CHFS is beginning to work with the Bureau of Justice Assistance and PDMP Training and Technical Assistance Center to investigate the use of data analytics to inform end users of high probability patient data matching states to select when performing an interstate request	1.1 Onboard additional interstate data sharing states. Responsibility: KASPER Integration Project Manager (OATS). Target completion: December 2022. 1.2 Develop data analytic functionality to allow prescriber/pharmacist users to make a more informed decision on other states from which to request data based on their practice location and patient demographic information. Responsibility: KASPER Project Manager. Target completion: July 2020.	1.1 New States will be added at a rate of approximately 1 per month beginning in On-going. Monthly meetings are held. Currently we are sharing data with 12 states. The plan is to be connected to the remaining states and D.C. by December 2022. 1.2 This "Informed Data Sharing" is to be completed by July 2022. The plan begins with KASPER data only, but will spread to the regional and national level after proper analysis and

Enhanced "ease of use" for prescribers and other state and federal stakeholders	KASPER provides real- time access to Schedule II through V controlled substance prescription data for authorized health care providers, state and federal law enforcement officers and prosecutors, the Kentucky Medicaid program and other stakeholders. It allows for delegates to request reports on behalf of prescribers and dispensers, and allows for institutional accounts to simplify access for providers in hospitals and long term care facilities. The available controlled substance information includes opioid morphine milligram equivalent (MME) information, basic Prescriber Report Card data, and the ability to review the prescriber controlled substance	1.1 The KASPER code was developed in 2005, and is in need of modernization. CHFS is planning development of a new KASPER system using a modular design. Included in the modular design will be integrating with Electronic Health Record (EHR) system's and the statewide Kentucky Health Information Exchange (KHIE).	1.1 Develop a new modular KASPER system designed to provide improved ease of use and operational efficiency. The new system modules will include 1.1.1 User management module, 1.1.2 PDMP System Application Module, 1.1.3 PDMP Sharing Module. Responsibility: KASPER Project Manager. Target completion: 12/2021	testing. Monthly meetings will be held. 1.1.1 User management module, 4/2020. 1.1.2 PDMP System Application Module, 11/2020. 1.1.3 PDMP Sharing Module, 12/2021. Weekly Meetings will be held thru-out the entire project.

Responsibility: KASPER Project Manager. Target completion: 12/2020. 1.2 Study correlations between initial opioid use and patient misuse and abuse patterns, as well as potentially problematic controlled substance prescribing practices. Responsibility: OIG Epidemiologist. Target completion: ongoing.	Development work. Weekly meetings will be held. 12/2020. 1.2 This is an ongoing study that the Epidemiologist will lead.
Current and Future PDM	IP Query Capabilities			
Facilitate the state's ability to properly match patients receiving opioid prescriptions with patients in the PDMP (i.e. the state's master patient index (MPI) strategy with regard to PDMP query)	1.1 KASPER currently utilizes advanced data analytics to match controlled substance prescription records to patients.	1.1 In March 2017 CHFS implemented a new KASPER Data Collection System. Via this system, CHFS is implementing new data	1.1 Continue KASPER data quality improvement efforts. This is needed to ensure and improve data quality. Responsibility: KASPER Project	1.1 This includes Business Analysts and Resource Management Analysts. This is an ongoing, daily happening.

CHFS is supporting federal efforts to develop an API/Web service for PDMP/EHR integration and may also develop an in-house API/Web service to support integration projects. Responsibility: KASPER Project Manager. Target completion: 9/2020.	
Develop enhanced supports for clinician review of the patients' history of controlled substance prescriptions provided through the PDMP—prior to the issuance of an opioid prescription	KASPER currently provides detailed prescription history and opioid MME data to health care provider users. Additional functionality is needed to improve the level of care.	1.1 Implement the ability for all KASPER users to obtain class A misdemeanor and felony drug conviction data for the patient. 1.2 Implement a patient dashboard capability to make it easier for healthcare provider KASPER users to identify overlapping prescriptions, early refills, multiple provider episodes, potential drug interactions and other	1.1 Implement a link to the Administrative Office of the Courts (AOC) CourtNet system to allow KASPER users to see drug conviction data for the previous five years. Responsibility: KASPER and AOC Project Managers. Target completion: 07/2018. 1.2 Evaluate existing patient dashboard tools and capabilities, and determine whether	1.1 This link is currently in the testing phase and will be completed by 7/2018. The Commonwealth of Kentucky has assessed the current infrastructure/"ecosystem" that will be necessary to achieve the goals of the demonstration. The necessary changes have been identified and captured in the Kentucky HEALTH High Level Requirements (HLR) document which will be used to help determine cost and timeline as well as to monitor the overall status throughout development and implementation.

We have reviewed our last submission of the State Medicaid Health IT Plan (SMHP), Health Information Technology Plan to verify that SUD is aligned with the plan, it is. This has been addressed in the plan with integration to eKASPER and KHIE which also includes behavioral health data. It will become more tightly integrated and aligned as the Kentucky HEALTH demonstration project moves forward.

As applicable the Commonwealth of Kentucky will advance the standards referenced in the ISA and 45 CFR Subpart B, and the Manage Care Contractor (MCO) contracts will be updated to comply with the requirements.

<u>Attachment A, Section II – Implementation Administration</u>

Please provide the contact information for the state's point of contact for the SUD Health IT Plan.

Name and Title: David Vick/KASPER Program Manager

Telephone Number: 502.564.0105 x2479

Email Address: david.vick@ky.gov

Attachment A, Section III - Relevant Documents

Please provide any additional documentation or information that the state deems relevant to successful execution of the implementation plan.
