

Qualified Entity Organization Selection

The Self-Service Portal (SSP) allows for QE Hospital and QE Pregnancy users to select the Organization for which they want to submit an application if they are a part of multiple organizations.

- ✓ Upon initiating a new application, an **Organization Entity Selection** screen appears if the user is linked to multiple organizations.
 - ✓ SSP selects the default organization as the first associated organization.
 - ✓ If the user is associated to more than five organizations, then a vertical scroll bar is displayed.

Note: QE Hospital and QE Pregnancy users are always onboarded to one or more organization(s). If only one organization is associated, then the new modal is not displayed, and the sole organization is stamped to the application.
