

CABINET FOR HEALTH AND FAMILY SERVICES  
ADVISORY COUNCIL FOR MEDICAL ASSISTANCE

\*\*\*\*\*

Via Videoconference  
May 22, 2025  
Commencing at 9:30 a.m.

Tiffany Felts, CVR  
Certified Verbatim Reporter

APPEARANCES

**MAC MEMBERS:**

Dr. Sheila Schuster, Chair  
Nina Eisner  
Susan Stewart  
Dr. Jerry Roberts  
Heather Smith  
Dr. Garth Bobrowski  
Dr. Steve Compton  
Philip Travis  
Dr. Ashima Gupta  
John Dadds (not present)  
Dr. Catherine Hanna  
Barry Martin  
Kent Gilbert  
Mackenzie Wallace  
Bryan Proctor (not present)  
Peggy Roark  
Eric Wright  
Commissioner Lisa Lee  
Elizabeth Partin

SWORN TESTIMONY, PLLC

Lexington | Frankfort | Louisville  
(859) 533-8961 | [sworntestimonyky.com](http://sworntestimonyky.com)

1 DR. SCHUSTER: Dawna Clark is subbing  
2 for Erin today, and we appreciate that,  
3 Dawna. Dawna, I'm sorry. Will you let me  
4 know when the waiting room is emptied?

5 MS. CLARK: We still have some people  
6 joining, but I will let you know when it  
7 seems like everyone's in.

8 DR. SCHUSTER: Great. Thank you so  
9 much, and thanks for helping us out today.

10 We may have more people coming in  
11 than usual because we're having the public  
12 forum at 10 o'clock on the Medicaid 1115  
13 Demonstration on community engagement. So  
14 welcome to our regular MAC people and to  
15 those who are joining early for the public  
16 forum.

17 We about there, Dawna?

18 MS. CLARK: We have definitely slowed  
19 down on people joining, but we do still have  
20 some that are joining slowly. So if you  
21 want to go ahead and start, we will get them  
22 admitted as soon as we see them.

23 DR. SCHUSTER: All right, thank you.  
24 I think we'll go on because we've got a very  
25 tight agenda today. So we'll call the

1 meeting to order. This is the MAC meeting  
2 of May 22nd. And Mackenzie, if you could do  
3 the roll call, please.

4 MS. WALLACE: Yes, ma'am.

5 DR. SCHUSTER: Thank you.

6 MS. WALLACE: All right, here we go.

7 Elizabeth Partin?

8 MS. PARTIN: Here.

9 MS. WALLACE: Oh, okay. Nina Eisner?

10 MS. EISNER: Here.

11 MS. WALLACE: Susan Stewart?

12 MS. STEWART: Here.

13 MS. WALLACE: Dr. Roberts?

14 DR. ROBERTS: Here.

15 MS. WALLACE: Heather Smith?

16 MS. SMITH: Here.

17 MS. WALLACE: Dr. Bobrowski?

18 DR. BOBROWSKI: Here.

19 MS. WALLACE: Dr. Compton?

20 DR. COMPTON: Here.

21 MS. WALLACE: Philip Travis?

22 MR. TRAVIS: Here.

23 MS. WALLACE: Dr. Gupta?

24 DR. GUPTA: Here.

25 MS. WALLACE: John Dadds?

1 (No response.)

2 MS. WALLACE: Dr. Hanna?

3 DR. HANNA: Here.

4 MS. WALLACE: Barry Martin?

5 MR. MARTIN: Here.

6 MS. WALLACE: Kent Gilbert?

7 MR. GILBERT: Right here.

8 MS. WALLACE: Mackenzie Wallace?

9 (Raises hand.)

10 MS. WALLACE: Dr. Schuster? You are  
11 here.

12 DR. SCHUSTER: Here.

13 MS. WALLACE: Bryan Proctor?

14 (No response.)

15 MS. WALLACE: Peggy Roark?

16 MS. ROARK: Here.

17 MS. CLARK: Eric Wright?

18 (No response.)

19 MS. WALLACE: And Commissioner Lee?

20 COMM. LEE: I'm here. Took me a  
21 minute to get off mute, but I'm here.

22 DR. SCHUSTER: I was going to say, I  
23 had heard your voice earlier.

24 All right. We've got a very good  
25 number of our MAC members, and there may be

1 a few others joining us late. So thank you  
2 all, and welcome.

3 I would entertain a motion for  
4 approval of the minutes of our March 27th  
5 meeting.

6 MS. EISNER: This is Nina, I'll make  
7 that motion.

8 DR. SCHUSTER: Thank you, Nina. And  
9 a second?

10 DR. BOBROWSKI: Bobrowski, second.

11 DR. SCHUSTER: Thank you, Garth. Any  
12 additions, corrections, revisions?

13 (No response.)

14 DR. SCHUSTER: All in favor of  
15 approving the minutes of March 27th, signify  
16 by saying "aye."

17 (Aye.)

18 DR. SCHUSTER: And opposed, like  
19 sign.

20 (No response.)

21 DR. SCHUSTER: And abstentions?

22 (No response.)

23 DR. SCHUSTER: Thank you very much.

24 Commissioner Lee, we're going to  
25 start with you with the updates, and then at

1           10 o'clock, we will take that break to start  
2           the public forum on the Medicaid  
3           demonstration.

4           COMM. LEE: Okay.

5           DR. SCHUSTER: But let's start with  
6           the changes to the MAC and initiating the  
7           BAC.

8           COMM. LEE: Yeah, and I think I will  
9           turn that over to Deputy Commissioner  
10          Veronica Cecil to give us an update on the  
11          status of that.

12          DR. SCHUSTER: Thank you.

13          MS. JUDY-CECIL: Good morning. I do  
14          have slides, but in the interest of time,  
15          we'll be submitting those, and they can be  
16          posted. I'm just going to provide just a  
17          verbal update rather than go through all the  
18          slides.

19                 I think what's of most interest is  
20          that we did launch on April 28th, the -- we  
21          went ahead and launched the changes that are  
22          required by a federal rule to create a new  
23          Beneficiary Advisory Council, and to make  
24          changes to any state's current Advisory  
25          Council on Medical Assistance. That's been

1 renamed as the Medicaid Advisory Committee.  
2 So we did launch on April 28th to meet that  
3 requirement. We are working on regulations,  
4 and hope to have those filed soon, but in  
5 the meantime, we're moving forward. We have  
6 opened up for our applications to both the  
7 BAC, the Beneficiary Advisory Council, and  
8 the MAC, the Medicaid Advisory Committee,  
9 and new websites and applications are  
10 online. We also have a frequently asked  
11 questions document for folks if they kind of  
12 want to get some more information about, you  
13 know, what's happening, and the process,  
14 and, you know, what does this all mean.

15 We are transitioning the current  
16 Advisory Council to become our new Medicaid  
17 Advisory Committee. All members of the  
18 current Advisory Council should have  
19 received a letter, as all of the nominating  
20 organizations that are a part of KRS  
21 205.540, which is the state statute that  
22 create -- originally created the Advisory  
23 Council -- oh, gosh, back in 1960, I think,  
24 is when that was created. So what we're  
25 doing is taking that membership and the

1 requirements in that state statute and  
2 adding in just what the federal rule  
3 requires states to do. We're not making any  
4 other major changes except to incorporate  
5 those federal rule changes. That includes,  
6 for example, that we have to add a Medicaid  
7 Managed Care Organization representative to  
8 the new MAC. That's a federal requirement,  
9 as is making sure the Commissioner of  
10 Medicaid, or Medicaid Director in other  
11 states, appoints all of the BAC and MAC  
12 members. Currently, under the state  
13 statute, the governor appoints, but that  
14 will move to the commissioner appointing.

15 We are -- another federal rule change  
16 that impacts this is that members cannot  
17 serve consecutive terms. So they have to  
18 wait a period of time, and since we're going  
19 to have four-year terms, we're putting four  
20 years as the time that if someone is  
21 interested in serving again, they'll have to  
22 sit off of either the council or the  
23 committee.

24 We are doing staggered terms for the  
25 initial appointment on July 9th to both the

1 council and the committee. Those staggered  
2 terms will be two years, three years, or  
3 four years, and we've kind of allocated them  
4 across the different representations to make  
5 sure that when we have to reappoint, you  
6 know, we're not doing it all at once. We  
7 did post and send out to all of the MAC  
8 members a crosswalk of how the current  
9 Advisory Council members and their terms  
10 crosswalk over to the new MAC. So that is  
11 posted online, and we'll put the links for  
12 both the MAC and the BAC into the chat.

13 I think maybe the only other thing to  
14 cover is the BAC will be 15 members.

15 There'll be ten of the members are actual  
16 current or former beneficiaries, and the  
17 five additional are representing parents,  
18 guardians, or paid or unpaid caregivers.  
19 So, you know, that's what we're looking for  
20 right now. We already have 15 applications  
21 for the BAC that we've received, so we're  
22 happy to see that. And the other thing to  
23 note is the three current Advisory Council  
24 members that represent a current or former  
25 Medicaid member, or a parent, guardian, or

1           caregiver, they'll continue to serve on the  
2           advisory -- on the new MAC, and they're also  
3           being appointed to the BAC, so they'll serve  
4           that dual role. We have to have seven  
5           members of the BAC that are part of the new  
6           MAC. So in addition to those three, we will  
7           be appointing four additional members of the  
8           BAC to the MAC.

9           So as I said, you know, we will share  
10          the slides. It has a lot more information  
11          that kind of has all this information  
12          actually in it, and then we will post the --  
13          in the chat, we'll post the links. And  
14          there is contact information, we'll post  
15          that as well. We have an email address. We  
16          have a new email address for the BAC. We  
17          have phone numbers if folks want to call.

18          And then the last thing I'd just like  
19          to add is for those members, we really are  
20          going to provide a lot of support. So if  
21          someone is interested in applying for the  
22          BAC, we can take that application over the  
23          phone. Happy to do that. We will also be  
24          working with the appointed members in  
25          identifying what needs they have to be able

1 to participate in the BAC and the MAC if  
2 they get appointed to the MAC. So, you  
3 know, we want to make sure that they can  
4 fully participate and there aren't any --  
5 there's nothing that is preventing them from  
6 being able to participate. That includes  
7 calling them on a regular basis, making sure  
8 they have transportation, helping them  
9 understand any documents or information that  
10 is presented. So a lot of -- we're going to  
11 have dedicated staff to support members for  
12 participation.

13 So I'll pause, and happy to take any  
14 questions.

15 DR. SCHUSTER: Veronica, Kent Gilbert  
16 has posted in the -- would you post the link  
17 to the BAC and MAC application portal?

18 MS. JUDY-CECIL: Absolutely.

19 DR. SCHUSTER: He has some names to  
20 submit. And I don't know that you mentioned  
21 it, but I think the deadline for  
22 applications is May 29th, right?

23 MS. JUDY-CECIL: Thank you for that.

24 DR. SCHUSTER: Yeah.

25 MS. JUDY-CECIL: That is correct, May

1 29th.

2 DR. SCHUSTER: So one week from  
3 today, folks.

4 MS. JUDY-CECIL: That's correct.  
5 That's correct. And, you know, if folks are  
6 having trouble, especially for the  
7 applications for the BAC, you know, we'll be  
8 sensitive to that and understanding and work  
9 with anyone who may be interested that  
10 contacts us beyond that date.

11 DR. SCHUSTER: So --

12 MS. JUDY-CECIL: So our goal is that  
13 we need to have everybody appointed by  
14 July 9th.

15 DR. SCHUSTER: So it's great that you  
16 can help someone applying for the BAC to do  
17 it by phone. Is there a certain phone  
18 number that they should call?

19 MS. JUDY-CECIL: Yes, I'll put that  
20 in the chat --

21 DR. SCHUSTER: Okay. That would be  
22 helpful.

23 MS. JUDY-CECIL: -- and it's on the  
24 slides as well and is on our website.

25 DR. SCHUSTER: Okay. And the slides

1 will be posted on the DMS website under the  
2 MAC information under the MAC meeting?

3 MS. JUDY-CECIL: Yes, that's correct.

4 DR. SCHUSTER: Okay. All right. Are  
5 there any questions for Veronica about the  
6 BAC and the MAC? And just a reminder, that  
7 none of the TACs are affected by this at  
8 all? There was some earlier discussion at  
9 our meetings about maybe some changes, for  
10 instance, in the terms for the TAC, but the  
11 TACs are not touched at all, right?

12 MS. JUDY-CECIL: That's correct.

13 DR. SCHUSTER: Yeah.

14 MS. PARTIN: I have a question.

15 DR. SCHUSTER: Yes.

16 MS. PARTIN: Will the meeting  
17 schedules for the committee be the same as  
18 the schedule that we've already scheduled  
19 for the year?

20 MS. JUDY-CECIL: No, they will not.  
21 You know, the new members will be -- we will  
22 communicate with the new members to choose  
23 dates and a meeting cadence that's  
24 convenient to them.

25 And the other kind of a wrinkle to

1           that is the BAC has to meet before the MAC.  
2           It's a federal requirement that the BAC  
3           meets before the MAC. So we'll have to work  
4           out -- no, we're going to look for dates  
5           that are convenient for the members. And  
6           so, you know, that's something we'll do as  
7           soon as the appointments are made and we're  
8           able to communicate with the new members.

9           MS. PARTIN: Okay, thank you.

10          DR. SCHUSTER: When you say members,  
11          Veronica, are you talking about the BAC  
12          members, or the BAC and the MAC?

13          MS. JUDY-CECIL: Both the BAC and the  
14          MAC, yeah.

15          DR. SCHUSTER: Okay. Because we've  
16          got lots of providers, as you know, on the  
17          MAC, and they have cordoned off this three  
18          hours on the fourth Thursday of the month  
19          every other month to be a time to commit.  
20          Are you --

21          MS. JUDY-CECIL: I understand, but,  
22          you know, we're really focused on the BAC  
23          members and those seven members that will  
24          be -- become -- you know, especially the  
25          four new ones that will become members. I

1 think we have to be -- you know, we have to  
2 work with the new members on what's  
3 convenient for them.

4 DR. SCHUSTER: Since there'll be  
5 actually two meetings to coordinate, are you  
6 assuming that the BAC and MAC will meet more  
7 on a quarterly basis than on a bimonthly  
8 basis?

9 MS. JUDY-CECIL: We're trying not to  
10 make those decisions.

11 DR. SCHUSTER: Okay.

12 MS. JUDY-CECIL: We're really going  
13 to leave that up to the membership.

14 DR. SCHUSTER: Okay. Because I  
15 worry, we sometimes don't even get through  
16 our full agenda.

17 MS. JUDY-CECIL: Right.

18 DR. SCHUSTER: And biweekly, you  
19 remember, we used to meet quarterly.

20 MS. JUDY-CECIL: Yes.

21 DR. SCHUSTER: And then we went to  
22 bimonthly because there was so much, and  
23 I -- we squeeze the TACs as it is, and I,  
24 you know, am concerned about that.

25 Okay, any other questions? Thanks

1           for your question, Beth. Any other  
2           questions for Veronica?

3                       (No response.)

4           DR. SCHUSTER: All right. And we  
5           will look for those slides. Several of us  
6           have seen those slides, and they're very  
7           informative. So I advise you all to take a  
8           look at them. Thank you very much.

9           Commissioner, implementation impact  
10          of House Bill 695, which was kind of the  
11          Medicaid overhaul in a sense. What are you  
12          looking at there?

13          COMM. LEE: So we have been entrusted  
14          to present to the Budget Subcommittee in  
15          just a couple of weeks on our implementation  
16          of the various requirements in that bill.  
17          We have, as you know, a community  
18          engagement. We needed to file that waiver  
19          before -- within 90 days of passage of the  
20          bill, so that's coming up. So the Community  
21          Engagement Waiver has been posted for public  
22          comment. We are in compliance, we believe,  
23          with everything that we can be in  
24          compliance. I think that it would be very  
25          interesting for this group to watch the

1 Budget Subcommittee, which is next week --  
2 or on the fourth, I believe. It's on the  
3 4th of June, and we'll go through every  
4 single provision in the House Bill 695 as it  
5 relates to Medicaid and show where we are in  
6 the process of compliance with that.

7 The one thing we're a little bit --  
8 that does concern us a little bit, is the  
9 requirement that we have to receive approval  
10 from the General Assembly before -- or LRC  
11 before we file any state plan or waiver  
12 related to eligibility, benefits, that sort  
13 of thing. Because in the event we have to  
14 wait and discuss that with them when they're  
15 in session, that would be a little bit of an  
16 issue, but hopefully, the Medicaid Oversight  
17 and Advisory Board that is newly created  
18 would take up some of those issues and kind  
19 of help walk through some questions that we  
20 have as we move forward.

21 We do, you know -- we're grateful  
22 that there are provisions in there for which  
23 we must -- for us to comply with federal  
24 rules, because, as we know, there's a bill  
25 that just passed the House last night with

1           lots of provisions in it related to Medicaid  
2           and how we operate our program. We're  
3           keeping an eye on that because it still has  
4           a long way to go, but as far as 695, I  
5           believe we're in good shape. Right now, we  
6           can't really tell if it's going to have a  
7           huge disruption in the way we operate and  
8           administer the program, so time will tell on  
9           that, but we are in compliance with all the  
10          provisions in 695.

11                 DR. SCHUSTER: Okay. Any questions  
12           from any of the MAC members? And that  
13           meeting, you said, is on June the 4th?

14                 COMM. LEE: June 4th at 11 a.m. And  
15           you can watch that on the LRC website or on  
16           YouTube.

17                 DR. SCHUSTER: Okay. Yeah, it may be  
18           -- it probably will be televised by KET I  
19           would guess --

20                 COMM. LEE: Yes.

21                 DR. SCHUSTER: -- because that's  
22           going to be an important meeting. Thank you  
23           for letting us know that.

24                 So speaking of feds, we had a general  
25           item on the agenda about impending changes

1 to Medicaid from the federal government.

2 And of course, since they didn't finish last  
3 night or this morning until the wee hours, I  
4 won't expect you to look at that, but just  
5 looking at what you -- was being discussed,  
6 what's your overall sense of the impact on  
7 Medicaid in Kentucky?

8 COMM. LEE: Well, first of all, we're  
9 very thankful that there are no provisions  
10 related to a block grant or a per capita --  
11 a per member cap. But looking through some  
12 of the changes -- and, you know, working  
13 with the National Association of Medicaid  
14 Directors, they're keeping us very involved.  
15 Of course, it still has a long way to go,  
16 the bill has a long way to go. It has to  
17 now go to the Senate. And I think the  
18 Senate has made it clear that they're going  
19 to make some changes, but as far as Medicaid  
20 goes, you know, there's a work requirement  
21 for adults in Medicaid expansion, and that's  
22 going to -- the new language has that  
23 starting in December of 2026. The old  
24 language had it in 2029, so that's moved  
25 that up a little bit more.

1 More frequent eligibility checks and  
2 disincentives for us to cover unauthorized  
3 migrant children. So some of the provisions  
4 that were in the House bill that we have  
5 kind of looked at, you know, definitely  
6 increasing those eligibility  
7 redeterminations. And it moved that date up  
8 for states to be in compliance from  
9 October 1 of 2027 to December 31st of 2026.

10 Talked a little bit about reducing  
11 expansion FMAP for states that cover certain  
12 individuals, but they -- the newest language  
13 did remove -- or did add language that said  
14 it's not applicable to children or pregnant  
15 women who are lawfully residing in the  
16 state. So that language around undocumented  
17 individuals, and I'm glad that they  
18 specifically spelled out "not for a child or  
19 pregnant women lawfully residing."

20 We still have questions about how  
21 that may impact emergency time-limited  
22 Medicaid. We'll need to get guidance on  
23 that. I'm trying to think of what else is  
24 in -- oh, of course, it prohibits federal  
25 funding for -- it included CHIP this time,

1 and it prohibits federal funding for CHIP  
2 for gender transition procedures, and it  
3 removed the word "child" and makes that  
4 applicable to every individual covered in  
5 Medicaid.

6 So those are some of the -- the  
7 community engagement date has been moved up  
8 from January 1st, 2029, to December 31st,  
9 2026. HHS has to issue guidance by  
10 December 31st of 2025, so that should come  
11 out later this year. But again, we're just  
12 keeping our eye on everything that -- you  
13 know, the community engagement piece. There  
14 was a provision in this new one that we need  
15 to look at a little bit more about  
16 cautionary reductions to insurers on the  
17 exchange. So we're keeping an eye on that  
18 to see if that'll help us keep members on  
19 Kynect, how that may impact them. As you  
20 know, Kynect is now administered through  
21 Medicaid.

22 So again, it's still got a lot of  
23 ways to go going through the Senate now. So  
24 while we have some concerns, not as major  
25 since there are no -- from our

1 interpretation right now, our FMAP does not  
2 seem to be impacted. And the block grants  
3 are not in there, so that's a good thing,  
4 but still some concerns on particularly the  
5 changes that we have to make around  
6 community engagement, what will that look  
7 like. As you know, we have a waiver that's  
8 out for public comment right now, and then  
9 guidance from CMS is not going to come out  
10 until December of 2026. So that's a little  
11 bit of a concern on how we -- you know, what  
12 we do as we go forward.

13 DR. SCHUSTER: And on that point,  
14 Commissioner, I am assuming that regardless  
15 of whether -- I assume that our waiver will  
16 be approved on community engagement, but  
17 when this December of 2026 rolls around,  
18 then does the federal take precedent?

19 COMM. LEE: Yes. And we're -- you  
20 know, we're not sure what CMS will do once  
21 we submit our waiver, because if they have a  
22 vision in mind, we're not sure if they may  
23 have us amend our waiver before they approve  
24 it. So just a lot of unanswered questions  
25 related to what we want to do versus what's

1 the vision that CMS may have for community  
2 engagements as we go forward.

3 DR. SCHUSTER: Yeah. And there had  
4 been a lot of talk about changing the FMAP  
5 for the expansion population, but that also  
6 was not in there; is that correct?

7 COMM. LEE: From our interpretation  
8 of what's in there right now, there was an  
9 FMAP for states who have not expanded  
10 Medicaid. There was an enhanced FMAP to  
11 promote expansion in other states, so they  
12 have decided to reduce that enhancement for  
13 states that newly expand. There's a few  
14 more things in there, but from what we can  
15 see, unless something changes at the Senate  
16 level -- of course, it's all a moving  
17 target. Unless something changes at that  
18 federal -- or at the Senate level, where  
19 there's no language in there about reducing  
20 FMAP for Medicaid expansion members in  
21 states that were early adopters of  
22 expansion.

23 DR. SCHUSTER: So if there is a  
24 change, it's for those states that have not  
25 yet gone to expansion, right?

1                   COMM. LEE: That's the way we're  
2                   interpreting it right now.

3                   DR. SCHUSTER: Well, that's good news  
4                   because we've certainly heard a lot of talk  
5                   about going after the expansion population.  
6                   So --

7                   COMM. LEE: Yeah, I think that what,  
8                   you know, our, you know, the work  
9                   requirement -- or the community engagement,  
10                  they're not calling it work requirements --  
11                  community engagement and the six-month  
12                  redetermination is -- you know, those are  
13                  the two I think that's going to have the  
14                  most impact on everything we've seen so far.  
15                  But the National Association of Medicaid  
16                  Directors has been on top of this, and they  
17                  are -- you know, later this week they hope  
18                  to have a summary out of the changes that  
19                  was in this latest bill, and then we will  
20                  have to wait to see what the Senate does.  
21                  And I'm hearing that they want this  
22                  finalized before Memorial Day or shortly  
23                  after Memorial Day, so just keeping an eye  
24                  on that date because that's just in a couple  
25                  of days.

1 DR. SCHUSTER: Yes, that's exactly  
2 right. Any other questions from anyone on  
3 the MAC for the Commissioner on this very  
4 important topic?

5 (No response.)

6 DR. SCHUSTER: I think we'll all be  
7 going through and trying to figure out  
8 what's in that since it was passed -- all of  
9 the work on this bill has been done in the  
10 middle of the night, I just want to point  
11 out.

12 COMM. LEE: Yes, ma'am.

13 DR. SCHUSTER: So you have to be a  
14 night owl to stay up and watch it. Are  
15 there actual changes to the state exchanges  
16 in there?

17 DR. SCHUSTER: No, I'll have to look.  
18 I don't think there are any changes to the  
19 exchanges, but, you know, the -- there was  
20 some enhanced APTC that was available for  
21 individuals to purchase a product on the  
22 exchange that reduced their -- reduced their  
23 premium.

24 DR. SCHUSTER: Right.

25 COMM. LEE: So that was going to go

1 away, I think, very soon. I'd have to go  
2 back and look at the date. So I think there  
3 may be a provision to maybe continue some of  
4 that to promote individuals receiving  
5 insurance on the exchange. So that's --  
6 we're looking at that, too, to make sure  
7 because if people -- you know, if we see  
8 that individuals are starting to lose  
9 Medicaid, we want to make sure they have  
10 some form of health coverage, and moving  
11 them to the exchange or helping them get  
12 coverage on the exchange would be something  
13 that we would definitely want to explore.

14 DR. SCHUSTER: Yeah. I do think --  
15 back to the Medicaid, I do think that  
16 six-month rechecking of people is going to  
17 bump people off. We know that that happened  
18 with the unwinding. People have a hard time  
19 responding to that, so that's an issue.

20 COMM. LEE: And my question there,  
21 and I will see if it's in the -- any  
22 guidance that comes out, is if we have the  
23 ability -- right now, you know, we have  
24 several systems that we connect with to  
25 verify income, all of that stuff. So if we

1 can verify that for our members and take as  
2 much burden off of our members as we can as  
3 far as submitting documentation or actually  
4 doing anything, then I think that will help  
5 some, but there's always going to be those  
6 few that maybe slip through the cracks. So  
7 I think it's just something we keep our eye  
8 on as we go forward, how -- what is the  
9 process, how can we assist those members  
10 with staying on the program?

11 DR. SCHUSTER: Yeah. And Kent  
12 Gilbert asked if, is there -- are you aware  
13 of a link to that revised bill?

14 COMM. LEE: I can get the revised  
15 bill and put it in. It's a very lengthy  
16 document.

17 DR. SCHUSTER: Sure.

18 COMM. LEE: But I think that later,  
19 if you want, the National Association of  
20 Medicaid Directors always comes out with a  
21 summary. So if you'd rather have the  
22 summary, which would be a little bit better,  
23 I could also send that out as soon as we  
24 receive that.

25 DR. SCHUSTER: That would be great.

1           Probably both.

2                   MR. GILBERT:   Both, yeah.

3                   DR. SCHUSTER:   Yeah, Kent would like  
4           to see the bill and the markup, but we would  
5           love to see that summary.   And Dr. Wright  
6           has a question.   Eric?

7                   DR. WRIGHT:   Shifting a little bit of  
8           gears, too, and Commissioner, thank you  
9           always for the good updates, and we're  
10          hopeful for the federal legislation to  
11          benefit -- you know, to remain consistent to  
12          what we've had in the past.

13                   My question is related to this  
14          third-party news media information that came  
15          out in Louisville related to waiver  
16          recipients and the non-renewals.   So I've  
17          had a number of parents reaching out to me  
18          through social media channels about that.  
19          Can you speak to what we're doing to  
20          mitigate those issues and address the  
21          concerns that were brought up by the media?

22                   COMM. LEE:   Absolutely.   So as  
23          Dr. Wright mentioned, there have been a  
24          few -- some children who have lost waiver  
25          eligibility.   We have researched and looked

1           into the cause -- the root cause of that.

2           As you know, we contract with a vendor to do  
3           those assessments. So in January, there was  
4           a change in personnel that resulted in a  
5           different interpretation of that level of  
6           care. As you know, the individuals in  
7           waiver programs, in those 1915(c), have to  
8           meet nursing facility level of care, and it  
9           does get kind of complex when you start  
10          applying that criteria to children. So we  
11          believe there was a different  
12          interpretation. We have gone -- come back  
13          internally. We have pulled every one of  
14          those denials. We have re-reviewed them, we  
15          have overturned some, and we are making sure  
16          that the criteria going forward is applied  
17          correctly.

18                 So we believe that that was the  
19                 issue, and we continue to monitor the  
20                 situation and work with our vendor to make  
21                 sure that the criteria is applied uniformly  
22                 across all waivers.

23                 DR. WRIGHT: Thank you.

24                 DR. SCHUSTER: Yes, thank you for  
25                 that. If there are no other questions right

1           now for the Commissioner, we're a couple  
2           minutes after 10 o'clock. So I want to  
3           shift over to the public forum Number 1 on  
4           Kentucky Medicaid 1115 Demonstration,  
5           community engagement. And I assume,  
6           Dr. Hoffmann, that that's you.

7                     DR. HOFFMANN: That's correct. Thank  
8           you, Dr. Schuster.

9                     DR. SCHUSTER: Thank you.

10                    DR. HOFFMANN: First of all, we'd  
11           just like to thank the MAC Committee, as  
12           well as Dr. Schuster with the deepest  
13           appreciation to let us do this forum today,  
14           and for CMS to allow a MAC meeting to  
15           actually be considered an official public  
16           forum. So I do have a couple of  
17           housekeeping items to go over since this is  
18           the official public forum before we get  
19           started with a PowerPoint.

20                    So again, hello and welcome to  
21           Kentucky Community Engagement Program Public  
22           Forum, which is embedded today in our  
23           Advisory Committee for Medicaid Assistance,  
24           the MAC. My name is Leslie Hoffmann, and  
25           I'm the Deputy Commissioner -- or one of the

1 deputy commissioners in the Department for  
2 Medicaid Services, and I have been  
3 overseeing our community engagement  
4 activities. This forum is part of a 30-day  
5 public period as required by the federal  
6 government for proposed new demonstration  
7 programs. During this presentation, we will  
8 provide details about the proposed new  
9 program and allow for all attendees to make  
10 comments. We will not be responding to the  
11 comments, however, with Q&A or question and  
12 answers; however, we do want to make sure  
13 that we gather everything that folks want to  
14 say today, and to get you engaged in the  
15 process.

16 We will be submitting the final  
17 demonstration application to the Federal  
18 Center for Medicaid and Medicare Services  
19 after we receive all public comments, go  
20 through those, compile them. We will put  
21 those on our website for easy access, and  
22 they will be posted fairly soon. I can get  
23 a timeline for you fairly shortly,  
24 Dr. Schuster.

25 So for Zoom instructions today, the

1           commenters may either submit public comment  
2           through the chat option, and you will want  
3           to include the "CE Public Comment" in the  
4           chat before you make your chat. You will  
5           see that Paige has listed that instruction  
6           in the comments already -- or in the chat  
7           already. You will also be able, at the end  
8           of this time, at the end of the  
9           presentation, to raise your hand to come off  
10          mute and make comments. And I will let you  
11          know at the end of the presentation when  
12          that option is available.

13                 Please be reminded that -- just to be  
14          respectful of all attendees so that we can  
15          get as many public comments in today as  
16          possible that you only take a few minutes  
17          for your public comment. Again, you can put  
18          them in the chat, or we'll have time at the  
19          end, and there are other options if you  
20          don't get your comment in today.

21                 If you decide not to make your  
22          comment today, but you go back and you  
23          think, "Gosh, you know, I wish I had made  
24          some comments," you still have the  
25          opportunity to do so. We will have a public

1 forum tomorrow in person at the auditorium  
2 room in the Transportation Building, which I  
3 will go over that at the end of the  
4 presentation, or you can still utilize the  
5 email option, or you can still utilize the  
6 -- just the general Postal Service, U.S.  
7 Postal Service mailing.

8 Okay. Let me get the presentation --

9 DR. SCHUSTER: So this forum is not a  
10 Q&A, Leslie, is what I'm understanding.

11 DR. HOFFMANN: No.

12 DR. SCHUSTER: This is an opportunity  
13 only for input or comment from people that  
14 are in attendance.

15 DR. HOFFMANN: That is correct.

16 DR. SCHUSTER: Okay.

17 DR. HOFFMANN: It's for us to gather  
18 all comments today, and as you are aware,  
19 whatever method we receive those public  
20 comments, we go back and compile them into  
21 generalized topics, and then we answer those  
22 and will post those back on our website.  
23 And then those are required to go with our  
24 application to CMS on June the 25th. That's  
25 our proposed deadline.

1 DR. SCHUSTER: So if someone were to  
2 have a question that they just simply didn't  
3 understand some part of this, is there any  
4 way they can get that answered?

5 DR. HOFFMANN: If it's public comment  
6 right now, staff know to go ahead and answer  
7 -- I'm sorry. If it is public knowledge  
8 right now or in the bill, we can answer  
9 those questions, but anything in the  
10 application, we will not be able to answer  
11 today. And it's mostly it's for consistency  
12 to ensure that everybody gets one consistent  
13 answer for their questions, if that makes  
14 sense.

15 DR. SCHUSTER: Okay.

16 DR. HOFFMANN: And Dr. Schuster, can  
17 you see my PowerPoint?

18 DR. SCHUSTER: Yes, I can.

19 DR. HOFFMANN: Oh, good. Okay.

20 DR. SCHUSTER: The slides are showing  
21 on the side.

22 DR. HOFFMANN: I usually keep --

23 DR. SCHUSTER: You may want to put it  
24 in slideshow.

25 DR. HOFFMANN: I usually keep those,

1 if that's okay.

2 DR. SCHUSTER: Oh, okay. Yeah,  
3 that's fine.

4 DR. HOFFMANN: Is it big enough for  
5 everybody to see?

6 DR. SCHUSTER: Yes, we can see it.

7 DR. HOFFMANN: I usually keep those  
8 in case my bad eyes need to go back and  
9 reference a page, so I'm so sorry.

10 So today is the Kentucky Community  
11 Engagement Section 1115 Demonstration  
12 Program Public Forum for May the 22nd, 10 to  
13 11. I will be going over the introduction,  
14 the objectives, the overview of the proposed  
15 community engagement program, the public  
16 notice, and the comment process today.

17 And again, you can make your chats  
18 now -- your comments in the chats from now  
19 until the end of the meeting. And  
20 Dr. Schuster, we're going to allow those  
21 comments as long as they're marked "CE  
22 Public Comment" all through the MAC meeting,  
23 if that's okay, even after I finish.

24 DR. SCHUSTER: That's fine.

25 DR. HOFFMANN: So the introduction is

1 to comply with Kentucky House Bill 695, the  
2 Cabinet for Health and Family Services,  
3 CHFS, is requesting federal approval to  
4 implement our community engagement program.  
5 To request federal approval, CHFS is  
6 submitting a Section 1115 Demonstration  
7 proposal to the Center for Medicare and  
8 Medicaid Services, that's our authority, or  
9 CMS. The CHFS Department for Medicaid  
10 Services, DMS, that's us, will be  
11 implementing the Community Engagement  
12 Program tentatively 24 months after  
13 receiving federal approval.

14 What are our objectives today? To  
15 inform you, the public, of the new Section  
16 1115 Demonstration proposal to implement the  
17 Community Engagement Program; to provide you  
18 information about the public comment process  
19 prior to submission to CMS of the official  
20 demonstration proposal in accordance with 42  
21 CFR 431.08.

22 So let's just start out with  
23 something basic. What is the Section 1115  
24 Demonstration? An 1115 Demonstration is to  
25 test a project. It's to think outside the

1 box. It helps us to support the goals of  
2 the Medicaid program. The aim is to give  
3 states more freedom or flexibility to create  
4 and improve healthcare programs. An 1115  
5 Demonstration project allows states to try  
6 new ways to improve healthcare beyond  
7 routine medical care. These new methods  
8 focus on proven ways to make people  
9 healthier and to improve lives. The  
10 Demonstration must also be what we call  
11 "budget neutral" for the federal government  
12 to approve and to continue to approve over a  
13 five-year period of time. This means that  
14 the government will not spend more on  
15 Medicaid during the Demonstration with or  
16 without the Section 1115 Demonstration. The  
17 cost of services must be same or less than  
18 the cost of services that we are currently  
19 providing today.

20 And what is Community Engagement  
21 Program? So in 2025, as I mentioned before,  
22 Kentucky passed House Bill 695. The law  
23 instructs the Cabinet for Health and Family  
24 Services, CHFS, to start a Community  
25 Engagement Program. With this new program,

1 CHFS will automatically refer certain  
2 Medicaid individuals to the Department of  
3 Workforce Development, DWD, for job support  
4 and coaching. The DWD will reach out to  
5 these members to provide helpful information  
6 about job help.

7 Which Medicaid members are impacted?  
8 The Community Engagement Program will apply  
9 to individuals in the Medicaid expansion  
10 eligibility group who have been enrolled in  
11 Medicaid for more than 12 months, are  
12 between the ages of 19 and 60 years of age,  
13 are physically and mentally able to work as  
14 defined by our cabinet, are not caregivers  
15 of a dependent child under age 18 or a  
16 dependent disabled adult relative.

17 So you may ask, are there exemptions  
18 to this program? And we have several listed  
19 here on the screen above. CHFS will exempt  
20 Medicaid expansion eligibility group members  
21 who meet at least one of the following  
22 conditions from the automatic referral to  
23 DWD, the Department of Workforce  
24 Development. These are individuals that are  
25 under 19 or are over age 60 years of age.

1           These are individuals responsible for the  
2           care of a dependent child under the age of  
3           18, or a dependent disabled adult relative.  
4           These are individuals with a diagnosis of  
5           SUD, Substance Use Disorder, or Serious  
6           Mental Illness, SMI; a chronic disease as  
7           determined by CHFS; an acute medical  
8           condition, physical or behavioral, that  
9           would prevent them from complying with the  
10          requirements; individuals with -- whose  
11          eligibility have been deemed based on  
12          disability, or who have been deemed disabled  
13          by SSA, the Social Security Administration;  
14          individuals with verified earned income;  
15          individuals receiving unemployment insurance  
16          income benefits; pregnant women; individuals  
17          who are homeless or who are recently  
18          homeless for up to six months post housing;  
19          individuals who are victims of domestic  
20          violence; individuals who have recently been  
21          directly impacted by a catastrophic event,  
22          such as a natural disaster; or a death of a  
23          family member living in the same household;  
24          individuals already participating in a  
25          workforce participation program that CHFS

1 has determined to meet the objective of the  
2 Community Engagement Waiver Program. I  
3 mentioned the other day, many of these  
4 individuals will already be cross referenced  
5 and are meeting that requirement through  
6 SNAP. Former foster youth up to age 26;  
7 other good cause exceptions as approved by  
8 CHFS.

9 So if you're asking how we will know  
10 some of these things, just to let you know,  
11 processes will have to be developed. There  
12 will be an implementation plan that will  
13 become -- that will come later with the  
14 1115, and we will have to work a process in  
15 that will allow for some self-attestation.

16 Okay. How will members find out  
17 about this program? CHFS will send letters  
18 to members about workforce development and  
19 their services. Letters will also include  
20 information about how to request those  
21 exemptions that I just spoke about.

22 So let's talk about how members will  
23 find out again. New members, new applicants  
24 can choose to be referred to workforce  
25 development when they apply for Medicaid.

1           If not, CHFS will send letters to the new  
2           members when they enroll, once after six  
3           months, and again after 12 months. Current  
4           members, CHFS will send letters to current  
5           members who qualify, giving them a 30-day  
6           notice that they will be contacted by the  
7           Department of Workforce Development unless  
8           they are exempted. Managed Care Program  
9           enrollees, CHFS may also engage MCOs to tell  
10          members about the program. CHFS will also  
11          remind members about DWD resources during  
12          their eligibility checks and encourage them  
13          to use these resources.

14                 So what are the goals for Kentucky's  
15          Community Engagement Program? Through this  
16          program, CHFS aims to help people in  
17          Kentucky by offering referrals and supports.  
18          The support will help individuals out of  
19          poverty by finding jobs through skilled  
20          training and job assistance programs. The  
21          goals of the program are really to expand  
22          efforts to help people achieve economic  
23          stability by connecting them with  
24          educational and job assistance programs;  
25          identifying individuals who qualify for

1 exemptions and may also need a higher level  
2 of care, and then we will connect them to  
3 those necessary supports as well.

4 Okay. So public notice and comment  
5 process. To comply with the federal  
6 regulations, CHFS will follow guidelines and  
7 procedures for collecting, reviewing, and  
8 responding to all public comments no matter  
9 what avenue that we received those. A draft  
10 of the Demonstration application and public  
11 notice are available and can be viewed at  
12 this link. And I feel like it's beneficial  
13 for me to show you the link, so I'm going to  
14 drag that over so you can just see it real  
15 quick. And I checked, it is working. So if  
16 you go to the link that I just had posted,  
17 you're going to see at the very top "Section  
18 1115 Demonstration Waivers." We have other  
19 authorities here in Kentucky, but what  
20 you're looking for is the first one at the  
21 top "Section 1115 Demonstration, Community  
22 Engagement." What you're going to see is  
23 that the status is ongoing. You'll see a  
24 short synopsis of what we are aiming  
25 towards, and then you will see these quick

1 links here -- I checked those to make sure  
2 that they're okay -- these quick links here  
3 to go to what item you need.

4 So the full public comment notice is  
5 here, and it will tell you the processes  
6 that you can also include through this  
7 avenue your public notice. And I'm going to  
8 go over those as well. I embedded those  
9 into our link. So you can also receive  
10 comments or inquiries -- we can receive  
11 comments or inquiries that can be submitted  
12 via email received on or before June the  
13 12th to Ky1115commengagement@mslc.com, and  
14 please include the "1115 Community  
15 Engagement Comments" in your title. You  
16 also have another option. You can write  
17 your comments and send them by the U.S.  
18 postal mail by June the 12th. If we receive  
19 them a little bit later, as long as they're  
20 postmarked by the 12th, it's still okay. So  
21 Kentucky Medicaid Section 1115 Comment, care  
22 of the DMS Commissioner's Office at 275 East  
23 Main Street, 6W-A Frankfort, Kentucky,  
24 40621.

25 Again, just a reminder, if you

1           didn't -- are not making your comment today  
2           publicly, or that you did not put it in the  
3           chat option for this forum, you do have  
4           another option. Tomorrow is public forum  
5           Number 2. It is in-person only. It is from  
6           10 to 11, the same time as today. It will  
7           be in person at the Kentucky Transportation  
8           Cabinet at 200 Mero Street, Frankfort,  
9           Kentucky, 40622, and it will be in the  
10          Auditorium C105. If you go into the  
11          building, there is a desk there that you can  
12          ask questions if you need to.

13                 So I've thanked the MAC Committee,  
14                 and I've thanked Dr. Schuster for allowing  
15                 us to do this today. But I also want to  
16                 thank you, all Kentuckians, for your  
17                 participation. So at this time,  
18                 participants can raise their hand, come off  
19                 mute, and make your comments. Again, to be  
20                 respectful of all attendees, keep your  
21                 comments to a couple of minutes if you can.  
22                 If you decide, again, not today to make your  
23                 comment publicly or in the chat, you also  
24                 have the public forum tomorrow, Number 2,  
25                 but you can also still go to the public

1 notice link and use the email ability,  
2 and/or to use the U.S. Postal Service.

3 So I will give just a short time  
4 for -- until we get the hands lowered,  
5 Dr. Schuster, since this presentation took,  
6 you know, less than the hour, but we will  
7 take all chats till the end of the MAC  
8 meeting today.

9 DR. SCHUSTER: Thank you. Garth, you  
10 had a question or wanted to make a comment.

11 DR. BOBROWSKI: Yeah, just a  
12 question. What is the total number of  
13 enrollees that the state currently shows as  
14 employed? And you don't have to give me an  
15 answer today, but if you could just -- I  
16 wanted to get that in the comment section,  
17 and you can email me or text me or whatever.  
18 I know some of that data you gotta research  
19 and look it up, but --

20 DR. HOFFMANN: Yeah. We will take  
21 that comment back, and put it --

22 DR. BOBROWSKI: Thank you.

23 DR. HOFFMANN: -- into the Q&A and  
24 answer that for you.

25 DR. SCHUSTER: Kent, you have your

1 hand up.

2 MR. GILBERT: Yes, ma'am. You know,  
3 a quick review of the current data in states  
4 that have implemented or tried to implement  
5 these kinds of requirements does not seem to  
6 show that there's been any positive effect  
7 on workforce increases, nor has there been  
8 actually any health benefit. And in fact,  
9 the data are pretty clear that this shows  
10 very negative public health impact. It  
11 reduces -- it puts up barriers. It's very  
12 costly to the state. I wonder if -- has the  
13 state done any estimates of what it's going  
14 to cost to monitor all of this?

15 DR. HOFFMANN: And of course, we have  
16 worked on some of those items that you have  
17 mentioned. Again, we will take that back  
18 and answer it in the public comment.

19 MR. GILBERT: Yeah, I appreciate  
20 that.

21 DR. HOFFMANN: Absolutely.

22 MR. GILBERT: Yeah. And, yeah, I  
23 think that the -- I mean, in a cost-benefit  
24 analysis here, this -- the numbers so far  
25 that I'm seeing don't add up for this

1           waiver. Now, I realize that you're required  
2           to file it by the state legislature, but as  
3           far as the public comment that's going to go  
4           up the chain, this just doesn't seem to  
5           actually meet the goals. If we want to get  
6           people back to work, if we want to keep  
7           people healthy, they've got to be healthy to  
8           go to work, and these kinds of referral  
9           programs just don't seem to be supported by  
10          the data.

11                 But, I mean, I'd like to see more  
12          data. I'd like to also see that the cost of  
13          these is not going to be -- I mean, it seems  
14          stupid to spend 30, 40 million dollars  
15          tracking whether people are getting care as  
16          opposed to spending 30, 40 million dollars  
17          giving people care. Thank you.

18                 DR. SCHUSTER: Thank you, Kent.

19                 DR. HOFFMANN: Thank you.

20                 DR. SCHUSTER: Jeremy, and I don't  
21          know how to pronounce your last name,  
22          Scrimager?

23                 MR. SCRIMAGER: There you go, you  
24          nailed it. Thank you very much.

25                 DR. SCHUSTER: Ah, great.

1                   MR. SCRIMAGER: I'm cooking lunch at  
2                   the office.

3                   So I'm a little lower down the totem  
4                   pole. My area of specialty is supporting  
5                   employment for folks who are already  
6                   receiving services. So my question is more  
7                   just a mechanical one. Obviously, the  
8                   Office of Vocational Rehabilitation falls  
9                   under DWD's purview. OVR is broke. They're  
10                  on an order of selection for the foreseeable  
11                  future, and I don't think anybody really  
12                  knows how long that's going to last. So  
13                  what mechanisms exactly are going to be able  
14                  to handle the influx of people requiring  
15                  vocational rehabilitation services? Thank  
16                  you.

17                 DR. HOFFMANN: Thank you, Jeremy.

18                 DR. SCHUSTER: Any other -- Beth  
19                 Partin had a question, just want to draw  
20                 your attention to it. Will DMS list the  
21                 chronic diseases or disabilities online that  
22                 satisfy the exemption?

23                 DR. HOFFMANN: And Dr. Schuster, I  
24                 think we can give a list of expectations of  
25                 those chronic conditions because we do

1 already capture many of those, especially  
2 through some adult and children reporting  
3 that we do. But the process will actually  
4 be more complete as we go through the  
5 implementation process. And then, of  
6 course, there is the other -- there is a  
7 catchall in here for any good cause  
8 exemption as approved by the cabinet.

9 DR. SCHUSTER: Thank you. Eric  
10 Wright, you have your hand up.

11 DR. WRIGHT: Dr. Hoffmann, do you all  
12 utilize the compassionate allowance list  
13 that's put out by the Social Security  
14 Administration as a factor when it looks at  
15 those types of qualifying exemptions? Have  
16 you considered that as an option?

17 DR. HOFFMANN: Dr. Wright, I'm going  
18 to take that one back, if that's okay.

19 DR. SCHUSTER: Eric, can you say  
20 again what you're referring to?

21 DR. WRIGHT: Yeah, under the Social  
22 Security Administration, there is a  
23 compassionate allowance list, what's often  
24 used when making determinations for  
25 consideration for SSI benefits. And so I

1           was asking if they are considering utilizing  
2           that list. It seems like it's a pretty  
3           well-vetted list that's been out for a  
4           considerable amount of time. Didn't know if  
5           that was a consideration when they were  
6           looking at those conditions which may  
7           request -- or need an exemption.

8           DR. SCHUSTER: Okay. Thank you very  
9           much for that. That's a new one for me.

10           I would comment, Dr. Hoffmann, that  
11           at least for people with behavioral health  
12           issues, you mentioned SMI and SUD, when this  
13           was tried in the -- or when a work  
14           requirement was tried in the Bevin  
15           administration, the process for designating  
16           those folks was complicated and onerous at  
17           best. And it was never clear to me whether  
18           the self-attestation was really being made  
19           by somebody who might not be capable of  
20           actually making a self-attestation and what  
21           accommodations would be made for that. And  
22           is there a role, either required or  
23           allowable, for a provider of services who  
24           knows that person well to be a part of the  
25           exemption process?

1 I will say, as a psychologist, that  
2 all of this is going to increase the anxiety  
3 level of all your Medicaid members because a  
4 lot of Medicaid members are not going to  
5 know whether they're in the expansion  
6 population or not to begin with. And so  
7 every time they hear about some other  
8 requirement -- and we just got through with  
9 unwinding, and we know that despite the  
10 heroic efforts of DMS and kynectors and  
11 everybody else to get people through that  
12 process, we lost a lot of people. So I'm  
13 not asking you to provide mental health care  
14 to all, although we should be providing  
15 mental health care to all Medicaid members,  
16 but just to be aware in your communications  
17 that people are highly anxious, and when  
18 people are highly anxious, they don't take  
19 in information very well. So a single  
20 letter may not be sufficient. Thank you.

21 DR. HOFFMANN: Dr. Schuster, I  
22 appreciate that comment.

23 Dawna or Dr. Schuster, do you see any  
24 more hands?

25 DR. SCHUSTER: I don't. Do you see

1 any more hands up, Dawna?

2 MS. CLARK: I do not see any more  
3 hands.

4 DR. SCHUSTER: Okay.

5 DR. PATEL: Hey, I have --

6 MS. ROARK: This is Peggy Roark --

7 DR. PATEL: -- I couldn't get my hand  
8 up.

9 DR. SCHUSTER: Oh, okay.

10 DR. PATEL: I apologize. My  
11 computer's not working or I'm not navigating  
12 it well. This is Chirag Patel, WellCare  
13 CMO. In this new format, when we have this  
14 public commentary, do we ask state  
15 legislature to come and listen to commentary  
16 from the public?

17 DR. HOFFMANN: They will have the  
18 comment from the public included into -- we  
19 compile all of them together in a Q&A  
20 session and document, and then it will go on  
21 the website, as well as it is required to  
22 send to CMS when we submit it as well. Does  
23 that answer your question?

24 DR. PATEL: Yes, ma'am. Thank you.

25 DR. SCHUSTER: Anyone else who's

1           having trouble raising their hand, which is  
2           sometimes tricky on chat and so forth, you  
3           can unmute and simply ask the question as  
4           Dr. Patel did. We don't want to miss  
5           anybody.

6           DR. HOFFMANN: So just as a reminder  
7           to everybody, we're going to allow comments  
8           to keep continuing through the chat function  
9           through the MAC meeting. Dr. Schuster does  
10          have a packed agenda, so one more time, if  
11          anybody wants to raise their hand. And if  
12          not, I'm going to turn it back over to  
13          Dr. Schuster to continue her MAC meeting.

14          Thank you so much for having us today  
15          and thank you for listening to the forum.  
16          We do want to hear from you. We want to  
17          hear from Kentuckians and have you to voice  
18          your opinions. So if you did not give your  
19          information today, please use one of the  
20          other functions, or meet us in person  
21          tomorrow. And again, just thank you.

22          DR. SCHUSTER: Thank you,  
23          Dr. Hoffmann. Is your PowerPoint posted as  
24          well?

25          DR. HOFFMANN: I will send this

1           PowerPoint to Dawna in just a few minutes so  
2           that we can get it out to the MAC.

3           DR. SCHUSTER: Okay. So it will be  
4           posted with the MAC meeting information. Do  
5           you --

6           DR. HOFFMANN: Yes.

7           DR. SCHUSTER: Can you also make it  
8           available if people go to the link?

9           DR. HOFFMANN: If you go to the link,  
10          what you're going to get is the application,  
11          and then a brief summary, and then a larger  
12          summary I believe is the two things. But I  
13          can make it available if somebody else needs  
14          me to send it to them. Do you want me to  
15          post it online for the MAC?

16          DR. SCHUSTER: Yeah.

17          DR. HOFFMANN: It will be under the  
18          MAC, right?

19          DR. SCHUSTER: Yeah, to the MAC. But  
20          I guess my question, Leslie, is can you  
21          attach your PowerPoint so when people go to  
22          that link that's one of the things they can  
23          access? I have said that only because  
24          sometimes it's easier for people to read the  
25          simple language that you provided as opposed

1 to the --

2 DR. HOFFMANN: Correct. I'll -- let  
3 me get through the PowerPoint tomorrow in  
4 the -- with the in-person, and then we'll  
5 get that posted; is that okay? I'll try to  
6 get that done.

7 DR. SCHUSTER: Yeah. Yeah. Did I  
8 see somebody that said they were having  
9 trouble getting on the Zoom? I thought I  
10 saw, but I don't see it in the -- there is  
11 another public comment in the chat right  
12 now. So all right. Well, thank you very  
13 much, Dr. Hoffmann, and --

14 DR. HOFFMANN: Thank you.

15 DR. SCHUSTER: -- this is an ongoing  
16 process, so for anyone who is remaining on  
17 for the remainder of the MAC meeting, please  
18 continue to put your comments in the chat.  
19 And also, let me encourage you to mail them  
20 or email them. And the deadline is  
21 June 12th; is that correct, Leslie? Do I  
22 remember that?

23 DR. HOFFMANN: That is correct. So  
24 if you send a letter, like to the U.S.  
25 postal, make sure it's postmarked by the

1 12th. And you can send an email, or you can  
2 come tomorrow, or you can still do the chat  
3 function today all the way to the end of the  
4 MAC.

5 DR. SCHUSTER: All right. And  
6 there's a good comment from Ashley Shoemaker  
7 about, again, that attestation and the role  
8 of the providers because I do think it's an  
9 important point. Providers' time would be  
10 better spent actually treating patients  
11 instead of filling out paperwork. We all  
12 are for that. Thank you very much.

13 And let's go on. I think,  
14 Commissioner Lee, we're back with you  
15 restarting of prior authorizations for  
16 Medicaid behavioral health services. And we  
17 had quite an active discussion about this at  
18 the BH TAC meeting last week.

19 COMM. LEE: I think maybe Angie  
20 Parker is on here. She may be able to  
21 provide an update and give some -- give an  
22 update. Angie, are you on?

23 MS. JUDY-CECIL: I'm not sure she's  
24 on, Commissioner, but I'm prepared to talk  
25 about this.

1                   COMM. LEE:   Okay.   All right.

2                   DR. SCHUSTER:   Great.   Thank you,  
3                   Veronica.

4                   MS. JUDY-CECIL:   I have slides.

5                   DR. SCHUSTER:   Good.   We want  
6                   clarification.   There's a lot of angst out  
7                   there.   It seems to be my job as a  
8                   psychologist to point out how much angst is  
9                   out and about.

10                  MS. JUDY-CECIL:   Well, I -- so I  
11                  don't know if I'll be able to relieve angst  
12                  but certainly have some information to  
13                  share.   Just for folks that might not have  
14                  been part of the Behavioral Health TAC or  
15                  other discussions that we have had -- we  
16                  also talked about this on our monthly  
17                  virtual forum.   House Bill 695, we're  
18                  talking a lot about that today and the  
19                  requirements that have come out of that  
20                  legislation.   One of those included  
21                  requiring the department to restart  
22                  behavioral health prior authorizations.

23                  So we -- to be in compliance with  
24                  that because we had to do it within 90 days,  
25                  which is June 25th, we did send out a

1 provider letter, an April 8th, 2025,  
2 provider letter that is on our website.  
3 That letter was notifying providers of that  
4 requirement, and that the Managed Care  
5 Organizations will be sending out  
6 information individually about the restart  
7 for their prior authorizations. That letter  
8 rescinded two previous letters that we had  
9 sent out about and related to behavioral  
10 health prior authorizations. One, we had  
11 tried to work together. There was a  
12 workgroup with Managed Care Organizations,  
13 DMS, Secretary Friedlander was part of it,  
14 and we had providers represented. We tried  
15 to work on beginning the resumption of prior  
16 authorizations, but unfortunately, we've had  
17 to rescind that letter. We also rescinded  
18 the service limits and prior authorizations  
19 that were part of a November 8th, 2024,  
20 provider letter that related specifically to  
21 psychoeducation and peer support services,  
22 so that has been rescinded as well.

23 I do want to make sure folks  
24 understand that in that letter, there was  
25 additional information, and that included

1 rates, service descriptions, who can bill  
2 and provide the service, all of that remains  
3 in effect. We were just rescinding the  
4 service limits on prior authorizations.

5 So the MCOs are required to provide  
6 at least a 30-day notice. Our  
7 understanding, I believe at this point, all  
8 MCOs have sent out a notice if they are --  
9 about their prior authorization restart  
10 specifically. We also are requiring the  
11 Managed Care Organizations to provide  
12 training, definitely online, also in person,  
13 prior to the restart and after, and also to  
14 provide one-on-one support because we all  
15 recognize that there are providers new to  
16 the Medicaid program and have enrolled after  
17 the prior authorizations were put on hold,  
18 and that they've not had to navigate that  
19 before. So they're going to have to learn  
20 the process, and make sure that they are  
21 able to access that process.

22 So we have also asked the MCOs to be  
23 accommodating for this change, to give  
24 additional time, to be more proactive in  
25 that one-on-one helping providers navigate,

1           and so we're going to be monitoring this  
2           very closely. We are setting up a process  
3           to monitor them to make sure that folks are  
4           being able to still access services, because  
5           I think that's the primary concern of  
6           everyone is that during the public health  
7           emergency and up until now, behavioral  
8           health services were pretty liberally  
9           accessed. And we don't want to see an  
10          unnecessary or burdensome process to  
11          continue access to those services. So we  
12          will be monitoring it.

13                 Here's the contact information for  
14          each of the MCOs. We are -- we have  
15          collected all of the MCOs' information,  
16          their links to their website, what they're  
17          going to prior authorize. We have -- we're  
18          working on trying to find a way to post that  
19          so that it's easy for providers as a  
20          one-stop shop as we move forward with the  
21          resumption and as it comes closer, so very  
22          soon -- we've been working on it these past  
23          couple of days, and hopefully, very soon  
24          we'll be able to launch that.

25                 We encourage folks -- so we'll send

1 out something to our distribution list to --  
2 so if you're not signed up through  
3 GovDelivery, we'll post that. I recommend  
4 to sign up for emails through GovDelivery.  
5 We don't waste people's time with  
6 unnecessary emails. We really try to only  
7 send emails through that distribution list  
8 that really are important updates to the  
9 program. So I do encourage you, if you want  
10 to make sure that you're receiving those  
11 updates, including that we posted the  
12 information online for the behavioral health  
13 prior authorizations, to get signed up  
14 through GovDelivery.

15 So I'm happy to take any questions.

16 DR. SCHUSTER: Yeah. Let me start  
17 with the one that caused a great deal of  
18 discussion and angst in the BH TAC meeting,  
19 and that was about the billing for targeted  
20 case management. As you are probably aware,  
21 Veronica --

22 MS. JUDY-CECIL: Yes.

23 DR. SCHUSTER: -- a reg that has to  
24 be billed as a monthly service and a start  
25 date of June 25th does not get us to the end

1 of the month.

2 MS. JUDY-CECIL: Right.

3 DR. SCHUSTER: One of the MCOs made  
4 it very clear that even though the billing  
5 really should have been without prior-auth  
6 until June 24th, and then anything -- or up  
7 to the 25th, and anything after that  
8 would've been under prior-auth, that they're  
9 going to treat the entire month's billing as  
10 a retroactive review. And, you know, that  
11 felt -- well, it felt lots of things. I  
12 won't get into it.

13 MS. JUDY-CECIL: Sure.

14 DR. SCHUSTER: But it caused a lot of  
15 angst because there is no other way to bill  
16 that service.

17 MS. JUDY-CECIL: Right.

18 DR. SCHUSTER: So --

19 MS. JUDY-CECIL: We did take that  
20 back. I don't know if somebody from the  
21 behavioral team's on. We took that concern  
22 back, we have inquired, I believe, with the  
23 Managed Care Organizations. I agree that,  
24 you know, they probably for anything that's  
25 within that month, they should -- this is an

1 area where we have said the MCOs really  
2 should be very lenient, you know, working  
3 with the providers on -- because it's going  
4 to be wonky as we restart, especially for  
5 several providers, and as you mentioned, for  
6 services that are a month pure.

7 I see, Leena, you have your hand up.

8 MS. TRAINER: Hi, yes, thank you.

9 Leenna Trainer with the Division of Quality  
10 and Population Health. Just wanted to add  
11 to the discussions that my team is currently  
12 reviewing the Kentucky universal PA form.  
13 We are working with the MCOs to get their  
14 updated information, assess what methods of  
15 submission are available to providers, and  
16 we're looking to hopefully publish that  
17 within the next couple of weeks.

18 MS. JUDY-CECIL: Thank you, Leenna.

19 Do you -- is there anybody else on the DMS  
20 team that has an update on the targeted case  
21 management question specifically? And if  
22 not, we will follow up with you,  
23 Dr. Schuster, and with providers.

24 DR. SCHUSTER: I would appreciate  
25 that. And it's also the ACT teams as Steve

1 points out.

2 MS. JUDY-CECIL: Yes.

3 DR. SCHUSTER: So yeah, we really  
4 need some response from Medicaid for that  
5 because we're caught between a rock and a  
6 hard place obviously. We can't --

7 MS. JUDY-CECIL: Right.

8 DR. SCHUSTER: -- the reg says you  
9 have to bill at the end of the month, and,  
10 you know, I understand that the timeline set  
11 in 695 is not movable either, but some  
12 compassion, leniency --

13 MS. JUDY-CECIL: Yes.

14 DR. SCHUSTER: -- whatever you want  
15 to call it on the part of MCOs particularly  
16 because we know how important both targeted  
17 case management and the ACT services are.  
18 You know, ACT in particular is being  
19 delivered with our, you know, most -- some  
20 of our sickest members, the ones that are in  
21 need of immediate care, and that's true also  
22 of targeted case management. So I  
23 appreciate that.

24 Nina has a question.

25 MS. EISNER: Yes, thank you. Did I

1 just understand that there's going to be a  
2 universal prior-auth form required of all  
3 the MCOs to use?

4 MS. JUDY-CECIL: We had already  
5 created one many years ago, and the only  
6 problem with it is it is a written form. So  
7 the only way to submit it is to fill it out  
8 and to usually fax it.

9 MS. EISNER: Right.

10 MS. JUDY-CECIL: So I don't know how  
11 useful it is in this day and age of trying  
12 to go to electronic PA, but we've had one  
13 out there for a long time. We are updating  
14 it because it needed updating, and  
15 certainly, the MCOs are required to use it.  
16 So if an MCO says "we can't accept this,"  
17 let us know --

18 MS. EISNER: Yeah.

19 MS. JUDY-CECIL: -- because it's in  
20 their contract they're required to use this  
21 universal PA.

22 MS. EISNER: That's great news.

23 MS. JUDY-CECIL: So definitely relay  
24 that to us. I think what we did --

25 MS. EISNER: Good, thank you.

1 MS. JUDY-CECIL: -- take back and  
2 want to do is -- and heard loud and clear --  
3 trying to create some consistency in the  
4 process for prior authorizations across the  
5 MCOs. And so how do we take that written PA  
6 form, and work with the MCOs on what they  
7 could do to their systems to duplicate it, I  
8 think is a legitimate question and something  
9 that we're taking back. It's not going to  
10 happen by June 25th, but certainly, it's  
11 something that we're going to work on.

12 The other thing we're working on is,  
13 you know, talking with the MCOs about the  
14 consistency across them on what is prior  
15 authorized. So that's something we're going  
16 to continue to work on. Not something we  
17 can mandate at this time but that we're  
18 going to do our best to try to bring some  
19 consensus to, you know, these are codes or  
20 services that everyone agrees needs to be  
21 prior authorized or doesn't need to be prior  
22 authorized. So we're going to continue to  
23 work on that.

24 MS. EISNER: That's terrific. Thank  
25 you so much.

1 MS. JUDY-CECIL: You're welcome.

2 DR. SCHUSTER: How does one see the  
3 form or find the form that's out there right  
4 now?

5 MS. JUDY-CECIL: We can send the link  
6 to it.

7 DR. SCHUSTER: Okay, thank you.

8 MS. CLARK: Yeah, so I'm going to  
9 post the GovDelivery -- how to sign up for  
10 GovDelivery, the email distribution list,  
11 and then we'll send a link to the current PA  
12 form.

13 MS. PARTIN: Sheila, I have a  
14 question, and I can't figure out how to  
15 raise my hand.

16 DR. SCHUSTER: We're happy to hear  
17 from you, Beth.

18 MS. PARTIN: Are these -- and maybe,  
19 Veronica, you were answering this kind of,  
20 but preauthorization, is this for  
21 medications, or for visits, or referrals, or  
22 procedures? What is it that we have to  
23 preauthorize?

24 MS. JUDY-CECIL: It's behavioral  
25 health services. So it's behavioral health

1 services, not all behavioral services, but  
2 we're required to resume behavioral health  
3 prior authorizations. And so this doesn't  
4 change what's required for medication  
5 through Med Impact. That's not changing,  
6 but just as -- it's primarily services.

7 MS. PARTIN: So if I want to refer  
8 somebody for behavioral health, do I have to  
9 get that pre-authorized?

10 MS. JUDY-CECIL: I can't answer that  
11 question. I think we'll have to check with  
12 the MCOs on that.

13 MS. PARTIN: Okay. That would be  
14 really helpful to know.

15 MS. JUDY-CECIL: Okay.

16 DR. SCHUSTER: So you're talking,  
17 Beth, about somebody that you're seeing in  
18 your office, and you're not, strictly  
19 speaking, a behavioral health provider,  
20 you're a family nurse practitioner, but you  
21 want to make a referral.

22 MS. PARTIN: Yeah. Do I have to have  
23 that pre-authorized?

24 MS. JUDY-CECIL: That's up to the  
25 Managed Care Organization's procedures.

1 DR. SCHUSTER: Boy, I would be really  
2 concerned -- let me just weigh in here --

3 MS. JUDY-CECIL: Yeah.

4 DR. SCHUSTER: -- if referrals to  
5 behavioral health have to be pre-authorized.  
6 The most important thing about somebody in a  
7 behavioral health situation is that they get  
8 care as soon as possible. So we already  
9 know that it's difficult, as I'm sure Beth  
10 can -- particularly in a rural area where  
11 Beth practices to find behavioral health  
12 care readily available. But if there's an  
13 additional delay because she has to get a  
14 prior-auth to even make the referral, that's  
15 going to be a real problem.

16 MS. JUDY-CECIL: I've never heard a  
17 prior-auth needed for a referral. It's  
18 usually for the actual service delivery --

19 DR. SCHUSTER: Yeah.

20 MS. JUDY-CECIL: -- and not a  
21 referral, but we'll get -- we'll take that  
22 back to clarify.

23 MS. PARTIN: Okay. There have  
24 been -- I can't speak specifically right  
25 now, I can't pull it out of my memory, but I

1 know that there have been times, not  
2 necessarily that I remember behavioral  
3 health, but for other referrals that we've  
4 had to get a prior authorization. So I just  
5 want to make sure that we don't have to do  
6 that.

7 MS. JUDY-CECIL: Okay. Thank you for  
8 that.

9 DR. SCHUSTER: Yeah. And Michelle  
10 Sanborn puts in the chat something that was  
11 talked about at the BH TAC meeting,  
12 Veronica, just so you're aware of that, and  
13 that is, you know, we know the effective  
14 date of 695 was June -- is June 25th, but  
15 obviously, if the MCOs would start their  
16 prior-auth for targeted case management and  
17 ACT on July 1st, that solves the problem.  
18 That would seem, as she says, would make the  
19 most sense.

20 MS. JUDY-CECIL: And that -- yeah,  
21 that's what we took back, and we have -- my  
22 understanding, communicating with the MCOs  
23 on that.

24 DR. SCHUSTER: Okay. Any other  
25 questions?

1 (No response.)

2 DR. SCHUSTER: I make -- I had  
3 something, and I can't remember it now, but  
4 I may come back to it. You're going to be  
5 here for a little bit.

6 MS. JUDY-CECIL: Yeah, absolutely.

7 DR. SCHUSTER: Okay. Here's a mom of  
8 a 38-year-old with severe mental illness,  
9 does she need to contact his insurance  
10 company on these prior authorizations or his  
11 doctors?

12 COMM. LEE: So typically -- there's  
13 been a lot of chatter in the chat. I've  
14 been monitoring it. So typically, the  
15 individual -- the provider delivering the  
16 service has to get the prior authorization  
17 for the services being delivered because  
18 they're going to be the ones that bill. So  
19 they would need to make sure that they have  
20 that prior authorization on their claim  
21 form. So we have had another -- for  
22 example, Passport has written in here,  
23 "Certain behavioral health services will  
24 need a PA, and it goes to the rendering  
25 provider to obtain the PA," and that has

1           been typically the process is the person  
2           delivering the service.

3           The only exception that I would --  
4           could ever think to that would be certain  
5           medications. Sometimes it could either be  
6           the provider or the pharmacist getting a  
7           certain prior authorization for medications,  
8           but as far as services, it should be the  
9           rendering provider.

10          DR. SCHUSTER: So it's not the  
11          responsibility of the parent or guardian.  
12          It's really a -- it's a reimbursement issue  
13          more than anything.

14          COMM. LEE: Right. And in the event  
15          that a member gets a service denied, they do  
16          have an appeal process that they can go  
17          through to get that service delivered if  
18          they go through that process and it is  
19          determined that it was inappropriately  
20          denied. So there is an appeal process, but  
21          it is typically up to the rendering provider  
22          to deliver that or to obtain that prior  
23          authorization. The member should not have  
24          to call and get a prior authorization  
25          because they wouldn't have all of the

1 information that the utilization management  
2 agency, which authorizes that PA would need  
3 in order to get that prior authorization.

4 DR. SCHUSTER: Right. Right. I know  
5 what my --

6 MR. MARTIN: Hey, commissioner Lee?

7 DR. SCHUSTER: -- yes?

8 COMM. LEE: Yes?

9 MR. MARTIN: This is Barry. So  
10 really, it's going to pre-COVID operations  
11 once again, right?

12 COMM. LEE: Correct.

13 MR. MARTIN: So everybody should be  
14 pretty used to this process. Has anything  
15 changed as far as more restricting for PAs?

16 COMM. LEE: No, but I think during  
17 the COVID period, you know, we have had new  
18 providers come on who may have not had to go  
19 through that prior authorization process  
20 before, so therefore, the Managed Care  
21 Organizations are entering into -- I mean,  
22 they're completing training for that  
23 process. And it's been quite a while, and  
24 maybe some individuals are like me, if I  
25 haven't done something for a while, I forget

1           how to do that. So just need guidance on  
2           how to go through, but you're right, Barry,  
3           it is going back to pre-COVID processes.

4           MR. MARTIN: Okay.

5           DR. SCHUSTER: Well, and we have an  
6           MCO, United, that wasn't here pre-COVID, so  
7           they're new to this prior-auth.

8           I guess this is a good time for me to  
9           be reminded of the question I was going to  
10          ask. And that is I understand that some of  
11          the MCOs have communicated with DMS that  
12          they want to add new services to be  
13          prior-auth'd that they were not prior  
14          authorizing -- requiring prior-auths back  
15          pre-COVID, and that those are being  
16          approved; is that right?

17          COMM. LEE: I would have to follow up  
18          on that and double check to see.

19          DR. SCHUSTER: Okay. I believe that  
20          Angie told us at the BH TAC meeting that  
21          they were being allowed to add new services,  
22          which to me is very different than what's in  
23          the bill. I just -- just saying the bill  
24          very clearly says, you know, back to  
25          January 1st of 2020. And obviously, for

1 United, that has to be different, but --

2 MR. MARTIN: I got a feeling that  
3 relates back to BH and SUD I would imagine.

4 COMM. LEE: And there -- you know,  
5 there could be certain services that have  
6 been added. You know, procedure codes are  
7 added and removed, you know, quite  
8 frequently, and if there are new codes that  
9 have been added since COVID-19, you know,  
10 those could be subject to prior  
11 authorization. And as far as prior, when we  
12 look at prior to COVID, the MCOs had  
13 authority over their managed-care -- or over  
14 their prior authorization process. So we  
15 just need to keep these conversations going  
16 and make sure that we're doing everything we  
17 can to ensure compliance, number one, with  
18 House Bill 695, and that we're not putting  
19 up any undue barriers for our children.

20 And I see Krista has her hand up, and  
21 I think she's probably going to talk a  
22 little bit about their PA process.

23 MS. HENSEL: Yeah. I just wanted to  
24 -- Sheila, I appreciate that you recognize  
25 United wasn't in the market at the time the

1 regulation was referring to.

2 So we've worked with DMS. Obviously,  
3 we do business across multiple markets  
4 across the country, and so we leverage care  
5 coordination lists or prior-auth lists and  
6 use our standard across the country.

7 A couple of Kentucky nuances,  
8 Commissioner Lee, as you highlighted there,  
9 and, Barry, you referenced. There are some  
10 codes that are covered in Kentucky that  
11 aren't covered in other markets, and so that  
12 is an area where there might be variance or  
13 difference, but we've worked closely with  
14 the department in getting that list  
15 approved.

16 DR. SCHUSTER: And are all of those  
17 lists now approved? Do you know,  
18 Commissioner Lee?

19 COMM. LEE: If the new -- any new  
20 services have been approved?

21 DR. SCHUSTER: Yeah, just generally.  
22 I think --

23 MS. HENSEL: So that's the prior-auth  
24 lists --

25 DR. SCHUSTER: Yeah, the prior-auth

1 lists. I think providers are still waiting  
2 to hear from the MCOs, and we had understood  
3 that they had those lists and communications  
4 had to be approved by DMS.

5 MS. HENSEL: Correct. And the  
6 department -- I would -- Dr. Schuster, I  
7 would just actually applaud the department.  
8 It has been remarkably fast as we've  
9 submitted the lists, and then now the  
10 communications for approvals. You know, we  
11 work both with the department on getting  
12 those approvals, and our internal teams and  
13 our legal teams also have to approve before  
14 things go out to our network providers.

15 DR. SCHUSTER: Right. Right.

16 MS. HENSEL: So I think we are on  
17 track to get those out. I'm going to say,  
18 United's should be going out next Tuesday  
19 was the last that I heard. So I'll be  
20 curious your feedback when that comes out,  
21 but we try to be clear and concise in those  
22 communications.

23 DR. SCHUSTER: Thank you. That was  
24 what I was talking about, Commissioner Lee,  
25 was the MCOs have been telling providers,

1 "We can't send anything out because it has  
2 to be approved by DMS." And at the BH TAC,  
3 Angie said that, you know, DMS was working  
4 very hard to get through those lists. So I  
5 guess I'm just looking at time frames again  
6 as we're getting closer to the end of May,  
7 just a month away. So --

8 MS. JUDY-CECIL: We had approved  
9 either same day or next day --

10 DR. SCHUSTER: Good.

11 MS. JUDY-CECIL: -- pretty much  
12 everyone. There was one or two that needed  
13 additional time to review, and honestly  
14 for -- I think that reason is to ensure  
15 that, you know, what new services they may  
16 be asking for. So all of those have been  
17 approved as of -- or, like, last week  
18 sometime.

19 DR. SCHUSTER: Okay.

20 MS. JUDY-CECIL: So we are -- you  
21 know, the priority is on getting these above  
22 any other requests that come in from MCOs  
23 for review. These are priority, and again,  
24 trying to get those out same day or next  
25 day.

1 DR. SCHUSTER: Right. Appreciate  
2 that. Any other questions about  
3 prior-auths?

4 (No response.)

5 DR. SCHUSTER: I'll ask a question,  
6 and it will be rhetorical because you can't  
7 answer it but let me state that from the BH  
8 TAC's point of view, we are certainly  
9 hopeful that with the reinstitution of  
10 prior-auths that the number and extent of  
11 audits will decrease. Because I think there  
12 has been an incredible increase over the  
13 last two years in the number of cases  
14 required and the short time frames. And  
15 this is nothing new I'm sure, Veronica, to  
16 you and DMS, hearing about this. We had  
17 Jennifer Dudinskie on the BH TAC, who's  
18 always so helpful, but, you know, if we've  
19 got to go back to the onerous process of  
20 prior-auths, then we sure as heck hope that  
21 the onerous process of hundreds of case  
22 records and almost no time will go away or  
23 certainly be more reasonable. So I will  
24 make that as a rhetorical statement. Thank  
25 you.

1 MS. EISNER: I can't figure out how  
2 to raise my hand so I'm doing it the old --

3 DR. SCHUSTER: Oh, all right, Nina.

4 MS. EISNER: So Veronica, will all  
5 the MCOs be required to use the same list of  
6 codes and services that have to be  
7 prior-auth'd?

8 MS. JUDY-CECIL: Not at this time.

9 MS. EISNER: Oh.

10 MS. JUDY-CECIL: That's something  
11 that we're going to work towards.

12 MS. EISNER: Okay.

13 MS. JUDY-CECIL: Yeah, we're --  
14 that's a workgroup -- something we're going  
15 to work on following, you know, this initial  
16 resumption. That and the PA form are things  
17 that we're going to take back to work on, an  
18 electronic PA form that's universal, is what  
19 we're going to take back.

20 MS. EISNER: Good. Thank you.

21 DR. SCHUSTER: Any other questions,  
22 then, before we move on?

23 (No response.)

24 DR. SCHUSTER: All right. And thank  
25 you for the information being posted in the

1 chat as well.

2 We understand, and I think, Beth,  
3 this was your item about the 2024 Telehealth  
4 Fee Schedule is still being used?

5 COMM. LEE: I think Justin Dearing  
6 is on here to address that topic. Justin,  
7 are you on?

8 MR. DEARINGER: Yes, ma'am. Hi, my  
9 name's Justin Dearing. I'm the director  
10 for the Division of Health Care Policy.

11 So we don't have a Telehealth Fee  
12 Schedule, but we do have, on the Physician's  
13 Fee Schedule, all of our telehealth codes.  
14 So that Physician's Fee Schedule, like all  
15 of our fee schedules, we try to get that  
16 updated as soon as possible in the beginning  
17 of the year. We're a little late this year  
18 and I apologize for that; however, all  
19 changes have been approved and have been  
20 placed into our system. So they're working  
21 on those system changes. The website will  
22 be updated by close of business Friday of  
23 next week. They'll probably be updated  
24 before Monday as we have people working on  
25 it over the weekend. Our Physician's Fee

1 Schedule, which the telehealth codes are on,  
2 is our biggest fee schedule. We have  
3 thousands upon thousands of codes listed on  
4 that fee schedule, so that is the hardest  
5 one to update.

6 But we are almost complete with that,  
7 and it will be completed and updated by  
8 Friday of next week. It's already in our  
9 system, and it will be retroactive back to  
10 January 1st.

11 MS. PARTIN: Okay. The concern from  
12 the providers that contacted me was that  
13 they would be -- the reimbursement would be  
14 changed, and so then they would be facing a  
15 big recoupment.

16 MR. DEARINGER: Yeah, so no  
17 reimbursements were changed on the 2025  
18 Physician's Fee Schedule. All of those  
19 stayed the same. We only added or removed  
20 codes, so there were no decreases. We had  
21 several decreases that came down from  
22 Medicare, as you all probably were aware.  
23 We did not include those decreases into the  
24 Physician's Fee Schedule, so we were able to  
25 leave those the same with our budget to

1 assist you all. So no recoupments.

2 MS. PARTIN: Oh, great. Thank you.

3 DR. SCHUSTER: Well, that's good  
4 news. So if anybody is -- so other  
5 providers use telehealth obviously. They  
6 need to go to the Physician's Fee Schedule  
7 to look at those fees?

8 MR. DEARINGER: That's correct. So  
9 most providers know if they're using codes  
10 that are listed on the Physician's Fee  
11 Schedule for telehealth. Now, we do have a  
12 lot of telehealth codes listed on specific  
13 fee schedules, as well. Therapy Fee  
14 Schedule, for instance, will have telehealth  
15 codes, and then a lot of the codes that  
16 other therapy providers, dental providers,  
17 all the different other provider types that  
18 we have fee schedules for, their codes will  
19 have a place of service that lists  
20 telehealth. So it's not actually a specific  
21 telehealth code, but a place of service that  
22 they bill. And they'll be able to see that  
23 either on the fee schedule, or that'll be in  
24 the billing instructions in the system when  
25 they go to bill, that they're allowed to

1 bill that through telehealth.

2 DR. SCHUSTER: Okay, thank you.

3 Nina?

4 MS. EISNER: Yes. Thanks, Justin,  
5 for that update. I'm wondering whether or  
6 not there is going to be a provider notice  
7 sent out about the ability of PHP and IOP  
8 behavioral health services to be provided  
9 via telehealth?

10 COMM. LEE: So Nina, you're  
11 requesting guidance on that? I think I have  
12 been talking -- you know, I've spoken with  
13 you several times on that.

14 MS. EISNER: Yeah.

15 COMM. LEE: Just different  
16 authorities have just kind of put that a  
17 little bit on the back burner for now, but  
18 we are still looking at that. We'll hope to  
19 have some information out soon.

20 MS. EISNER: Thank you.

21 DR. SCHUSTER: Thank you. I know  
22 that you've asked about that several  
23 meetings, Nina, so we'll keep asking about  
24 it until we see the guidance. Thank you.

25 MS. EISNER: Thank you. Thank you.

1 DR. SCHUSTER: Any other -- I think  
2 there was also a question at the BH TAC  
3 about the behavioral health codes. And I  
4 think, Justin, you said that they are being  
5 worked on by BDID, but are not completed  
6 yet?

7 MR. DEARINGER: Well, they're --  
8 right, there's a couple of fee schedules  
9 that we kind of collaborate with them on,  
10 but I think the Behavioral Health Fee  
11 Schedule, which I'm not sure if there's  
12 anybody from behavioral health on to talk  
13 about where those are, but I'm pretty sure  
14 that those are in the same spot. They've  
15 been approved and they are working on those,  
16 and I would say, again, within the next  
17 couple of weeks, theirs will be posted as  
18 well. I know I saw a change order go  
19 through, so they've -- they're kind of in  
20 the same exact spot where the physician's  
21 is. So you all will be seeing those in the  
22 next couple of weeks.

23 DR. SCHUSTER: Okay. Because I know  
24 that that was one of the questions that came  
25 up. Thank you. Any other questions about

1 telehealth or about fee schedules?

2 (No response.)

3 DR. SCHUSTER: All right. Thank you,  
4 Justin, for being on.

5 MR. DEARINGER: Thank you.

6 DR. SCHUSTER: We have the timeline  
7 for implementing the SMI 1915(i) SPA, which  
8 is now called RISE, R-I-S-E, which was,  
9 hooray, recently approved by CMS. That's  
10 the best news I've gotten in a long time.  
11 Any update on that? Oh, and Ann Hollen --

12 DR. HOFFMANN: Dr. Schuster, Ann  
13 Hollen should be on.

14 DR. SCHUSTER: Great.

15 DR. HOFFMANN: Sorry.

16 DR. SCHUSTER: You're good.

17 DR. HOFFMANN: Ann Hollen should be  
18 on.

19 MS. HOLLEN: I'm trying to share.  
20 I've got a slide to show you, but obviously,  
21 I'm not -- am I sharing it?

22 DR. SCHUSTER: Yes.

23 MS. HOLLEN: Do you see it?

24 DR. SCHUSTER: Yeah, I see it.

25 MS. HOLLEN: Okay. All right.

1 DR. HOFFMANN: We can see it, Ann.

2 MS. HOLLEN: Okay, thank you, because  
3 I can't tell if it's on or not.

4 Good morning, everyone. My name's  
5 Ann Hollen. I'm an executive advisor from  
6 the Department for Behavioral Health  
7 Developmental and Intellectual Disabilities,  
8 and I'm leading the 1915(i) RISE initiative  
9 for our department. We are in a partnership  
10 with DMS. It is a brand-new benefit package  
11 that we will administer on behalf of  
12 Medicaid.

13 So we wanted to give a timeline of  
14 how we're going to get things rolled out.  
15 So we're almost to the end of May. DBH, we  
16 are actively interviewing staff to help us  
17 administer the 1915(i). I can say that so  
18 far, the applications we've got are --  
19 people have mental health experience, and  
20 some experience with trainings and things.  
21 So it's very promising, and I'm very excited  
22 about that.

23 We are putting last-minute touches on  
24 our communication plan, and we'll have a  
25 website page. I -- Sheila, you know, I

1           learned early not to give dates, but I've  
2           put -- I've said I'd like to see it go live  
3           by June 15th, so I'm hopeful that we'll have  
4           something up there live June 15th. I'll  
5           make sure that the website page is put in  
6           the chat here, and I can make sure that it  
7           gets shared as well from Erin when she sends  
8           out other items for the MAC. And we also  
9           have two email boxes for anyone that has --  
10          you know, wants to get put on a listserv.  
11          One is for providers, and one is for just  
12          anyone.

13                 Then in June, we're getting the  
14          certification curriculums recorded in  
15          Medicaid's Adobe Learning Management System  
16          for providers and staff to complete part of  
17          the certification process. And then we're  
18          also going to start our outreach to the  
19          public targeting providers and anyone that  
20          wants to hear me rattle on about the  
21          services and how you can become a provider.

22                 July, we will begin certifying  
23          providers and getting them Medicaid  
24          enrolled. We will have our independent  
25          assessors will be trained on the interRAI

1 Community Mental Health Assessment. So that  
2 is the needs-based assessment we will be  
3 using to determine the needs and eligibility  
4 for individuals with serious mental illness.

5 August, the independent assessors  
6 will apply that training and conduct testing  
7 assessments. We want to make sure that they  
8 are ready and understand fully how to  
9 provide that assessment. And then we're  
10 also, you know, getting some system things  
11 finalized, and we plan to begin assessing  
12 participants for eligibility and services,  
13 September.

14 So that is the course that we are  
15 planning right now. Any --

16 DR. SCHUSTER: That sounds good, Ann.  
17 I was writing the minutes for the BH TAC  
18 meeting, and I was racking my brain trying  
19 to remember what RISE stands for, so tell me  
20 that again.

21 MS. HOLLEN: I will tell you. Hang  
22 on. I should have it memorized. I really  
23 should.

24 DR. SCHUSTER: Well, it makes me feel  
25 better that you can't just rattle it off.

1 MS. HOLLEN: No. Recovery,  
2 Independent, Support, and Engagement. RISE  
3 reflects the initiative's focus on helping  
4 individuals rise above their challenges  
5 through services that promote recovery,  
6 independence, and community engagement.

7 DR. SCHUSTER: So it's Recovery --  
8 what's the I?

9 MS. HOLLEN: Independence.

10 DR. SCHUSTER: Independence, okay.

11 MS. HOLLEN: Support and Engagement.

12 DR. SCHUSTER: All right. Thank you  
13 very much.

14 MS. HOLLEN: You are welcome. Thank  
15 you.

16 DR. SCHUSTER: I really tried -- I  
17 came up with some other words, but you  
18 probably don't want to know what those words  
19 were.

20 MS. HOLLEN: Thank you.

21 DR. SCHUSTER: To say that we are  
22 excited about this rolling out, this -- for  
23 those of you who don't know about -- well,  
24 the MAC members should know because we hear  
25 about it. But this would give to people

1           that qualify with severe mental illness  
2           supported housing. In other words, housing  
3           with all of the wraparound services that  
4           they need, and we have been --

5                   MS. HOLLEN: In-home --

6                   DR. SCHUSTER: -- wanting this --  
7           in-home, yeah.

8                   MS. HOLLEN: In-home, independent  
9           living services.

10                  DR. SCHUSTER: In-home and  
11           independent, yeah.

12                  MS. HOLLEN: Yeah, supported  
13           education, supported employment if they want  
14           to get an education and work towards a job.

15                  DR. SCHUSTER: And respite for  
16           caregivers --

17                  MS. HOLLEN: Respite, yes, ma'am.

18                  DR. SCHUSTER: -- which has never  
19           been there for family members and so forth,  
20           so we're very excited about this.

21                  MS. HOLLEN: You've been -- as I've  
22           heard you say before, you've been waiting 30  
23           years for this.

24                  DR. SCHUSTER: It feels like about  
25           100, but yes. Thank you very much, Ann.

1 MS. HOLLEN: Thank you.

2 DR. SCHUSTER: Any questions for Ann  
3 about this?

4 MS. HOLLEN: Justin, it's not a  
5 waiver. It is a 1915(i) State Plan  
6 Amendment.

7 DR. SCHUSTER: Amendment, right.

8 MS. HOLLEN: That is -- it is a home  
9 and community-based program. It's like --  
10 there are certain components that are  
11 federal requirements that apply to the (i),  
12 that apply to the (c), but I'm trying really  
13 hard to get people not to call a waiver.

14 DR. SCHUSTER: Yeah, that's right.  
15 And I finally have -- that's why when it  
16 went to RISE, I was like, oh, I gotta figure  
17 out what RISE stands for, so.

18 MS. HOLLEN: Because there is no  
19 slots.

20 DR. SCHUSTER: There are no slots,  
21 right.

22 MS. HOLLEN: If you -- yeah, if you  
23 qualify, you can --

24 DR. SCHUSTER: You're in.

25 MS. HOLLEN: -- you can utilize the

1 benefit, yes.

2 DR. SCHUSTER: Yeah.

3 MS. HOLLEN: And it is statewide.

4 DR. SCHUSTER: And it was funded by  
5 the General Assembly in the 2024 biennial  
6 budget, so that's huge. So we're very  
7 excited about this. There are a lot of  
8 family members and a lot of folks waiting  
9 for this. So thank you, Ann. Appreciate  
10 that.

11 And then just to continue with the  
12 waiver discussion, do we have anyone to talk  
13 about the implementation of the Reentry  
14 Waiver?

15 DR. HOFFMANN: Dr. Schuster, Angela  
16 Sparrow should be on.

17 DR. SCHUSTER: Okay.

18 MS. SPARROW: Good afternoon,  
19 everyone. Thank you. Angela Sparrow, one  
20 of the project technical specialists within  
21 the Department for Medicaid Services. So I  
22 wanted to provide some updates on the  
23 Reentry 1115 Demonstration.

24 Lots of initiatives and work  
25 occurring as we continue to target, again,

1 an October implementation date. There has  
2 been, again, as we've continued to discuss a  
3 lot of focus around system requirements for  
4 changes, again, to support implementation of  
5 the waiver and the services. So again,  
6 there will be some changes that we need to  
7 make to our eligibility system to identify  
8 the populations, the reentry populations,  
9 the new youth provisions, the new CAA youth  
10 group, again, that is also eligible for  
11 pre-release services, those targeted  
12 pre-release services.

13 So we will need to make some system  
14 changes so that we can identify those  
15 populations appropriately, that we can  
16 identify them in terms of the settings that  
17 they are placed in appropriately, and also,  
18 for the time frames that they're eligible  
19 for those pre-release services  
20 appropriately. So again, it is complex  
21 system changes, again, to be able to  
22 appropriately do that, to be able to  
23 reinstate or instate that eligibility as  
24 quickly as possible.

25 And so from there forward, again,

1           that means that we'll have some billing  
2           changes to our MMIS systems to allow the  
3           correctional facilities to bill for those  
4           services, be reimbursed for those services  
5           in that pre-release time period. That also  
6           means that our correctional partners,  
7           Department for Corrections, Department for  
8           Juvenile Justice, they are also, again,  
9           needing to make some system changes to  
10          support implementation to their health  
11          records, again, being able to capture  
12          Medicaid IDs, identify individuals, the  
13          services, again, etc. So again, they  
14          continue to work on system changes as well.

15                 There will be some system changes to  
16          Med Impact to allow for that 30-day supply  
17          of medication at the time that individual is  
18          released. Again, this is not going to be  
19          pharmacy changes to our community pharmacy  
20          providers. Again, that will be more so for  
21          the vendor and for that pharmacy that DOC  
22          and DJJ are contracting with.

23                 And also, again, exploring some  
24          changes with KHIE for our DOC and DJJ  
25          partners to allow for that data exchange,

1           and again, be able to provide that  
2           information timely to the MCOs to support  
3           those case management services pre-release  
4           and post-release.

5                       So again, we continue to move forward  
6           with developing those requirements,  
7           understanding the system impacts, and again,  
8           through the summer, we'll move forward with  
9           deploying those system changes and the  
10          testing, again, around that.

11                      There are several workgroups that  
12          continue to meet to support program design  
13          and implementation. So again, DOC, DJJ,  
14          meeting with them routinely, our pharmacy  
15          workgroup, finance again, in terms of any  
16          changes to capitation payments to support  
17          those pre-release services. Again, any  
18          changes for rate settings for the  
19          pre-release services. So again, some of  
20          those items, and then also working with  
21          MCOs, meeting with the MCOs to develop,  
22          again, that case management policy to  
23          support, again, those efforts, both  
24          pre-release and post-release. So again,  
25          clearly defining roles and responsibilities

1 with our MCOs and with our correctional  
2 partners will be very important for  
3 collaboration to ensure that we have, again,  
4 a smooth and successful implementation. We,  
5 again, will kick off some additional  
6 workgroups in the next few weeks, but again,  
7 want to wrap up some of these initiatives  
8 before kicking those off.

9 I think we've talked in the past,  
10 again, DOC and DJJ, they will be enrolling  
11 as a provider. So again, they will be  
12 providing some of those pre-release  
13 services, being reimbursed for those  
14 services, so we are supporting them through  
15 that provider enrollment process. We've  
16 developed that new provider type, Provider  
17 Type 53, Reentry Organizations, that they  
18 will be enrolling as. So again, we'll also  
19 be supporting them with contracting with the  
20 MCOs through that process, and so that will  
21 be new, and again, will occur over the next  
22 quarter and into, again, the fall.

23 We'll move into readiness assessments  
24 through, again, the summer -- into summer  
25 and again, early fall. And so again, lots

1 of things, lots of moving parts, but we're  
2 excited that we do, again, have great  
3 collaboration with our justice partners, and  
4 with our MCOs, and many agencies involved in  
5 the process. And it is very complex, so we  
6 -- again, we'll keep moving forward as a --  
7 again, this is kind of the first step to be  
8 able to provide these services.

9 Any questions? I know it's a lot of  
10 information there, so.

11 DR. SCHUSTER: We always appreciate  
12 your updates, Angela. Any questions for  
13 Angela? You know, this Reentry Waiver is  
14 going to be a huge help. The idea is to get  
15 people started on their services six months  
16 prior to release so that they really have  
17 that warm hand off to the MCO and will just  
18 be continuing their services, as opposed to  
19 getting released from incarceration and then  
20 having to start once they're out in the  
21 community. So we're really hoping that  
22 people will be well on their way to recovery  
23 services when they get into the community.

24 So great work, Angela. And just a  
25 reminder that Steve Shannon has that Reentry

1 TAC that meets the second Thursday of every  
2 other month starting in January at 9 a.m.  
3 And so if you're interested, particularly in  
4 reentry, you can certainly plan to attend  
5 the Reentry TAC. Any questions from anyone?

6 (No response.)

7 DR. SCHUSTER: All right. Well,  
8 thank you very much, Angela.

9 MS. SPARROW: Thank you.

10 DR. SCHUSTER: How about the current  
11 HCBS waiting list numbers?

12 MS. HANCOCK: Yes, good morning,  
13 everyone. Good morning, Dr. Schuster. I'm  
14 Carmen Hancock, the Department for Medicaid  
15 Services division director of Long-Term  
16 Services and Supports. So I've got that  
17 information for you.

18 Current waitlist numbers as of today  
19 on our Home and Community-Based Waiver, we  
20 have 4,423 individuals on the waiting list.  
21 The Michelle P. Waiver, we have 9,459  
22 individuals on that waiting list. Supports  
23 for Community Living, so our SCL, is 3,626.  
24 Within those numbers, we have a little over  
25 2,100 people that are on multiple waiting

1 lists. So that total of unduplicated  
2 individuals on waiting lists, is 15,369.  
3 And I can drop this little chart in the chat  
4 for you to have.

5 DR. SCHUSTER: That would be great.  
6 Are there any on the either emergency or  
7 urgent waiting list, Carmen?

8 MS. HANCOCK: Dr. Schuster, I would  
9 have to check on that. I know that we do  
10 have some within SCL, but I don't know how  
11 many right off the top of my head.

12 DR. SCHUSTER: Okay. If you might be  
13 able to get that and just drop it in the  
14 chat, if you're able to do that.

15 MS. HANCOCK: Yes, ma'am.

16 DR. SCHUSTER: That question has been  
17 asked, and so we might want to have that as  
18 part of the waiting list discussion going  
19 forward, if you would.

20 MS. HANCOCK: Okay.

21 DR. SCHUSTER: That would be very  
22 helpful. And nobody's on the ABI, the  
23 Acquired Brain Injury waiting list?

24 MS. HANCOCK: No, ma'am.

25 DR. SCHUSTER: Okay.

1 MS. HANCOCK: Or Model 2. No, ma'am.

2 DR. SCHUSTER: Okay. All right.

3 Thank you very much. Appreciate that.

4 MS. HANCOCK: Thank you.

5 DR. SCHUSTER: And I see it in the  
6 chat, thanks.

7 And how about an update on unwinding  
8 flexibilities in the upcoming child  
9 renewals.

10 MS. JUDY-CECIL: Good morning,  
11 Dr. Schuster. Veronica Judy Cecil, senior  
12 deputy, again.

13 DR. SCHUSTER: Oh, it's Veronica,  
14 good.

15 MS. JUDY-CECIL: I do have slides.

16 DR. SCHUSTER: Okay, good.

17 MS. JUDY-CECIL: So I will quickly  
18 share that.

19 Okay. Just to touch on -- and I'll  
20 do my best to do this very quickly. Just to  
21 touch on the flexibilities, and we do want  
22 to talk about it because they are ending on  
23 June 30th. So we have been maintaining  
24 flexibilities from the unwinding of the  
25 public health emergency. And those have

1           been very helpful to Kentucky, and to, you  
2           know, our members in ensuring that they do  
3           not inappropriately lose coverage as we've  
4           gone with the restart of the renewals.

5                       So some of those flexibilities we  
6           really want to focus on because we think  
7           they're the most impactful as they start to  
8           end on June 30th. One is -- and we'll talk  
9           about this a little bit more but is the  
10          automatic renewal of children. We have been  
11          able to automatically renew children when  
12          their renewal month came up for 12 months,  
13          and that flexibility is going away.

14                      We also have been extending members.  
15          If they received a renewal form, and they  
16          didn't respond by their original renewal  
17          date, we could extend them up to one month  
18          for all members, or up to three months if  
19          they were long-term care or 1915(c) members.  
20          We will -- after June 30th, we will no  
21          longer be able to extend folks if they don't  
22          respond by that date. So that's something  
23          we're very concerned about because we did  
24          see a lot of folks use that additional time  
25          to get those renewals in, so we're just

1           going to have to stay on top of folks making  
2           sure that they know they're going through a  
3           renewal, they know they have to send  
4           information back to us to make a  
5           determination. So that's going to be very  
6           critical.

7                       And then the last -- or two others,  
8           one is during the unwinding we had a  
9           flexibility that allowed an authorized  
10          representative to sign an application or a  
11          renewal form via the telephone. That -- you  
12          can still do that post June 30th -- after  
13          June 30th, but we will have to have a signed  
14          designation on file for that member's case  
15          for that authorized representative to be  
16          able to do that. It's a MAP 14 is what the  
17          form is called. We'll post it. We've been  
18          trying to get the word out on this as well.  
19          I will like to say, a kynector does not need  
20          this form. This is really only authorized  
21          representatives that are trying to act on  
22          behalf of the member to access services or  
23          to file an application or to go through  
24          their renewal.

25                      And then the last one that I want to

1 focus on is the 90-day reinstatement. So  
2 during the unwinding, one of our  
3 flexibilities was being able to reinstate a  
4 member if they were terminated and they came  
5 back in during a 90-day period following  
6 their termination. They provided the  
7 information we needed, and we were able to  
8 determine them eligible. We could reinstate  
9 them back to that termination date as if  
10 there was no gap and coverage. So that has  
11 been automatic, and that is going away on  
12 June 30th as well.

13 What that means for folks is  
14 currently we do have the capability to retro  
15 eligibility. We're very limited in the  
16 circumstances in which we can do that, and  
17 in some cases, we have to treat that is a  
18 new application and folks don't get that  
19 automatic reinstatement. So that is also a  
20 flexibility going away.

21 So these really are the five we think  
22 are most impactful to members as we come out  
23 of unwinding on June 30th.

24 What are we doing for that? What our  
25 message has been this entire time, which is

1 we really need our members to make sure  
2 they're updating their contact information,  
3 their address, email, a phone number, if  
4 possible, because we do try to communicate  
5 with our members through all of those  
6 different ways. So the more information and  
7 contact information we have for a member,  
8 the better chance we have of reaching them,  
9 especially if something happens with the  
10 mail and their notice, we're at least  
11 calling them or emailing them or texting  
12 them to let them know that they have to take  
13 action. So we always ask, you know, if  
14 providers in particular, if a member comes  
15 in and is updating their contact information  
16 with you, please ask them if they've also  
17 updated that contact information with the  
18 state. That's kind of the biggest one that  
19 we ask providers to help us with. So just  
20 making sure that that information is  
21 updated.

22 This is the enrollment trend, and as  
23 I've been saying for many months, we really  
24 have leveled out. We're staying pretty much  
25 hovering around the 1,450,000 mark. So that

1           hasn't changed.

2                   I'm not going to go through this like  
3           I generally do for the interest of time, but  
4           just for folks that are seeing this,  
5           especially maybe for the first time, this is  
6           a summary of the reporting that we do to CMS  
7           on a monthly basis. On the left-hand side,  
8           is what we call our original monthly report  
9           to the Centers for Medicare and Medicaid  
10          Services. It is a report that's given --  
11          that's sent by the eighth of the month  
12          following the month of renewal. And then on  
13          the right-hand side is an updated report  
14          that we submit to CMS that provides  
15          information on any pending cases that we  
16          processed. And that's what's in the middle  
17          there, in that column are the processed  
18          cases.

19                   This is a summary. All of these  
20          reports are on our unwinding website, and  
21          we'll post that link for those of you who  
22          don't have it. And it has a lot more  
23          information in each report, so if you're  
24          really interested in what's going on on a  
25          monthly basis, you can check that out.

1           The past three months, we generally  
2           show in this format. And we'll take April  
3           as the most recent month that we had  
4           renewals, and there were 75,162 individuals  
5           that went through a renewal, 64,401 of those  
6           were approved, 1,798 of those were  
7           terminated, and we had no pending cases that  
8           crossed over that last day of April. And  
9           there's that extended bucket, so you can see  
10          the number of individuals that have been  
11          taking advantage of that extended bucket.  
12          Again, we're going to work really hard to  
13          reach folks, and we just need everybody's  
14          help in making sure that members who are  
15          navigating the renewal process are taking  
16          action. We want to make it as easy as  
17          possible. There are multiple ways in which  
18          they can submit information, and all of that  
19          information is in their letter and on our  
20          website. It's also contained in a lot of  
21          the communication materials that we have,  
22          and I'll get to that in a minute. And then  
23          that far right bucket is those  
24          reinstatements I talked about. So the  
25          automatic 90-day period, you know, would

1 be -- so for April, we've already had 451  
2 folks that have come back in in that 90-day  
3 period and have been determined eligible for  
4 April. So those are really important  
5 buckets. The extended and the reinstatement  
6 are concerning for us.

7 Let's talk child renewals. So as I  
8 said, the automatic extensions are going  
9 away on June 30th, which means children with  
10 a July renewal, will start to have to  
11 actually go through a redetermination. The  
12 way that works, as a reminder, is we always  
13 send 60 days prior to the renewal date,  
14 which is always end of the month, we always  
15 send a notice to members. There is a  
16 process where we go out and try to  
17 automatic -- automatically renew cases by  
18 checking what we call trusted data sources,  
19 and if we can confirm the information, that  
20 child could get automatically renewed  
21 without even having to take any action on  
22 the case. And if we're able to do that,  
23 then they'll get a notice saying, "you've  
24 been renewed." But if we can't, it will  
25 drop to what we call an "active renewal,"

1 and they'll be sent a renewal form or a  
2 request for information, and that has to be  
3 acted on. So again, we're going to be  
4 really monitoring these as the child  
5 renewals start for the July renewal. So  
6 they'll get the notice in early June as to  
7 whether or not they're going to have to take  
8 action on their renewal.

9 We've got a communication toolkit for  
10 child renewals on our unwinding website. It  
11 has a lot of frequently asked questions, it  
12 just sort of talks about, you know, what's  
13 going on and why is this happening. And  
14 then what you see here are an example of  
15 some of the flyers that we have. We're  
16 really asking folks to please share this,  
17 you know, and distribute it. If you know  
18 organizations that work with Medicaid  
19 members, especially children, you know, to  
20 please distribute it, post it. We're asking  
21 providers if they don't mind posting it and  
22 reminding folks that child renewals are  
23 coming up. So lots of information.

24 We do also, on our unwinding website,  
25 have non-child renewal flyers. So if you

1 want to post just general flyers to help  
2 Medicaid members go through that renewal,  
3 again, we've got a lot of communication  
4 materials on our website.

5 So this is the website. I'll post it  
6 in the chat. The communication materials is  
7 where that child renewal toolkit is, and  
8 please, please, please, just share it. We  
9 greatly appreciate getting the word out and  
10 making sure that we're doing all that we can  
11 to support our members going through that.

12 DR. SCHUSTER: All right. As always,  
13 Veronica, great information. Are there any  
14 questions for Veronica?

15 (No response.)

16 DR. SCHUSTER: And let's do try to  
17 get the word out. Again, we don't want to  
18 lose coverage for any of the kids in  
19 Kentucky.

20 MR. MARTIN: Hey, Veronica, the  
21 kynectors can help recipients with that,  
22 right?

23 MS. JUDY-CECIL: Yes. Oh, Barry,  
24 thank you for bringing that up. Because  
25 something I normally share is that we have

1           been working with the FRYSCKys. If folks  
2           are familiar with the FRYSCKys, they're in  
3           all the schools, and they help members  
4           apply, get connected on how they can apply,  
5           and if they're having problems with the  
6           renewal process. So we have shared the  
7           communication toolkit with all the FRYSCKys  
8           in all the schools. Our kynectors can be of  
9           assistance, and in fact, we have kynectors  
10          attend pretty much all of the large school  
11          events across the state. So we will keep  
12          doing that. There's a lot of back-to-school  
13          events that happen, you know, in the summer,  
14          we have kynectors that attend those. And  
15          their focus is going to be on making sure  
16          that those parents and guardians and others  
17          know that those children are going through  
18          renewals. So kynectors are across the state  
19          and can help families navigate this.

20                 MR. MARTIN: I know sometimes it  
21                 takes them a day or two -- it takes a day or  
22                 two longer to cycle through, but yeah,  
23                 that's a good point. Thanks.

24                 MS. JUDY-CECIL: Thank you.

25                 DR. SCHUSTER: Thank you for that

1 question, Barry. Any other questions?  
2 Peggy?

3 MS. ROARK: Yes. This is Peggy  
4 Roark. I could share at my local doctors,  
5 but also at the library.

6 DR. SCHUSTER: Good point.

7 MS. ROARK: A lot of people go to my  
8 library here, and I see some doctors and can  
9 talk and help spread the word any way I can  
10 do to help.

11 MS. JUDY-CECIL: Thank you.

12 MR. GILBERT: Veronica, is there a  
13 kind of a portal or a conduit to the public  
14 libraries? That's a really great idea,  
15 Peggy. I think that if we had just a  
16 conversation with a spot on the bulletin  
17 board could always be for particularly  
18 children, but I think, in general, there  
19 could be a bulletin board in every public  
20 library that had cool flyers like that.

21 DR. SCHUSTER: Right.

22 MR. GILBERT: And you get the  
23 librarian to replace them once a month or  
24 whatever, that could be huge.

25 DR. SCHUSTER: Yes.

1 MS. JUDY-CECIL: It is a great idea,  
2 and happy to take that back, and we'll find  
3 a way to contact the librarians and get it  
4 out that way. There's a lot of kynectors  
5 that go to libraries.

6 MR. GILBERT: Mm-hmm.

7 MS. JUDY-CECIL: That's where they --  
8 that's sort of their community location and  
9 they do outreach there, but that's a great  
10 idea. Thank you for that.

11 DR. SCHUSTER: Yeah. And I think  
12 that there is some centralized thing for all  
13 the public libraries. I'm also thinking  
14 that during the summer, they do a lot of  
15 activities for kids, reading groups, and  
16 story time, and so forth because kids are  
17 out of school. So great, great idea, Peggy.  
18 Thank you for that.

19 MS. ROARK: You're welcome.

20 DR. SCHUSTER: Any other -- I think  
21 the -- getting the word out about the kids  
22 but then reminding people that ending those  
23 flexibilities is really going to be huge.  
24 That 90 days has really saved a lot of  
25 people, and they could come back, as

1 Veronica pointed out, and reapply, but  
2 that's a very different process than, you  
3 know, getting reinstated during that 90-day  
4 grace period or extension period.

5 So there's a question in the chat  
6 that I would like to ask, and I'm not sure  
7 who can answer it, and it's "Will those who  
8 meet criteria for the developing children's  
9 waiver who may be on the waiting list right  
10 now for HCB, Michelle P., or SCL, be moved  
11 to the children's waiver once it's being  
12 implemented, or will they need to apply?"  
13 And just a reminder that the children's  
14 waiver, it doesn't exist yet. This is a  
15 waiver for kids who are on the autism  
16 spectrum, kids who are in the severe  
17 emotional disturbance category, or those  
18 with chronic health and behavioral health  
19 problems.

20 Do you have any idea, Veronica, or  
21 anybody else, what that process will be?  
22 I'm looking at you, Veronica, because you're  
23 in my bull's-eye.

24 DR. HOFFMANN: I'm on, Veronica, if  
25 you want me to speak.

1 DR. SCHUSTER: Oh, that would be  
2 great.

3 DR. HOFFMANN: So Dr. Schuster, we're  
4 -- you know, we're still working on this,  
5 and we hear you, and we will have, you know,  
6 stakeholder forums and workshops and group  
7 meetings to talk about what we would like to  
8 see. I just wanted you to be aware that  
9 we're just kind of in the middle of a  
10 multiphase, multiyear, wonderful initiative  
11 to help transform children's services. So I  
12 can't answer those questions for you right  
13 now today. There's processes in everything  
14 that you just mentioned, of course, so just  
15 bear with us, and we are working on, like I  
16 said, a multi-phased approach. The (c)  
17 waiver that was listed in and approved in  
18 last budget that we're currently addressing  
19 some things right now, and it will just be a  
20 piece, right, of our multifaceted family  
21 first approach, if that makes sense.

22 DR. SCHUSTER: Okay. Yeah, that does  
23 make sense, thank you. Thank you very much.

24 Let's go on to the TAC reports. And  
25 I had indicated to the TACs that we probably

1 would not have time for everybody to give a  
2 report, so I'll ask first for those three  
3 TACs that do have recommendations so that we  
4 can get through those, and then if there are  
5 other TACs that want to make a very brief  
6 report.

7 I think behavioral health is up  
8 first, and I mentioned several things that  
9 came up at the Behavioral Health TAC on  
10 May 22nd. We did have a quorum. A lot of  
11 the discussion was about the resumption of  
12 prior authorizations, and we brought up a  
13 lot of those issues.

14 We also had a lot of discussion, as  
15 always, about audits. And as I mentioned,  
16 Jennifer Dudinskie was on and reminded us of  
17 some of the processes.

18 We also had an interesting discussion  
19 about waiting lists for person-directed  
20 services, and the request that that really  
21 not be seen as a waiting list but as a kind  
22 of interest list because they don't really  
23 move people off of it. So there are people  
24 that are enrolled, interested in traditional  
25 Medicaid, no longer interested, and so

1           forth.

2                       We did have a recommendation to the  
3           MAC moved by Steve Shannon and seconded by  
4           Valerie Mudd: "The BH TAC recommends that  
5           Kentucky Medicaid Services issue guidance to  
6           the MCOs and providers on the prior  
7           authorization process and forms to ensure  
8           consistency across all MCOs." I think  
9           that's been the consistent request from  
10          providers as we've heard that across the  
11          various TACs. So that's the recommendation  
12          from the BH TAC.

13                     Wayne Harvey, I think, is on from the  
14          IDD, Intellectual and Developmental  
15          Disabilities TAC, and they have a  
16          recommendation.

17                     MR. HARVEY: Good afternoon,  
18          Dr. Schuster. The IDD TAC met on April the  
19          1st, and they came out with a formal  
20          recommendation related around a  
21          long-standing topic for the IDD TAC, and  
22          that's around involuntary terminations.

23                     And the recommendation is as follows:  
24          "The IDD TAC recommends and requests that  
25          CHFS modify the involuntary termination

1 requirement within the SCL and Michelle P.  
2 Waiver regulations to establish a time frame  
3 within which the certified provider is  
4 obligated to continue supporting an  
5 individual that they have indicated they can  
6 no longer safely support. This TAC  
7 recommends a similar time frame as the state  
8 of Virginia allows, which is 60 days with  
9 their involuntary termination process, as  
10 discussed in earlier TAC meetings. This  
11 recommendation is made in the interest of  
12 preserving the health, safety, and welfare  
13 of the individuals receiving waiver services  
14 funded through Medicaid."

15 DR. SCHUSTER: Thank you very much  
16 for that, Wayne. And we will take a vote on  
17 approving these recommendations here very  
18 shortly. Thank you.

19 And then the Physician TAC I believe  
20 has a recommendation.

21 DR. GUPTA: Yes. Thank you,  
22 Dr. Schuster. This is Dr. Ashima Gupta from  
23 the Physicians TAC. We met on May 16th,  
24 last Friday, and our recommendation: "The  
25 Physicians TAC recommends to the MAC that

1 DMS amends 907 KAR 3:005 to remove the daily  
2 per patient limitation on billing for E&M  
3 services."

4 And we would also just like to thank  
5 DMS for all -- for having recognized this  
6 issue and for already taking steps to amend  
7 the regulation.

8 DR. SCHUSTER: And I'm sorry, Ashima,  
9 to end the --

10 DR. GUPTA: To amend --

11 DR. SCHUSTER: Amend, okay.

12 DR. GUPTA: -- its regulation.

13 DR. SCHUSTER: Okay. For E&M  
14 services.

15 DR. GUPTA: Right. To remove the  
16 daily limitation -- daily per patient  
17 limitation of services.

18 DR. SCHUSTER: All right, great. Am  
19 I correct -- are there any other TACs that  
20 have a recommendation to come before the  
21 MAC?

22 (No response.)

23 DR. SCHUSTER: Let me then have a  
24 motion from the voting members of the MAC to  
25 adopt the TAC recommendations from the BH

1 TAC, the IDD TAC, and the Physicians TAC.

2 MS. STEWART: This is Susan Stewart,  
3 I'll make that recommendation.

4 MS. PARTIN: I'll second.

5 DR. SCHUSTER: Okay. Thank you,  
6 Susan and Beth. Any discussion?

7 (No response.)

8 DR. SCHUSTER: All those in favor,  
9 signify by saying "aye."

10 (Aye.)

11 DR. SCHUSTER: And opposed, like  
12 sign?

13 (No response.)

14 DR. SCHUSTER: And abstentions?

15 (No response.)

16 DR. SCHUSTER: So Dawna, I think you  
17 have in writing those recommendations, and  
18 those are the ones that we will be sending  
19 onto DMS.

20 We do have a couple of minutes as it  
21 turns out. Are there any of the TACs that  
22 would like to briefly give a report of their  
23 most recent meeting?

24 (No response.)

25 DR. SCHUSTER: Okay. Hearing none,

1 we will move on to new business. And I  
2 think, Kent, that you had an item.

3 MR. GILBERT: Yeah, thank you. My  
4 concern has been raised by a number of  
5 issues that we've already just touched on,  
6 including what do we do about folks who are  
7 erroneously targeted for terminations. What  
8 to -- those we've discussed in previous  
9 meetings about various forms of our sort of  
10 checks and balances generating false  
11 positives on fraud detection, etc. It's a  
12 question about due process. I'm interested,  
13 Commissioner, if you can tell us what  
14 assurances do our constituents and our  
15 providers, anybody who's suddenly found  
16 themselves without recourse, what can we do  
17 to make sure that there is due process being  
18 followed?

19 I realize that due process is not  
20 currently in vogue in every quarter of our  
21 governmental systems, but I would very much  
22 like for us to be assiduous about attention  
23 to making sure we don't cause both public  
24 health crises inadvertently and also don't  
25 disrespect either a provider or a recipient

1           because we've suddenly decided to just move  
2           ahead.

3                       What -- I'd love to hear some comment  
4           about that, and maybe there's better ideas.  
5           What support do you need from us in order to  
6           have transparent, clearly available  
7           resources for those who might need due  
8           process, and what are the assurances for due  
9           process in dispute problems?

10                   MS. JUDY-CECIL: We appreciate that  
11           question, and I think we're always trying to  
12           improve on how -- and how can we make it  
13           easier for folks to access the process for  
14           appealing? And I think we can do better,  
15           and make it more understandable, make sure  
16           we're talking about it, you know, make sure  
17           -- it feels like sometimes it can be  
18           redundant, but I don't think it is if it's  
19           really about trying -- you know, like on the  
20           call today, I think we have new people that  
21           have for the first time come to the MAC and  
22           haven't heard information that we've shared.  
23           So I think it's always -- I think it's  
24           incumbent upon us particularly, and you all  
25           as well, you know, the folks that are on the

1           MAC, the providers, I think it's just the  
2           community that I'd call "Medicaid," to make  
3           sure that we are always talking about how to  
4           access your rights in plain language, easy  
5           for folks to understand "what do I do?"

6                     And, you know, we've been -- I think  
7           we've been trying to do better, especially  
8           with some of the new things that we've been  
9           launching and talking about, but I  
10          appreciate your attention to that, and I  
11          think something we can work on is how do we  
12          better communicate and ensure that everyone  
13          knows what to do if they've received a  
14          denial. Because it is critically important,  
15          and, you know, I'll talk about we're trying  
16          to be candid and transparent about what  
17          happened with the child recertification  
18          denials and the HCB Waiver. There are some  
19          that took advantage and appealed, and there  
20          were some that didn't, and that concerned  
21          us. In fact, it might've been about 50/50.

22                    MR. GILBERT: Mm-hmm.

23                    MS. JUDY-CECIL: And so we are  
24          looking at that. This is our opportunity to  
25          see what can we do better, and I think one

1 of the things we can do better is making  
2 sure we're communicating with members that  
3 have been denied, and make sure they  
4 understand what their appeal rights are.  
5 It's in a letter, and that's easy to say,  
6 but that doesn't mean that someone who  
7 receives that --

8 MR. GILBERT: Right.

9 MS. JUDY-CECIL: -- understands it,  
10 or maybe they don't even receive it because  
11 we don't have the most current address on  
12 file. So we've talked about how can we make  
13 that easier, not just for the HCB Waiver,  
14 but going forward to communicate with folks  
15 that have -- that are going through a  
16 denial, using maybe all the modes of  
17 communication we have on file. If we have  
18 an email address and a phone number, and,  
19 you know, not just relying on the mail as a  
20 way to communicate that.

21 So we're looking at that. I think  
22 it's a very timely question, and something  
23 that we should really focus on.

24 MR. GILBERT: I appreciate your  
25 response, and I think communication is

1 critical. And as you said, we all deal with  
2 information overload. I am a -- I look  
3 after several people, and one of them is on  
4 Medicaid in a nursing home, and I receive  
5 about 35 to 50 notices about her care a  
6 month. Not all from DMS, right? But it's  
7 very -- it is -- there is information  
8 overload, and it's just hard to sort through  
9 all that.

10 But I want to -- I want to underscore  
11 a second part of this. Communication of  
12 what's available is one thing. But the  
13 actual -- having actual appeal processes  
14 that are respectful of those making the  
15 appeal is one of the other parts that I want  
16 to emphasize. You know, the terminations  
17 that we've talked about that made the news,  
18 of course, reflect the due process in terms  
19 of terminating children who have chronic and  
20 ongoing conditions, should have raised red  
21 flags and there should never have been any  
22 kind of imposition on those families. That  
23 should've been caught sooner and earlier.  
24 Of course, we all know that.

25 But in addition, there needs to be

1           some accountability when mistakes are made,  
2           and not just, you know, "Okay, we'll put you  
3           back after we've scrambled your life and  
4           you've had to run for care and there's all  
5           these issues." Part of due process is  
6           making sure that there's accountability and  
7           reparation when mistakes have been made like  
8           that, and that's true especially for  
9           families, of course, receiving care, but  
10          it's also true for, you know, providers who  
11          have had to wait months and months and  
12          months for reimbursements or problems with,  
13          you know, helping to navigate various ways  
14          in which harm is coming to those while  
15          whatever process we have is. So it's not  
16          just communicating what process there is,  
17          but it's also ensuring that the processes  
18          are good.

19                MS. JUDY-CECIL: I can't disagree  
20          with that. And all I can say is that we  
21          don't have all the answers. If you all have  
22          recommendations on how we can make that  
23          process more respectful -- you know, I think  
24          we have tried to own the problem with what  
25          happened. It's something that happened

1 quickly. It was -- it started out small and  
2 then ballooned. And that's when it became  
3 -- you know, came to our attention. And I  
4 think we have been very open -- hopefully  
5 you all have felt that we've been very open  
6 to bringing concerns to us.

7 We -- I honestly, if it weren't for  
8 the fact that people were reaching out to us  
9 to make us aware, it -- that prompted us to  
10 be able to really investigate it. And the  
11 problem is that because that appeal process  
12 takes so long, and the reporting that we get  
13 -- which, by the way, we're revamping. You  
14 know, the reporting that we get is usually  
15 on a monthly basis, so you're not going to  
16 see the trend come if it's not being pointed  
17 out by our vendors early on. And that is  
18 something we've taken back to the vendor is  
19 you have to let us know when you're seeing  
20 these problems because they're ground zero  
21 in terms of they know immediately when  
22 they're seeing a trend, you know, happen  
23 like that.

24 So we are making changes in our  
25 processes internally to -- and not just with

1 the HCB Waiver, you know, kind of across all  
2 of our different programs and processes so  
3 that we can better identify things early on,  
4 but I'll be honest, we need you all. We  
5 need you all to tell us when you're seeing  
6 things, and I hope you know that we accept  
7 that and appreciate it. And I think, you  
8 know, as long as we continue to do that, I  
9 think we can always do better, so -- and  
10 work out the issue.

11 MR. GILBERT: Yeah. I mean, I think  
12 some of the things we've seen -- we've heard  
13 about, and I'll let others speak, is, you  
14 know, especially when we're talking about  
15 terminations in particular with children,  
16 although I think it should apply to all --

17 MS. JUDY-CECIL: Sure.

18 MR. GILBERT: -- which is it needs to  
19 be a "we're terminating you, but you've got  
20 -- that won't happen for 30 days." Not  
21 "we're terminating you, and in 30 days we'll  
22 review your case and maybe reinstate you,"  
23 right? These kinds of things are the kinds  
24 of fair due process that we would have in  
25 various other legal systems, and that's the

1 kind of thing I'd like to see more of as we  
2 move ahead and as we sort of revamp and keep  
3 fine-tuning.

4 And I do want to say, I do deeply  
5 appreciate the efforts, that communication  
6 and transparency, which I think are very  
7 good. And I think you're right, we can all  
8 help get those out there better, but it also  
9 matters that it's not just here, we're going  
10 to tell you about a terrible system. It's  
11 that we're actually going to tell you about  
12 a system that's not as terrible. That's  
13 what I think our goal is.

14 MS. JUDY-CECIL: Yeah, I think it's  
15 also important to understand that we have  
16 federal requirements that we have to meet.  
17 And that includes the notices, the language  
18 that is required in the notices, which we  
19 have a workgroup, a notice workgroup, that  
20 for years works to try to improve those  
21 notices. In fact, for the waiver  
22 specifically, there was a workgroup trying  
23 to make those a little more understandable,  
24 and allow us to check the box on, yes, this  
25 is what CMS requires us to have in the

1 notice and make it understandable.

2 And I will say, we are -- you know,  
3 we have the National Association of Medicaid  
4 Directors, and we meet regularly. And on  
5 that, when all the states are on that,  
6 there's a lot of states that say, "Has  
7 anybody solved the making the notice  
8 understandable problem?" You know, how can  
9 you make it shorter? How can you reduce the  
10 number of notices that go out? So it's a  
11 challenge to try to meet that federal  
12 requirement, and -- you know, and make sure  
13 that members are receiving a communication  
14 that is understandable to them.

15 DR. SCHUSTER: And also --

16 MR. GILBERT: That's a --

17 DR. SCHUSTER: Go ahead, Kent.

18 MR. GILBERT: No, I was pointing out,  
19 Holly has a good comment in the chat that --  
20 about perhaps some kind of reporting line.  
21 But I appreciate those responses. Thank  
22 you, Veronica.

23 DR. SCHUSTER: Yeah. I also think  
24 that we're on the verge of creating a  
25 Beneficiary Advisory Council, and that would

1 be the perfect place, obviously, for  
2 brainstorming, you know, communications and  
3 how people feel like they are treated. And  
4 I do think that a mechanism for quicker  
5 recognition, obviously, is one of the  
6 things. You want to nip these things in the  
7 bud before they grow.

8 Brian has his hand up.

9 MR. LEBANION: Yes. Thank you for  
10 allowing me to speak, Sheila. With all due  
11 respect, Veronica, I've heard you say that,  
12 you know, it takes the community, the  
13 provider community, and the recipients  
14 community to let you all know when things  
15 are awry in the programs, the Medicaid  
16 programs, and specifically, I'm talking  
17 about the waiver program today.

18 My background is that I worked for  
19 one of the largest Medicaid and waiver home  
20 health providers for over 20 years. So I'm  
21 very familiar with the waiver program. We  
22 were a safety net provider, which meant that  
23 we provided far and above the number of  
24 waiver services to recipients in the  
25 Commonwealth for many, many years. And I

1           actually, you know, was the administrator of  
2           the agency for a while, and am very familiar  
3           with the waiver program. And at no time --  
4           we had pediatric patients on the HCB Waiver  
5           program since the 1990s all the way  
6           through the program. So whenever I hear  
7           someone tell or state that, you know, the  
8           waiver program is not for pediatric  
9           patients, that is simply not true. It  
10          should not be a blanket that pediatric  
11          patients are denied services simply because  
12          they are a pediatric individual.

13                 But personally, I have a grandson who  
14          has autism that was denied services over two  
15          years ago. And I can tell you that we went  
16          through the appeals process, and at no time  
17          -- even though I communicated with members  
18          of the cabinet, at no time did I ever  
19          receive a response. Certainly, I'm not his  
20          guardian, but I would have expected some  
21          type of communication regarding just the  
22          general concerns that I brought to the  
23          Commonwealth, and I did this for over two  
24          years. Not only that, I've made public  
25          comments about the administration of the

1 waiver program and never received any  
2 feedback from the people that I've worked  
3 with, actually, for 20 years. So, you know,  
4 it concerns me greatly that the waiver  
5 program has continued to deny these  
6 services.

7 I will tell you that my autistic son,  
8 since I'm very familiar with the waiver  
9 program, definitely qualified for the  
10 services, but the clinician who administered  
11 the KHAT was in the home for less than ten  
12 minutes. That included grading, opening her  
13 computer, and completing the visit. And  
14 when she left, she said that the -- she saw  
15 no problems with him requalifying. Yet, we  
16 went -- had to go through the whole entire  
17 appeal process, and when I contacted the  
18 legal division of the cabinet, we were  
19 simply told to take it to court because they  
20 continued to deny his services even though  
21 we had his clinical therapist provide  
22 evidence, written evidence, that he -- his  
23 behaviors were related to his autism. So I  
24 do not think that the -- I don't think that  
25 we were heard. I think that I talked to

1 many people within the community where  
2 recipients are not heard. And  
3 unfortunately, you know, there's this  
4 misconception within the community that, you  
5 know, they have to be placed on the Michelle  
6 P. Waiver waiting list waiting for services,  
7 and that they can't get services any  
8 other -- through any other method when that  
9 has simply not been historically true, nor  
10 is it true today.

11 I understand that the criteria for  
12 the waiver, and I understand the criteria  
13 completely and thoroughly because of my  
14 background, and I can tell you that, you  
15 know, in my instance, that this child should  
16 have qualified. So with all due respect, I  
17 think that the cabinet has been informed of  
18 this problem for many years actually, and  
19 only recently have I seen this May letter to  
20 parents indicating that there was an issue  
21 with the waiver program. And I think I've  
22 had it in the chat, I think that, you know,  
23 this should have been publicly recognized,  
24 and to Kent's point, I think that there  
25 should be some accountability for these

1 children that have gone without services for  
2 many years that needed it. And, you know,  
3 what has the cost been to the Commonwealth  
4 while these children have not been given  
5 their option, and their option to receive  
6 services and the place where it's going to  
7 do them the greatest benefit?

8 And that's what I would say today.  
9 Thank you for listening.

10 DR. SCHUSTER: Thank you, Brian.

11 MS. JUDY-CECIL: Yeah, thank you,  
12 Brian. I promise you we'll take all that  
13 back, and I appreciate you sharing your  
14 story. It's helpful to us. You know, we  
15 can do better, and we will do better.

16 I will say, we are still -- I want  
17 folks to understand, we're still working  
18 through responding to the issue. We've  
19 developed solutions. One was sending the  
20 letter, re-reviewing every single denial,  
21 both for children and adults. That process  
22 is currently going, you know, we're doing it  
23 as quickly as possible, I promise you. All  
24 efforts, you know, Carmen is working on this  
25 at night, and we worked on it over the

1 weekend, last weekend. We're working on it.  
2 Part of the -- you know, part of the  
3 struggle that we have when we share  
4 information, especially something that is  
5 evolving, is that we want to make sure that  
6 we're communicating accurate information,  
7 and it takes us some time to really evaluate  
8 what has happened.

9 But I appreciate, Brian, your  
10 comments, and we will certainly take them  
11 back.

12 MR. LEBANION: And just really  
13 quickly, Veronica, there was a time frame  
14 mentioned in the letter that you all issued.  
15 Of course, my grandson's case goes back  
16 longer than that. So there have been issues  
17 with the waiver program farther back than  
18 what the letter indicated. Is there going  
19 to be any type of, you know, reparations or  
20 look back for children who have been -- were  
21 denied prior to the time frame within the  
22 letter?

23 MS. JUDY-CECIL: No. The change that  
24 resulted in the increase in denials happened  
25 in January. We are happy -- we have had

1           folks reach out and ask us, similar to you,  
2           Brian, that had an older case, and we were  
3           happy to take a look at it. But, you know,  
4           especially for folks that have gone through  
5           the appeal process, that is, you know, kind  
6           of the route that needs to happen for if  
7           someone disagrees with the fact that we have  
8           not overturned the denial. So again, we are  
9           happy to look at other cases if there's a  
10          concern, and certainly folks should reach  
11          out to the department.

12                   MR. LEBANION: Thank you.

13                   DR. SCHUSTER: Thank you, Veronica.  
14          Thank you, Brian, for those comments.

15                   Are there any other issues to come  
16          before the MAC under new business?

17                           (No response.)

18                   DR. SCHUSTER: All right. And we  
19          actually are ending early, which is a  
20          surprise since we took time out for the  
21          public forum, but glad that we could do  
22          that. Just a reminder that there are ways  
23          for you to continue to comment on the 1115  
24          Demonstration on Community Engagement,  
25          a.k.a. work requirement, and we will send

1 out those links, and they will be posted  
2 with the MAC meeting information on the DMS  
3 website.

4 So if there is not any other new  
5 business, we will adjourn. Our next meeting  
6 is scheduled for July 23rd. And I guess,  
7 Veronica, I have a question for you. And  
8 that is that's after July 9th. I mean, can  
9 the MAC meet on July 23rd?

10 MS. JUDY-CECIL: So we -- you know,  
11 we're pursuing the new -- to be compliant  
12 with federal rules, we will need to move  
13 forward starting July 9th with the new  
14 Medicaid Advisory Committee. So, you know,  
15 I don't think it would be appropriate for  
16 the Advisory Council to continue to meet  
17 past that date.

18 DR. SCHUSTER: Past July 9th?

19 MS. JUDY-CECIL: Mm-hmm.

20 DR. SCHUSTER: All right.

21 MS. PARTIN: And Sheila, I would like  
22 to make a comment.

23 DR. SCHUSTER: Yes.

24 MS. PARTIN: I don't know if I will  
25 be reappointed to the new Medicaid Advisory

1 Council, so I'd just like to say that it's  
2 been an honor and a privilege to serve for  
3 these years, and I hope that I get to  
4 continue because this is one of my -- one of  
5 the top things on my list that I feel is  
6 very important for the people in Kentucky.  
7 So if I don't get to see you all again,  
8 thank you.

9 DR. SCHUSTER: Well, and thank you,  
10 Beth, for your many years of serving on the  
11 MAC and serving as the MAC Chair for many  
12 years. We certainly appreciate that, and  
13 are hopeful that you can continue, since you  
14 are willing to continue.

15 MR. MARTIN: And this is Barry, and  
16 I'd like to echo the same thing because I  
17 don't know if I'll get reappointed or not.  
18 I've not been on here as long, but still,  
19 I've really enjoyed it, and would like to  
20 continue on. So if not, it's been great  
21 with you guys.

22 MS. EISNER: Nina, ditto.

23 DR. GUPTA: Sheila, this is Ashima  
24 Gupta, ditto as well. I will continue on  
25 the Physician TAC, but most likely, not on

1 the MAC. And it's been an honor.

2 DR. SCHUSTER: Well, I appreciate  
3 that. I appreciate the service and the  
4 input and expertise that you all have shared  
5 with us over the years.

6 So I'm a little bit concerned. I  
7 gotta think about this. That's a long, long  
8 time for us to go because we're talking  
9 about September to be determined, so I'll be  
10 sending out --

11 MS. JUDY-CECIL: Dr. Schuster, you  
12 know, you all are welcome to reschedule the  
13 July meeting to June, or to a date prior to  
14 July 9th certainly, and I understand that.  
15 And the reason for the time between July 9th  
16 and September -- a potential September date  
17 is we're planning training for the new  
18 members, and so there's going to be training  
19 done. And then, like I said, you know,  
20 we're going to work with them on dates that  
21 are convenient for them. So that's why  
22 there is a little bit of a lag between  
23 July 9th and when we might see the new  
24 meeting.

25 DR. SCHUSTER: Okay. Well, thank

1           you, Veronica. I might poll the members and  
2           see if we might want to schedule one more  
3           MAC meeting to give an opportunity for the  
4           TACs to report and to follow up on some of  
5           these things.

6                     We've had great discussion today.  
7           And we'll have a better idea -- we may have  
8           a better idea even by the June 1st --  
9           July 1st or 2nd or something like that, of  
10          who is going to be on the MAC going forward,  
11          which would be important. So to be  
12          determined. So we'll say farewell and thank  
13          you for now, but we may have one more shot  
14          at it.

15                    Thank you all very much and thank you  
16          to the DMS staff for being on and responding  
17          to our questions and issues and so forth.  
18          If there's not anything else to come before  
19          the MAC, then we will adjourn at this time  
20          thank you. Thank you.

21                   MR. MARTIN: Thank you all.

22                   MS. ROARK: Thank you.

23                   DR. SCHUSTER: Have a good Memorial  
24          Day weekend.

25                   MS. EISNER: Thank you.

1 DR. SCHUSTER: Thank you. All right.

2 Bye-bye.
