Provider Off-Cycle Revalidation Overview

CMS Provider Off-Cycle Revalidation Directive

Kentucky Medicaid has been directed by the U.S. Department of Health and Human Services (HHS) to complete off-cycle revalidations over the next 24 months. The goal of this off-cycle revalidation is to ensure the accuracy of provider enrollment data and confirm that only legitimate, qualified providers are enrolled and participating.

HHS Directive Deadline: June 06, 2028

DMS Provider Off-Cycle Revalidation Plan

During this off-cycle revalidation, KY Medicaid will focus on providers that have not revalidated in the last 12 months. KY DMS will prioritize the review of identified providers in the following order:

- High Risk
- Atypical (Providers with no NPI)
 - First Moderate risk
 - Then Limited risk
- Moderate Risk
- Limited Risk

DMS Provider Off-Cycle Revalidation Plan

Providers will be notified of their off-cycle revalidation requirement via notification from the Medicaid Partner Portal Application (MPPA) and will receive a revalidation letter outlining the action they need to take.

Providers will need to submit a revalidation in MPPA even if they revalidated in the last four years.
