1	February 1, 2024
2	1:00 p.m.
3	* * * * *
4	MS. BICKERS: You have a quorum so I will
5	turn it over to you.
6	DR. BURCHETT: Okay, thank you. Thank you.
7	And thanks, Everybody, for showing up.
8	We have got a quorum and we will
9	approve the minutes from the previous
10	meeting. I assume everybody's read those,
11	and do you have any issues with them? We'll
12	take a motion to approve and go from there.
13	DR. COMPTON: Mr. Chairman, Steve Compton,
14	I move to approve.
15	DR. BURCHETT: Good. Do we have a second?
16	That would be you, James.
17	DR. SAWYER: Yeah, can you hear me?
18	DR. BURCHETT: I can now.
19	DR. SAWYER: I second.
20	DR. BURCHETT: Okay. Well, any discussion
21	on them? Everything look okay to you guys?
22	DR. COMPTON: Looks fine.
23	DR. BURCHETT: Well, with no discussion,
24	all in favor of approving the minutes from
25	the last meeting say, "Aye."

1	(All members vote "Aye.")
2	DR. BURCHETT: Good. All oppose?
3	(No response.)
4	DR. BURCHETT: Okay. So to help Justin
5	what we will do is we will go ahead and
6	move down under New Business and let him
7	talk about, I think it was Community Health
8	Workers. And I think, Steve, that was
9	something you had that you were wanting to
10	talk with, too. So if we want to go ahead
11	and get started on that topic, we will do
12	that first.
13	DR. COMPTON: Cindy and I talked. We'd
14	just like to have a little more
15	information.
16	DR. BURCHETT: Sounds good.
17	MR. DEARINGER: Yeah, absolutely. Thank
18	you for letting me talk briefly about the
19	Community Health Workers. I didn't know if
20	you wanted just information or if you
21	wanted kind of a up-to-date where we were
22	as of today as far as billing and who's
23	billing and that type of thing.
24	DR. COMPTON: Justin, I think more general
25	information. I don't know that we are all

1 aware of their existence or what they can 2. do for our practice, much less how to 3 incorporate it or bill it or that sort of 4 thing. 5 MR. DEARINGER: Sure. Is there any way I 6 could share my screen, Erin? 7 MS. BICKERS: Yes, sir. I just made you a 8 cohost. 9 MR. DEARINGER: All right. Give me just a 10 second here. Let me -- all right. 11 So we'll just go through this real 12 quick then. This has actually not really 13 been updated. It needs to be updated, but 14 I'll kind of hit some highlights with you. 15 And it is just a few little slides here that 16 kind of give you the basic idea of Community Health Workers, what they do, and how they 17 18 are utilized and so forth. 19 So this is -- Community Health Workers 20 started -- were first billed starting in 21 January 1st of 2024. We have had some 22 people kind of use them in the past, as far 23 as the managed care organizations have used 24 Community Health Workers. They were able to 25 hire their own Community Health Workers.

We

just started being able to, you know, bill for -- let other provider types bill for Community Health Workers starting in January 1st, and we've been working on this and implementing this for a long time. We originally started about two years ago doing some research on the use of Community Health Workers, what they were doing in other states, how they were being used, what services that we could utilize them for and, you know, several intersecting conversations went into place. We had a work group on transportation and transportation issues. We had another work group on no-shows and no-show issues.

And so one of the things that continuously came up was that other states had those listed -- Community Health Workers Services listed as something that was kind of assisting with that.

So this is -- again, like I said, it continued to come up and we were able to come up with some program here that I think will be beneficial to all provider types.

Community Health Workers provide a lot of

1 services. To be able to qualify as a 2. Community Health Worker they have to be a 3 United States' citizen, employed, be at least 18 years of old, and have to maintain 4 5 That certification is held a certification. 6 by the Department for Public Health. 7 There's administrative regulation that they They have to follow that 8 9 administrative regulation, and basically the 10 things that are listed right here they have 11 to abide by, but then they also have to do 12 some education and training. The Department 13 for Public Health puts that training on, 14 holds that certification, and so they can 15 become certified as a Community Health 16 Worker. 17 The things that they are able to do 18 are preventive services, health promotion, 19 education. They can facilitate provider 20 communication, patient education, other 21 services, and so forth. And I left this in 22 presentation mode because I wanted you-all 23 to see some of the notes underneath, you 2.4 know, associated with that. 2.5 directive -- preventive services, or

1	services designed to slow the progression of
2	chronic diseases, including screenings,
3	health promotion education, prevention of
4	illness, all those different types of
5	things. Also facilitation between
6	beneficiary and a provider who have language
7	barriers, socio-economic issues, and then as
8	I had mentioned before, transportation
9	issues, which is something that we had
10	was a work group that we worked on where
11	Community Health Workers actually came up.
12	We find that a lot of the Community Health
13	Workers today are working with individuals
14	on transportation to and from appointments,
15	how to get those set up. They also work on
16	the no-show issue, which are missed
17	appointments, calling individuals, reminding
18	them of appointments, helping them schedule
19	appointments on their making sure it's a
20	time that they can come in, and then if they
21	do miss an appointment without calling,
22	calling them back, getting as much
23	information from them as they can, why they
24	missed the appointment without calling, so
25	on and so forth, helping them get set up

1 with a transportation provider if that's 2. what they need, and help them get set up 3 with a member of the Department for 4 Community-Based Services and Family Support. Maybe they need help with child care or some 5 other field or area. A lot of times we'll 6 7 find out they will have two different 8 appointments near the same time on the same 9 day, things like that, that Community Health 10 Workers can help them manage those 11 situations, and be able to get them the 12 assistance that they need in those arenas. Again, navigation, health navigation and 13 resource coordination, they are reaching out 14 15 to these transportation brokers, they are 16 reaching out to different providers, provider types, helping them find a provider 17 18 in their area, helping them to manage all 19 those different things, you know, helping 20 them get transportation to pharmacies and 21 things like that. 22 Health education and training, making 23 sure that they get the proper immunizations 24 that they need, help them control blood 25 pressure and monitor blood pressure, monitor

diabetes, have STD checks, if needed, things like that.

There's also Health Promotion Coaching. So they work on the cessation of tobacco use, or reduction of drugs and alcohol, getting them in treatment facilities or centers, if that's something that's needed. Talking about family planning, control of stress, making sure that they get prenatal care and infancies and postpartum care, which is -- we found in some of the studies that we have taken on a lot of the issues that women have with, you know, hospitalization during pregnancy, lack of prenatal care, and just a lack of education of the ability and availability of that prenatal care. So a lot of different things in that arena for CHWs to do.

So a lot of different -- you know, we talk about what provider types can bill for CHWs. They are alcohol and other drug entities, behavioral health services, community mental health centers, FQHCs, hospitals, local health departments, primary care, rural health. And then other

25

1

2.

2.5

providers that are used by Department for Medicaid Services, and I'll -- I'll show you another screen in a minute that goes over all the providers that are currently billing for those services.

These are the billing codes for Community Health Workers, or CPT codes. There's three of them. The first CPT code is for one patient. If you have a Community Health Worker that's working with an individual patient, it's in 30-minute increments. That is the rate. And if they are talking to two to four patients, it's a different rate, and five to eight patients is a different rate. So they are billed in 30-minute increments.

Regarding limitations -- so you see right there it says limited to two units per week per member. No more than 104 units per calendar year. We are kind of decreasing some of those limitations and increasing -- not decreasing, but increasing some of those limitations and eliminating some of the other language. So that's about ready to increase on the limitation amount.

MCOs reimburse for CHWs, and they can hire their own CHW. So there may be CHWs working for the MCOs currently that they may have. So that's just kind of a brief overview of what they do. It's a really quick synopsis. And as of right now in 2024, we have about 657 claims that have been submitted up to this point, still in the month of January. We have about 657 claims. Close to -- it's \$47,000 billed. We have had claims from rural health clinics, primary care, FQHCs. We have had claims from physicians, physician groups, hospitals and APRNs.

So optometrists are a group that is allowed to bill for Community Health
Workers. We haven't had any claims from the optometry group yet, but hopefully we will maybe in the future. But this is a -- we are currently looking at a couple of other provider types that want to include
Community Health Workers and we are working on trying to get those integrated.

But it's a great tool depending on what your needs are. If you have an office

1	that needs an individual to meet with
2	someone, go through their care options,
3	their transportation options, you know, that
4	that's something that Community Health
5	Workers do. But they also can to meet with
6	someone and go through healthcare prevention
7	or, you know, in your all's case they could
8	meet with an individual and go through, you
9	know, the use of their glasses or contacts
10	and, you know, how to when to come in and
11	how to clean things, and how to work on
12	things, how to wear certain things. So
13	there's all kinds of different functions and
14	uses that Community Health Workers have.
15	But we started that, again, January 2024,
16	and some other provider types are using that
17	very successfully. So if you have any other
18	issues or questions, or thoughts, let me
19	know. Again, I know that was real brief.
20	DR. BURCHETT: Quick question then, because
21	we are looking at that for managing some of
22	our glaucoma and macular degeneration
23	patients, things like that. You talked
24	about the certifications. How do they
25	achieve those?

1	
1	MR. DEARINGER: So they contact the
2	Department for Public Health. They have an
3	office. They have individuals and I can
4	get you I can get Erin all that
5	information and she can e-mail all that out
6	to the TAC. They have an office that they
7	do those things and they have actually
8	you know, I think it's a whole branch that
9	does the certifications for Community
10	Health Workers. They also, I think, do
11	some referrals so people can get ahold of
12	and get in touch with certified Community
13	Health Workers for hire and contract and
14	things like that. So I'll get you that
15	resource, or to Erin, and have her e-mail
16	it.
17	DR. BURCHETT: Okay. Thanks, Justin.
18	Any other questions?
19	DR. MUNSON: I have one. Wait, I have one.
20	I'm sorry, I couldn't get off mute fast
21	enough. This is Dr. Munson.
22	And I may have missed this. Is that
23	both in-person and virtual that those codes
24	can be paid for?
25	MR. DEARINGER: Absolutely.

1	DR. MUNSON: So it can be virtual, like on
2	a Zoom call, it could be a phone call, or
3	it could be in-person training?
4	MR. DEARINGER: That is correct.
5	DR. MUNSON: Okay. Awesome. Thank you.
6	MR. DEARINGER: That's one of the things we
7	want to make sure we did. I mean, it's
8	vital and imperative to be in-person. The
9	uses is amazing. But one of the things we
10	wanted to make sure that we had all
11	telehealth capabilities, especially for
12	individuals that didn't show up to
13	appointments and didn't call, so that they
14	had a way to reach out, contact people,
15	work through those issues via telephone and
16	still be able to be reimbursed.
17	If you-all have any other questions,
18	need anything else, feel free to reach out.
19	And I'll send Erin that information and have
20	her get that out to you-all.
21	DR. BURCHETT: Sounds good. Thank you,
22	Justin.
23	MR. DEARINGER: And real quick before I get
24	off the phone, we are almost completely
25	through with the contact lens reimbursement

1	fee schedule, so we'll be sending that to
2	you-all right before we post it just for
3	any final thoughts. But I really
4	appreciate the TAC's help with assisting in
5	your all's comments and thoughts with that.
6	It's been a good collaborative work and I
7	appreciate it.
8	DR. BURCHETT: Thank you for allowing us to
9	help collaborate.
10	Okay. So that was there under the New
11	Business for the Community Health. I'm
12	going to continue down the New Business and
13	then we'll circle back to the Old Business,
14	if that's okay, since we are there in New
15	Business.
16	Next the TAC would like to hear a
17	little bit about the non-emergency medical
18	transportation that helps to transport
19	Medicaid recipients to their appointments,
20	from the Department or if the MCOs have any
21	information to share on that topic.
22	MS. DOWNEY: This is Becky Downey. Can
23	you-all hear me?
24	DR. BURCHETT: Yes.
25	MS. DOWNEY: I'm with the Department for

1	Medicaid Services. What kind of questions
2	do you have, or what would you like to
3	what do you want to know about?
4	DR. BURCHETT: Steve, am I mistaken is
5	this one that you brought to us?
6	DR. COMPTON: I don't think so, other than
7	we heard about it from the MAC, about the
8	Community Health Workers. I was not aware
9	of any of these things. I guess the
10	questions are how do you use it; who do you
11	call?
12	MS. DOWNEY: There's a list that we have.
13	The entire state is broken down into
14	regions. There are 16 regions, and each
15	region has anywhere from one county up to,
16	you know, six, seven, eight counties,
17	depending on their sizes and the need in
18	each county. I can send Erin the list and
19	it tells you all the counties and who the
20	broker is, which is who they would call,
21	and then, of course, the brokers' phone
22	numbers. And there's an e-mail address,
23	too, but we suggest calling. But that
24	go ahead.
25	DR. BURCHETT: That would be for the

1	Medicaid recipient to call to set it up?
2	MS. DOWNEY: Yes, yes.
3	DR. BURCHETT: Okay. Can providers call?
4	MS. DOWNEY: I do not think so, because our
5	transportation broker looks at each member
6	that needs transportation to make sure
7	they're eligible.
8	DR. BURCHETT: Sure, sure.
9	MS. DOWNEY: Yeah, because there is a few
10	issues about, you know, if they have a
11	vehicle in the house and if it's in their
12	name and is it operable or inoperable. And
13	so there's a few things that they have to
14	check for eligibility. So, no, I am 99
15	percent sure providers cannot do that.
16	DR. BURCHETT: Well, and maybe not us call
17	to facilitate, but I do know I have
18	patients in my McKee office that don't have
19	phones.
20	MS. DOWNEY: Oh.
21	DR. BURCHETT: So is there ways that, you
22	know, we could call and let the person talk
23	from the patient talk from our office to
24	them to arrange different transportations?
25	MS. DOWNEY: Yes. Yes, you can do that.

1	Yes, sir.
2	DR. BURCHETT: Okay. Yeah, I was just
3	thinking, because I know there are several
4	that don't have phones for sure.
5	MS. DOWNEY: Gotcha. Yeah. No, you can do
6	that. Not a problem.
7	DR. BURCHETT: I guess the e-mail might
8	work for them, but I don't know if they
9	have e-mail either.
10	MS. DOWNEY: Right. Understood. But it
11	seems to I, myself, I do worry about
12	e-mail getting answered as quickly as, you
13	know, they might need it. So that's why I
14	always tell everyone to call.
15	DR. BURCHETT: Sure, sure. And that would
16	be for non-emergency transportation. Like,
17	I'm assuming what we mean by that is if
18	they are coming for their yearly exam,
19	things like that.
20	MS. DOWNEY: Yes, exactly.
21	DR. BURCHETT: Okay, yeah.
22	MR. DEARINGER: This is Justin Dearinger.
23	I just want to reiterate this non-emergency
24	transportation is for everything that's not
25	ambulance related. So any kind of, you

1	know, visit that they would need for your
2	all's offices, they would be available for
3	transportation through any non-emergency.
4	DR. BURCHETT: And so then referrals from
5	our office to a specialist say, they
6	were having a retinal detachment and they
7	needed to go immediately from our office,
8	that would be emergency transport; right?
9	MR. DEARINGER: Well, yeah, as long as they
10	were going, you know, by ambulance, that
11	would be you know, if you had an
12	ambulance coming and picking them up and
13	taking them, that would be, you know
14	DR. BURCHETT: Well, typically typically
15	we don't send them by ambulance for that,
16	but that would be whoever brought them
17	typically takes them.
18	MR. DEARINGER: Yeah. So in that case they
19	could absolutely use NEMT. If it's not an
20	emergency situation that they need
21	transportation to a hospital, they are just
22	going to another provider that you referred
23	them to, then they could use NEMT for that.
24	DR. BURCHETT: Even same day?
25	MR. DEARINGER: Sure. Now, there's certain

1	rules that the transportation has set up.
2	They ask for so many hour notice and all
3	those type things, but
4	DR. BURCHETT: Right.
5	MR. DEARINGER: you know, they can set
6	up whatever they need to set up, and
7	sometimes they're, you know, pretty good to
8	work with if there's certain things that
9	pop up during the day.
10	DR. BURCHETT: Sure. Any other questions
11	from the TAC?
12	Okay. Well, moving on to the next one
13	there. Steve, I'm going to let you jump in
14	on discussing the recommendation from
15	Dr. Gupta.
16	DR. COMPTON: Dr. Gupta is an
17	ophthalmologist by training, but she
18	represents Physicians TAC, and at the
19	November meeting they submitted a formal
20	recommendation asking DMS to do a cost
21	study on what it would cost to get
22	physicians' fees tied to the Medicare rate.
23	North Carolina apparently does this. And
24	I'm paraphrasing. It's been three months
25	since the meeting.

But the two things that concern me is, one, we want to be included, and I think the recommendation said physicians and we are defined as physicians under DMS, as I understand it. But she also -- I looked up the minutes a minute ago -- she also included obstetricians, gynecologists also being included as primary care. So I just wanted to make -- if those fees are adjusted, I want to make sure we are included.

The other thing, she ran a list of CPT codes to be researched, and I don't think the 92000 ophthalmologic codes were in her list, and I suppose we should make the recommendation that those be added, that we be included, maybe added, or maybe that's something that administratively can be taken care of. But the 99000 codes were included and she had a big range, but I don't recall her including the 92000 ophthalmology codes. So I just want to make sure we are not getting left out.

DR. BURCHETT: So I would ask the Department, is that something that can be

1	just added to look at if that moves
2	forward, or do we need to make the formal
3	request to add the 92000 codes?
4	DR. COMPTON: The Department has responded
5	to that recommendation, but I don't have
6	that in front of me, so I can't I did
7	forward it to the KOA office, I think. Is
8	there anybody on here from DMS that can
9	respond to that?
10	MS. BICKERS: My apologies, Dr. Compton. I
11	was trying to pull up the response from
12	DMS. My apologies. And then I couldn't
13	find my mute button.
14	DR. COMPTON: Okay, thank you.
15	MS. BICKERS: Okay. Too many screens; too
16	many things open. My apologies.
17	The response states that DMS will
18	prepare a cost estimate. Please note the
19	budget process will determine if additional
20	funds are allocated to the physicians' fee
21	schedule. The budget process will be
22	determined during the 2024 Kentucky
23	Legislative Session. Also, any changes to
24	the physicians' fee schedule will be
25	applicable to fee-for-service only, and

1	providers would have to negotiate rates with
2	the managed care organizations.
3	DR. COMPTON: I suppose it's wait and see.
4	But the question is are we included, and
5	are the ophthalmology codes included? Do
6	we need to make a formal recommendation to
7	add that, or is that part of the process
8	already?
9	MS. BICKERS: What I can do, Dr. Compton,
10	if you like this is Erin is I can
11	follow up with Justin and the policy group
12	to see what was included in that
13	recommendation. To be honest, it's a
14	little outside of my wheelhouse, so I'd
15	have to follow up with the subject experts.
16	But I will put that on our follow-up list
17	and get that information to you right away.
18	DR. COMPTON: Thank you. That would be the
19	easiest route. Let's go from there. Thank
20	you.
21	MS. BICKERS: You're welcome.
22	DR. BURCHETT: Sounds good. Any other
23	questions from the TAC on that
24	particular okay. Good deal.
25	Let's move back up to Old Business

1	and, once again, for DMS. Is there any
2	update on communicating with the Board of
3	Examiners on them sending the license
4	renewals to you-all?
5	MS. DUDINSKIE: This is Jennifer Dudinskie
6	with Program Integrity. I have great news.
7	We have finally I know after all
8	these months, I'm very happy to report we
9	have received the first file on
10	January 25th. So we are in the process of
11	looking at that, matching it up. And so we
12	have it seems like we have a good
13	contact now. She did state that there will
14	be another update soon because of I guess
15	the expiration date on the file that they
16	sent to us. So we will remain in contact
17	with them and hopefully we will have this
18	up and going very soon.
19	DR. BURCHETT: Good, good. We'll probably,
20	I guess, circle back at the next TAC
21	meeting to see where it stands again, but
22	thanks for the good update. That's
23	encouraging news.
24	MS. DUDINSKIE: You're welcome.
25	DR. BURCHETT: Once again, any other

1 questions from the TAC on that point? 2. So, Dr. Compton, I'll go back 3 to you --DR. MUNSON: Wait, wait. I'm sorry. 4 5 mute button is just... So does that -- this is a question for 6 7 Jennifer. Does that mean that as of now our 8 providers still need to do status quo where 9 they need to upload their license to the 10 portal and, like, certify, or whatever? 11 have to go in there to verify that it is our 12 license, it is us, until further notice? 13 Because I thought that was the goal, was 14 that we didn't have to do that anymore. MS. DUDINSKIE: Right. But we just 15 16 received the file on the 25th. So we 17 haven't had time to make sure that there's 18 a seamless transition there. So we got 19 their file; we have to enter that into our 20 system. But, yes, that is the goal. 21 Hopefully we will be there very soon. 22 have made a huge stride in getting the 23 data. So that is the goal and I will be 24 happy to give you-all an update at your 25 next meeting on where we are with that.

1	DR. MUNSON: But just to confirm that we
2	need to make sure that every Medicaid
3	provider is still doing what they had in
4	the past, uploading their license, and
5	verifying it within the state website.
6	Nobody should be just doing nothing and
7	thinking it's handled?
8	MS. DUDINSKIE: Correct.
9	DR. MUNSON: Okay. I just wanted to make
10	sure we give everybody direct orders. So
11	the hope is that maybe when it comes around
12	next year we will have this kind of process
13	done, and then maybe next year it will just
14	get magically get uploaded; is that
15	correct?
16	MS. DUDINSKIE: Well, that is the goal.
17	DR. MUNSON: Yes. Okay, good. Thank you.
18	DR. BURCHETT: Okay. Are you satisfied,
19	Dr. Munson?
20	DR. MUNSON: Yes.
21	DR. BURCHETT: Okay, good deal. Good deal.
22	Okay. So moving on now back to you,
23	Steve.
24	DR. COMPTON: Yeah, this was on the last
25	TAC agenda as well. And I think it's just

1 with Avesis, is the only -- we have a 2. patient coming in and we'll check the DMS 3 portal, and the Avesis portal, and it's, 4 you know, middle of the month, 15th, 16th, 5 and they both say the patient is eligible. We see the patient. Bill them, bill the 6 7 managed care -- well, bill the 8 subcontractor for the MCO. Get our money, 9 and then sometime later we get a letter 10 saying, oh, the patient wasn't eligible on the date of service, we are going to recoup 11 12 the money. And then we write a letter, 13 include all -- we made screenshots of 14 everything we check, and send it in. And 15 so far I don't think they have taken any 16 money back, but there's some out there that 17 we haven't heard back from. But I don't 18 know what the hiccup is that -- if all the 19 portals we check say they are eligible. 20 This is not like on the first day of the 21 month. We know that's not always up to 22 Then it's just -- it's a huge date. 23 administrative task. Plus, we're kind of 24 at risk. They can take back any money any 25 time, you know. If we do it wrong, we just

have to live with it, but -- so after last month, we got an e-mail telling us how to enroll our clients, but that's -- that's not what I was talking about. If all the portals say they're eligible and we see the patient on the date that they are eligible, there shouldn't be any question about recoupment of fees.

MS. ALLEN: Hello, Dr. Compton. This is Nicole Allen with Avesis. Thank you for your feedback.

DR. COMPTON: Hello.

MS. ALLEN: Hi, there.

Unfortunately, the portals are not a guarantee of eligibility. As you know, Medicaid throughout the United States, throughout the country, is going through a revalidation process. So right now we are having more activity with eligibility than we have seen in years. And as Avesis is —the MCOs are making a number of different outreaches to the members. Your offices are also telling members if they are up for revalidation; DMS is telling the members if they are up for revalidation. If the member

1 does not revalidate timely, but then does so 2. at a later date, you will see some activity 3 on their eligibility status. When the 4 member does update the eligibility 5 information, their eligibility is reinstated without activity. But, unfortunately, you 6 7 are 100 percent correct, that can impact 8 claims processing and that's across the 9 board. So, you know, if that patient 10 received the inpatient service within that service period, or if they received, you 11 12 know, whatever -- if they went to a medical 13 doctor within that period, unfortunately 14 that's a possibility. But it happens in 15 commercial. It happens, you know, in all 16 lines of business that we operate in. 17 But the processing of the eligibility 18 files by Avesis is completed within a 19 certain amount of hours that we receive it 20 from the MCOs, and they process it daily 21 from DMS, and once a month we process a 22 monthly full file. So we process daily 23 files and monthly full files. 24 If there ever is a scenario where you 25 saw the patient, both the MMIS and Avesis

1 systems state that the member is active, 2. there is retroactivity or there is a 3 termination that occurs after the claim is 4 processed, you have the appeals process you 5 can do. You can also reach out to Avesis' 6 customer service team or provider relations 7 and share with them the scenario. And we do 8 have that eligibility team that is dedicated 9 to their finding the eligibility status of 10 the member on MMIS or on DMS's system. So they will actually go into DMS's system and 11 12 if there is a discrepancy where DMS says 13 they are active and Avesis says they are 14 not, and that may just be to the timing of 15 the files being processed, we will go up and 16 we update Avesis' system to match DMS, and 17 then that will -- that will trigger the 18 system to adjudicate or re-adjudicate that 19 claim. So you don't necessarily have to go 20 through the appeals process, you know, 21 provide the copies and do the research and 22 your time to -- your staff spend the 23 administrative time to do that. 24 We could handle that or we can handle 25 that through a call in to our customer

1	service team. But we will have one of the
2	PR reps reach out to you. And, I apologize,
3	I can see your office manager's face, your
4	biller's face, but I can't think of her
5	name, and I apologize for that. But we can
6	reach out to her and share those contact
7	numbers with her so that she knows how to go
8	through that process as opposed to doing the
9	appeal.
10	DR. COMPTON: Thank you. Her name is
11	Cindy. She's actually sitting
12	MS. ALLEN: Cindy, yes.
13	DR. COMPTON: I can put the camera on her
14	if you want to see her face.
15	I don't know, it just seems there's
16	a disconnect there. If everything says
17	this is like the middle of the month.
18	Everything says they're eligible, but that's
19	no guarantee of payment. It's like, why
20	bother, you know.
21	MS. ALLEN: Yeah, yeah. Yes, I understand.
22	I know when I first entered into the market
23	it was something that happened more
24	frequently, then it happened very
25	infrequently. So the Kentucky market is

1	not you know, you guys aren't used to
2	this. Other markets we get this a lot
3	on the Medicaid line of business. But,
4	again, I think it's primarily due to the
5	revalidation process. DMS has been
6	wonderful with, you know, granting
7	extensions. The federal government has
8	been wonderful with granting extensions to
9	help or to give members more time to
10	revalidate, but, unfortunately, if they
11	don't, they do lose eligibility until they
12	complete the process.
13	DR. COMPTON: Okay. That's all I had,
14	Matt.
15	DR. BURCHETT: Okay. Any other questions
16	on that topic from any of you-all?
17	Okay. Well, let me look at my list
18	and make sure I didn't skip anything. I
19	don't think I have.
20	I do have a general discussion topic,
21	mainly for the Department. So I'll throw it
22	out there. If let's go back. All the
23	codes that are listed on the vision fee
24	schedule, the MCOs and/or the vision
25	providers are required to pay those codes;

ı	
1	correct?
2	MS. ALLEN: I apologize, Dr. Burchett. Was
3	that question for DMS?
4	DR. BURCHETT: Initially, yes.
5	MS. ALLEN: Okay.
6	MS. BICKERS: I'm trying to scroll to see
7	who might be able to address that. I'm not
8	seeing Justin. I can take that back,
9	because I don't want to speak incorrectly.
10	DR. BURCHETT: No, and I don't want you-all
11	to either. That's not what I'm trying to
12	do. I'm just trying to kind of clear the
13	air. So I'll go on with my thought, my
14	stream of thought here.
15	It was my understanding that they did
16	as long as there weren't any, you know,
17	frequency limitations that have been met
18	and/or they have a prior authorization
19	process that we have to go through for some
20	kind of testing code, like a visual field,
21	or OCT or something like that. It was my
22	understanding that there weren't anything in
23	place like that; like they had maybe an LCD
24	that lists, you know, these diagnoses are

25

appropriate for that particular code of

1 test, things like that; that if those things 2. weren't in place and the code was there, 3 then they should pay it without any hassles. 4 My thought on that is we have got an awful 5 lot of backup on what on our end seem to be clean claims, that when we try to contact 6 7 people and send them back in, they are clean 8 claims that have been denied for one reason 9 or another. I'm not sure exactly why. I'd 10 have to ask my billing people. But I do 11 know that we have a huge stack of claims. 12 Not all of them are clean, for sure. make our mistakes. And I know Avesis was --13 14 recently, I think it was Catherine? I might 15 be missing the name, but was in, helping us 16 go through some of our claims from Avesis 17 recently, and we appreciate that. But past 18 that, if we continue to have issues of clean 19 claims getting denied and/or things that we 20 appeal that get denied from the MCOs, what 21 is our recourse through the Department to 22 have the Department step in and look at it? 23 Is it going to be the new MCO dispute form 24 that the MAC had, I think it was last time 25 put out?

1 MS. BICKERS: Yes, sir. This is Erin. 2. can -- I can answer that one. 3 So any time a provider is having 4 some issues with any of the MCOs or their subcontractors, we encourage the provider to 5 fill out that dispute form and e-mail it in. 6 7 I believe there is also an Excel sheet. T ' m 8 happy to share this with the TAC after the 9 meeting for examples in claims, and then DMS 10 can kind of step in and try to help facilitate a resolution. So we are really 11 12 trying to -- I know they put a lot of work 13 into revamping that form to make it more 14 user friendly for the providers. So we are 15 really trying to encourage all providers 16 having any kind of issues to go through that 17 route, because it is also monitored and 18 tracked for trending issues. 19 DR. BURCHETT: Okay. So I just wanted 20 to -- and I don't -- like I said, I don't 21 have any super specific examples. I just 22 know it had been brought to my attention, 23 what's that process. So I just wanted to 24 clear up what that was so that we could put 25 it out to our optometrists across the state

1	if they are having issues that they can't
2	seem to get resolved, where they can go to,
3	maybe get some relief of that.
4	So that would be all I had on that
5	issue, unless one of the other TAC members
6	had any thoughts to that and/or have other
7	issues they would like to talk about.
8	No takers? Gary, you have been awful
9	quiet this meeting.
10	DR. UPCHURCH: Been a long morning. Sorry
11	I got on late.
12	DR. BURCHETT: That's fine. I was just
13	making sure you weren't asleep.
14	DR. UPCHURCH: No. I'm here.
15	DR. BURCHETT: That's all I had on that
16	topic. So, Erin, if you can send that
17	along to us so we can make that information
18	available to people, that would be great.
19	MS. BICKERS: Absolutely.
20	DR. BURCHETT: And then that's all I have,
21	unless somebody else has another item that
22	was pressing that they thought of in the
23	last two or three days.
24	Nothing? No? Okay. Well, if that's
25	the case, then I will entertain a motion to

1	adjourn.
2	DR. MUNSON: I make the motion to adjourn.
3	DR. COMPTON: Second.
4	DR. BURCHETT: All in favor?
5	(All members vote "Aye.")
6	DR. BURCHETT: Good deal. Our next
7	meeting before we get off is, what,
8	May 2nd? Does that sound familiar to
9	everybody, just to make sure? Yeah, okay.
10	Well, like I said, that's all I've got.
11	You-all have a good afternoon. Appreciate
12	you-all coming.
13	* * * * * *
14	THEREUPON, the Optometric TAC meeting was
15	concluded.
