

CABINET FOR HEALTH AND FAMILY SERVICES
DEPARTMENT FOR MEDICAID
PERSONS RETURNING TO SOCIETY FROM INCARCERATION
TECHNICAL ADVISORY COMMITTEE MEETING

Via Videoconference
May 9, 2024
Commencing at 9 a.m.

Tiffany Felts, CVR
Court Reporter

1 APPEARANCES

2
3 BOARD MEMBERS:

4 Steve Shannon, TAC Chair

5 James Daley (Not present).

6 Shawn Ryan, MD (Not present).

7 Dr. Shannon Smith-Stephens (Not present).

8 Brandon Harley

9 Adrienne Bush

10 Van Ingram

11 Casey Michalovic

12 Kristin Porter

13 Kevin Sharkey

14 Angela Darcy

SWORN TESTIMONY, PLLC

Lexington | Frankfort | Louisville

(859) 533-8961

1 MS. BICKERS: Good morning, this is
2 Erin with the Department of Medicaid. It's
3 not quite nine o'clock and we're still
4 clearing out the waiting room, so we'll give
5 it just a few moments before we get started.

6 MR. SHANNON: Okay, thanks, Erin.

7 MS. BICKERS: It is nine o'clock --
8 excuse me -- and the waiting room is
9 cleared. Steve, I saw you, Brandon,
10 Adrienne, and Casey, Kristin, and Kevin.
11 Did I miss anyone else?

12 MR. SHANNON: I don't think so, and
13 that's a quorum, correct? Seven of twelve.

14 MS. BICKERS: Yes, sorry, I had to
15 count for a moment.

16 MR. SHANNON: All right, very good.
17 All right, folks, welcome to the May meeting
18 of the -- now, we should go with the reentry
19 TAC. And we did our kind of roll call and
20 introductions, and we have a quorum. So I
21 sent out the minutes, is there a motion on
22 the minutes from the March meeting?

23 MR. HARLEY: Motion to approve.

24 MR. SHANNON: And a second?

25 MR. INGRAM: Second.

1 MR. SHANNON: Second. And all in
2 favor?

3 (Aye).

4 MR. SHANNON: Thank you, very good.

5 MS. BICKERS: Van and Kevin, I need
6 your cameras on when you vote, I'm sorry.

7 MS. PORTER: And I do not have --
8 this is Kristin.

9 MS. BICKERS: Oh.

10 MS. PORTER: And I don't have my
11 camera on either. I am driving to my
12 office; I'll be there in ten minutes to put
13 my camera on.

14 MS. BICKERS: Okay, Steve, do you
15 mind if we revisit so all of our voting
16 members are on camera during voting, so we
17 are in compliance?

18 MR. SHANNON: Yes, that would be
19 fine.

20 MS. BICKERS: Thank you. Appreciate
21 it --

22 MR. SHANNON: Anything I can do to
23 help.

24 MS. BICKERS: -- sorry about that,
25 guys.

1 MS. PORTER: Thanks, everyone, I
2 apologize. I have two meetings back-to-back
3 this morning.

4 MS. BICKERS: No worries.

5 MR. SHANNON: Yeah, and, Erin, the
6 website, the link isn't the new link.

7 MS. BICKERS: It's being pushed
8 through publishing.

9 MR. SHANNON: Okay.

10 MS. BICKERS: And I'm not sure what
11 happened there because I know Kelli updated
12 it. I walked her through how to do it when
13 she got her editing purposes so --

14 MR. SHANNON: I just got a message
15 from someone --

16 MS. BICKERS: -- Beth, our
17 communication liaison is on it.

18 MR. SHANNON: -- who reported they
19 can't get on because of that --

20 MS. BICKERS: Okay.

21 MR. SHANNON: -- so anyway, just so
22 you know.

23 MR. INGRAM: Yeah --

24 MS. BICKERS: I'm happy to forward it
25 if needed, the invite.

1 MR. SHANNON: Yeah, I think we could
2 get lost in that process, but it was Marcie
3 Timmerman, I don't know if you have her
4 email, I don't have it handy, but I suspect
5 there's other folks who --

6 MS. BUSH: Steve, I'll send it to
7 her.

8 MR. SHANNON: Okay, thanks, Adrienne.

9 MS. BUSH: Sure.

10 MR. SHANNON: I think there's
11 probably other folks have the same problem
12 perhaps, but we won't deal with that right
13 now. If I get any other messages, I'll let
14 you all know.

15 So let's do our DMS update.

16 MS. SPARROW: Hi, Steve --

17 MR. SHANNON: Hey, Angela.

18 MS. SPARROW: -- it's Angela Sparrow,
19 good morning. I think we, again, had talked
20 about presenting some information following
21 our ACRES kick off in terms of the 1115
22 reentry.

23 MR. SHANNON: Mm-hmm.

24 MS. SPARROW: So again, we're
25 prepared to do that this morning if we

1 wanted to jump into that discussion. But
2 I'll pause, I'm not sure if Leslie was able
3 to make it on yet.

4 MS. HOFFMANN: This is Leslie,
5 Angela, I didn't have any specific updates
6 other than I wanted to listen to your
7 presentation today.

8 MS. SPARROW: Okay. All right, let's
9 go ahead and do that. Let's see, Erin, I'm
10 going to --

11 MS. BICKERS: You should already be a
12 cohost, Angela.

13 MS. SPARROW: Okay, thank you. Okay,
14 let's -- all right, can everybody see the
15 slides?

16 MR. SHANNON: Yes.

17 MS. SPARROW: Okay. All right, so
18 again, we just kind of wanted to recap and
19 share some information, and we'll go through
20 this. Some of you all, again, are familiar
21 with this I hope. And then some of you,
22 again, just kind of want to give you an up
23 to date in terms of the reentry application,
24 where we are, what the plans are, and kind
25 of the how we intend to design and implement

1 moving forward.

2 So again, just wanted to recap for
3 anybody who's not maybe familiar with -- we
4 continue to talk about section 1115
5 demonstration. And so what does an 1115
6 demonstration mean? And again, it's really
7 what it states it is. And so it is an
8 opportunity for states, as we've talked
9 about, for Medicaid agencies to demonstrate
10 or pilot projects, services, ways to deliver
11 services, flexibilities in benefit packages
12 and so forth, again, to improve outcomes of
13 our individuals in the Medicaid program.

14 And so again, once approved, it
15 allows the states to really operate outside
16 of, you know, our typical rules and
17 regulations. And again, it is to
18 demonstrate and pilot things that are not --
19 that cannot be approved in our state plan.

20 And so with that being said, it's
21 extensive monitoring, and again, reporting
22 to CMS to allow for these flexibilities.
23 And again, the states are really held to,
24 you know, terms and conditions of the
25 approval that we need to ensure that we're

1 meeting. As well as, again, we have to
2 really kind of take a look at our spending
3 and our expenditures, right? And so again,
4 there's the budget neutrality piece and
5 component that we continue to speak to, but
6 we also have to demonstrate that the state
7 is not spending more through the
8 demonstration than we would otherwise.

9 And so that -- I know that that
10 sounds tricky, but there's ways, again, to
11 go about that, and so that's, again, part of
12 the approval process. So when we continue
13 to talk about and you hear 1115s, that's
14 again, an opportunity. And so there are
15 specific demonstrations CMS has given states
16 the opportunities, and then again, states
17 can request things outside of those that
18 are, you know, specific to their state.

19 And so with that being said, again,
20 it's typically -- you know, the approval and
21 negotiation process can be extensive for
22 that in meeting those terms. So not -- you
23 know, again, CMS is not going to approve and
24 say "okay" to everything. And so everything
25 just can't be done under an 1115, it's just

1 not that simple. But we are, again,
2 thankful to have the opportunity for states
3 to use these demonstrations.

4 And so in terms of the reentry
5 demonstration, again, I think that we've --
6 most of us have spoken to really the needs
7 of the population -- of this population and
8 for those individuals that are just as
9 involved in returning back into our
10 communities. And then again, the barriers
11 that they face when they are returning back
12 into the community.

13 So with that being said, I think,
14 again, we're all aware that Kentucky was the
15 first state to request a demonstration of
16 this sort around incarceration services, and
17 so we were waiting for CMS guidance, which
18 we know was issued last year. And so within
19 that time period, we were reviewing CMS's
20 guidance to states regarding this
21 opportunity, and we knew that we were going
22 to need to make some changes to our pending
23 application based on what they were going to
24 allow states to do. And they, again, were
25 really focusing on that pre-transition,

1 pre-release time period and really focusing
2 on ensuring that those needs were met for
3 that individual, that there's that seamless
4 transition back into the community, that
5 those needs are identified, that that plan
6 is in place to support that individual to be
7 successful upon release. And so that's
8 really the focus that CMS, through the
9 reentry demonstration opportunity, is
10 looking at.

11 Again, they made it very clear to
12 states, you know, the intent is not to
13 supplant any of the funding that the justice
14 or our carceral facilities were already
15 providing services for, but really again, to
16 partner with our justice facilities to
17 ensure that we come together to meet those
18 needs when -- in that warm hand off into the
19 community.

20 And so again, just through the state
21 Medicaid director's letter and the guidance
22 from CMS, again, there are goals, specific
23 goals, that this state is required to meet
24 under the demonstration. And so I just
25 wanted to point these out and ensure that

1 you all are aware of those, but really
2 again, that improving the access to those
3 services by increasing the coverage
4 pre-release, being allowed -- allowing for
5 that continuing of coverage into the
6 community whereas beforehand, again, it was
7 not until that individual actually leaves
8 that facility that they're eligible for
9 services. And so again, recognizing the
10 importance of that.

11 And again, we spoke to improving that
12 coordination, communication, our connections
13 between our Medicaid systems, our
14 correctional systems, our community
15 providers. So really ensuring that we have
16 that -- those linkages and collaboration to
17 support this. And again, looking at
18 reducing the number of avoidable emergency
19 visits, inpatient hospitalizations. Again,
20 we know that as we spoke to the justice --
21 our justice-involved individuals are at
22 high-risk of really -- of returning back
23 into the community. So really trying to
24 reduce those risks, and then again,
25 increasing the opportunity to increase

1 investments into the health care system, but
2 really again, trying to address those
3 health-related social needs, and what those
4 needs are returning back into the community.
5 So these, again, are the goals of the
6 demonstration.

7 And so along with the goals, there
8 are specific milestones that the state needs
9 to ensure that we're meeting to obtain
10 approval and continue to obtain approval.
11 So these milestones are really again, kind
12 of the roadmap in order to meet those goals,
13 so I just wanted to ensure that you all are
14 aware and familiar with those. Again, this
15 is how we would continue to track and
16 monitor, and this is really going to drive
17 our implementation plan.

18 So within the demonstration, I think
19 we spoke to many of these things before, but
20 just wanted to ensure a part of the
21 approval. Again, the states do have to meet
22 a minimal benefit package, and that does
23 include the case management services. So
24 through case management, we really need to
25 identify the physical and behavioral health

1 -- and/or behavioral health needs, as well
2 as the health-related social needs. So
3 again, the housing, employment, food,
4 transportation, those needs also need to be
5 identified through the comprehensive case
6 management service. And this is pre-release
7 to continue post-release.

8 Again, states are required to offer
9 medication assisted treatment for substance
10 use disorders. So again, this would be all
11 forms of FDA approved medications to treat
12 substance use, as well as the therapies and
13 counseling with that medication. And so
14 that is a required package -- or excuse me,
15 a benefit, and then also again, the 30-day
16 supply of all prescription drugs at the time
17 of release. Those are the minimal benefit
18 packages. Again, states can request
19 additional services, and we'll talk about
20 that in the -- you know, some of the impacts
21 and complexities of approval and
22 implementation through the more benefits,
23 you know, requested initially.

24 And so states, again, are also
25 required to develop a readiness assessment.

1 So any of our facilities -- correctional
2 facilities that would be eligible to provide
3 these services under the demonstration, they
4 have to go through a readiness assessment to
5 ensure that they're able to provide access
6 to all of these services. So again, you
7 know, if Medicaid is developing a benefit
8 package and plan, we want to ensure that the
9 individuals who are eligible for that have
10 access to it, correct? So again, we have to
11 demonstrate to CMS that in all of the
12 correctional facilities that would be
13 eligible that we can ensure that they have
14 access.

15 And then again, we are also required
16 to develop a reinvestment plan. So any of
17 the state -- the federal dollars, again,
18 that the correctional facilities may already
19 be providing services in, let's say, for
20 instance, some of our state prisons are
21 already providing access to medication
22 assisted treatment. For those existing
23 funds, we -- the state, again, would need to
24 reinvest our federal match in that. But,
25 again, if it is not available across all of

1 our state prisons or if there are not
2 specific medications that are available in
3 certain state prisons, again, that could be
4 included as an expansion or a new service,
5 and so those dollars would not require
6 reinvestment. So this is a new piece under
7 the demonstration that states, again, have
8 to meet.

9 And then, of course, the
10 implementation planning is required. So we
11 are required to submit that. It has to be
12 approved by CMS, and really again, that's
13 our roadmap to demonstrate to them how we
14 are going to meet these milestones and goals
15 and stay within the terms and conditions
16 that is issued to Kentucky.

17 And so again, we, through last fall,
18 as you're aware hopefully, reviewed the
19 guidance, had some conversations with CMS
20 about the guidance, about our pending
21 application, and then began to hold some
22 stakeholder engagement to identify, again,
23 the needs in various areas, existing
24 infrastructure, and so forth needed to,
25 again, amend our application. So we did

1 have several small group interviews and
2 focus groups, again, with our state
3 partners, with advocacy groups, with, again,
4 our TACs, and so forth, and then, again, our
5 managed care organizations as well.

6 And so we did draft our application,
7 went through the public comment period that
8 was required, and then we were able to
9 submit that to CMS in December. And so
10 again, the demonstration submission deadline
11 with the state Medicaid director's letter
12 and really the guidance with the focus on
13 improving the care transitions for our
14 justice involved individuals that are soon
15 to be former inmates of the public
16 institution, and again, otherwise eligible
17 for Medicaid.

18 We also, again, included our request
19 for the recovery housing supports. So
20 hopefully, again, you'll begin to hear about
21 RRSS, which is Recovery Resident Support
22 Services, and that again, is a service that
23 is being developed and it would be
24 implemented. So for our recovery residents
25 that meet criteria to deliver that service,

1 again, it is really addressing the support
2 services that those recovery residents are
3 providing to individuals that are residing
4 there to support their treatment and
5 recovery -- long-term recovery, and again,
6 being able to live independently back into
7 the community and in their long-term
8 recovery. And so again, this is going to be
9 limited to certain populations that we'll
10 talk to next.

11 And so really just kind of a
12 reminder, there are many factors that the
13 department and our state partners considered
14 when drafting this application. And so
15 again, we had heard from CMS in those
16 conversations, right? They were really
17 encouraging states, and take a good look at
18 that letter, stay within the guardrails, if
19 you want to request, you know, above and
20 beyond, we can. But we had heard that there
21 was, again, in terms of approval for these
22 demonstrations and the volume of
23 applications, it would really impact the
24 timeline of when states might seek approval.

25 So we did consider those things as

1 well as the stakeholder engagement
2 activities and our findings from that.
3 Again, in our conversations, CMS did make us
4 aware that our initial application did
5 include some specific slots, if you will,
6 kind of limited the number of eligible
7 members that can be served in a time period,
8 and, again, that was not something that we
9 were going to be able to do under the new
10 guidance. And so we could narrow and target
11 our population, but we would not be able to
12 limit to a specific number of individuals
13 that could be served.

14 And then again, really kind of looked
15 at our current landscape in terms of also
16 kind of a timely approval regarding our
17 benefit package that we wanted to request,
18 and so again, knowing that it would impact
19 budget, right? The more services requested
20 is going to impact budget, initially our
21 reinvestment, the facilities, so the more
22 facilities were also included. They have to
23 have access to these services, and so again,
24 it was very complex. So again, really kind
25 of choosing the minimal benefit package to

1 start with hoping that we, again, obtain
2 that more timely approval, we can get going,
3 and then build from there.

4 And so we also included, again, our
5 justification. States were informed that if
6 we are going to request more than 30 days
7 pre-release coverage, we really need to
8 provide justification. We could go up to 90
9 days, but again, would not be -- more than
10 90 would not be approved.

11 So really again, we understand that
12 engaging with that individual, building that
13 rapport, identifying the needs, the
14 communication and collaboration, again
15 really -- you know, if we're able to
16 identify someone's release prior to 30 days,
17 we need prior to 30 days to ensure that
18 that's, you know, successfully -- those
19 needs are successfully identified returning
20 to the community. So we were able to
21 submit, you know, justification for more
22 than 30 days within the application.

23 So this is just, again, a reminder,
24 hopefully, an overview in terms of what was
25 requested, our populations in the benefit

1 package to CMS. And so we did include
2 adults and juveniles, our youth. So again,
3 we will continue to suspend rather than
4 terminate eligibility at the time of
5 incarceration, or again, when a youth may be
6 detained. And so the demonstration really
7 encourages states to, at the time of
8 suspension, ensure that all individuals
9 apply for Medicaid. So again, even if they
10 are not currently a Medicaid member, but go
11 ahead again, screen for that eligibility,
12 and then can suspend therefore at the time
13 frame pre-release, it can be reinstated, and
14 again, those individuals that may not have
15 been eligible, can be eligible at that time
16 frame.

17 So benefit package, like we said,
18 state -- excuse me, case management, the
19 medication assisted treatment, a 30-day
20 supply on all medications, and that's
21 over-the-counter medications as well.
22 They'll also again, you know, receive their
23 -- ensure that they receive the medical --
24 the -- our durable medical equipment --
25 excuse me -- prescriptions for those with

1 that set up, again, at the time of release.
2 And then again, the recovered resident
3 support services that will be for our
4 adults -- our adult population.

5 And so we initially included our
6 state prisons for our adults and for our
7 youth, again, our youth development centers
8 or YDCs. And so again, the package does not
9 initially include jails as a covered
10 setting, and we can speak to, but again, we
11 have to keep all of those factors in mind
12 that we discussed. We have to be able to
13 ensure that they can suspend eligibility,
14 reinstate that within the time frame, that
15 they are able to have access to all of the
16 services under the approved package. And so
17 again, we know with the amount of jails
18 across the state, and again, they do operate
19 very differently across the state, it is
20 going to be very challenging.

21 So initially, we did move forward
22 with the state prisons and our youth
23 development centers with the plan of adding
24 jails at a later time. And again, kind of
25 still including them, thinking about them

1 through the implementation process, but
2 again, amending the application when we feel
3 we can bring them on board.

4 And so again, the services in the
5 benefit package, again, can be delivered in
6 person and/or via telehealth. And so we
7 really want to think about access to the
8 individuals for some of these 60 days prior
9 to release is to be able to see them
10 face-to-face is going to be challenging and
11 difficult. So again, the correctional
12 facilities will have flexibilities in
13 delivering both in-person and telehealth
14 services.

15 MR. SHANNON: Angela, on the benefits
16 side, just so -- I just want to make sure we
17 all understand this. These are the services
18 they can get 60-day pre-release, right? And
19 then once released, they get the full
20 Medicaid benefit plan, correct?

21 MS. SPARROW: Yeah, absolutely, yes.
22 Good point, Steve. So, yes, through
23 Medicaid they would be eligible for these
24 selected services 60 days prior to release.
25 So it is, you know, a selected benefit

1 package. Upon release into the community,
2 post-release, it's full state. They go into
3 their, you know, typical benefit eligibility
4 --

5 MR. SHANNON: So until the MCO,
6 physical health, behavioral health, dental,
7 vision, whatever?

8 MS. SPARROW: All, yes, yes. And so
9 again, it is, you know, you do have to think
10 through, right? It is very complex in terms
11 of being able to -- how are we going to, you
12 know, identify and limit eligibility 60
13 days, and then flip that switch they're
14 eligible for full state plan benefits at
15 that time that they're released.

16 In terms of delivery of services
17 under the demonstration, and so for case
18 management, again, our DOC and DJJ partners
19 and programs, again, they do a great job in
20 providing -- they are providing case
21 management and will continue to do that
22 pre-release. It is then, again, at 60
23 days -- that 60-day mark, again or, you
24 know, within that 60 days that they're
25 identified as released, then our MCOs will

1 engage with DOC and DJJ and that individual
2 to be a part of that case management plan.
3 So really again, that's where we're going to
4 be screening for those physical health,
5 behavioral health, and health-related social
6 needs, identifying what those are,
7 establishing that plan, that person centered
8 plan to ensure that they are -- that those
9 needs are met upon post-release --
10 pre-release and post-release.

11 And so again, in starting to build
12 that rapport with that individual, so they
13 again, the MCOs will also provide, which I
14 don't think is here and need to add, they
15 will also provide the case management up to
16 12 months post-release. And so that will be
17 under their state plan, you know, benefit
18 package if you will, but that is -- so it
19 doesn't necessarily fall under the reentry
20 demonstration, but that is something that
21 will be included. So they, again, if
22 eligible, if they agree and need it, they'll
23 be eligible for case management through the
24 MCOs 12 months post-release as well.

25 For the MAT services, DOC and DJJ,

1 again, they will provide those services
2 while that individual is incarcerated. They
3 do, again, will be able to contract with
4 other community providers, other providers
5 to provide that service if they choose to do
6 that, but again, DOC, DJJ they would
7 actually be the enrolled provider with
8 Medicaid for that and receiving
9 reimbursement for that service. But again,
10 they could contract if they choose to do
11 that.

12 And then the 30-day supply of
13 medications, Diamond Pharmacy is actually
14 already contracted with Medicaid -- an
15 enrolled Medicaid provider. They do provide
16 those pharmacy services for both DOC and
17 DJJ, so they'll continue to do that through
18 the demonstration as well. With the 30-day
19 supply of medications, we also do know that
20 there is some concern. So for instance,
21 individuals that would be receiving MOUD,
22 medications for opioid use disorder, they
23 may not be -- they may not be appropriate --
24 clinically appropriate for those individuals
25 to receive a 30-day supply of medication at

1 the time of release.

2 And so again, continuing to have some
3 conversation with CMS about that, but they
4 have given some states -- there is language
5 in the letter, and again, believed to be in
6 the standard terms and conditions that the
7 states are, you know, within their current
8 policies, and, you know, what they are
9 permitted to do are to meet this 30-day
10 supply. But there are -- again, there are
11 going to be instances that if an individual
12 is leaving the correctional facility, it may
13 not be appropriate for some of those
14 medications to have obviously a 30-day
15 supply, and again, they may not be able --
16 you know, there's some prescribing
17 limitations absolutely as well.

18 So I just wanted, you know, to make
19 sure that that is conversation that --

20 MR. SHANNON: But those folks will
21 still have access upon release for
22 additional subscriptions or something going
23 forward, right?

24 MS. SPARROW: Yes, yes. So for
25 instance, maybe say only a three to

1 seven-day supply --

2 MR. SHANNON: Mm-hmm.

3 MS. SPARROW: -- is appropriate.

4 They would leave that facility with -- or
5 the intent, right, is they would leave the
6 facility with, you know, three to seven days
7 of that supply with the appointment for that
8 follow-up provider in the community who's
9 going to see them, be their continued
10 prescriber, right? And so then, with that
11 being said, they would also need to ensure
12 they have the transportation to get to that
13 appointment. That's all part of that case
14 management plan.

15 So, yes, that's what we, the state,
16 would need to ensure to CMS that we have
17 that in place and part of that plan to
18 ensure that they are able to then, right --
19 then their pharmacy is already identified
20 once they, you know, go to that prescriber
21 is followed up and seen, they continue that
22 medication, and so forth.

23 So --

24 MR. INGRAM: Angela, would a 30-day
25 injectable of buprenorphine meet that

1 requirement of 30 days?

2 MS. SPARROW: Yes, if that -- yes, if
3 that is one of the medications that they are
4 on, it will be a medication that would be
5 included in the benefit package.

6 MR. INGRAM: Thank you.

7 MS. SPARROW: Uh-huh. Okay, so just
8 kind of an overview, again, of what we have
9 done. We've talked about some of those
10 things, right? We did the submission, the
11 pre-submission, the stakeholder engagement.
12 We did complete our federal public comment
13 period, so we've done the things that we
14 have needed to do after submitting.

15 And so we are really at this point in
16 the -- what we would typically call the
17 negotiation stage with CMS. And so I'll
18 talk a little bit about that when we give
19 some updates on where we are and why I say
20 typically negotiation. But again -- so they
21 did initially reach out with some questions
22 after reviewing the application. It was
23 really just more clarifying questions, and
24 so we have been hearing more honestly, and
25 even just the last couple weeks from them.

1 And so I'll talk to you about that, but
2 while we were kind of in their review phase
3 of the application and waiting to hear back
4 from them, we continued to move forward,
5 again, in terms of what is our
6 implementation planning going to look like.

7 And so, hopefully, again, you're
8 aware that we did our developing the
9 advisory workgroup and we're going to go
10 over that frame of work, but then we will
11 continue from, you know, quarter -- excuse
12 me, calendar year Q2 into Q3 we'll have some
13 additional stakeholder engagement
14 interviews. And so again, what was
15 pre-submission to CMS was really kind of
16 identifying what is our current landscape,
17 what is the infrastructure, it was very
18 high-level. But once we get the approval
19 and begin working on implementation plan, we
20 really have to get into the weeds. And so
21 that's why those -- it will be different
22 stakeholder engagement interviews, and
23 again, that will be the focus.

24 And so -- and we'll also begin
25 facilitating what our workstreams are going

1 to look like, again, and then we'll go
2 through that so that's -- we can envision
3 that is what our subgroups, if you will.
4 But that, again, will be taking place over
5 the next couple of quarters.

6 And so we did kick off the Kentucky
7 ACRES, the Advisory Community Collaboration
8 for Reentry Services workgroup that was
9 kicked off in April. Again, it was just
10 really kind of an overview of much of what's
11 being discussed today, kind of laying out
12 the framework of what the expectations are
13 for that workgroup, what we hope to achieve,
14 what is the mission and value -- excuse me,
15 values of that. And again, begin to kind of
16 lay out the roadmap over the next several
17 months actually.

18 And so we do want to ensure that we
19 have representation. It's very important in
20 order to ensure that this demonstration is
21 successful, that we really want to have --
22 we have an infrastructure, and a great
23 infrastructure already in place, and so we
24 want to be able to build upon that so we can
25 expand over time. And so again, we do

1 value, again, the partnerships among our
2 state agencies. We, again, our community
3 partners will be involved, especially in
4 individuals of lived experience. We will
5 need those viewpoints and collaboration as
6 well, and then again, this is really going
7 to be an effort across many -- across the
8 state, again.

9 And so you can see here, that there
10 are many components of the waiver that the
11 advisory workgroup is going to kind of
12 oversee in terms of implementation planning
13 and how we will deploy the waivers.

14 So the advisory workgroup, again,
15 just as we noted for state partners,
16 representation from DMS, from DBHDID, DCBS,
17 Office of Drug Control Policy, public
18 health, again, certainly DOC and DJJ are
19 going to be very important in this. We have
20 representation from AOC, our MCOs, and
21 again, as mentioned, community partners,
22 advocacy organizations, and those with lived
23 experience.

24 And so here we can see that, again,
25 ACRES -- the role of Kentucky ACRES is

1 really going to provide that high level
2 executive oversight discussion, again, in
3 terms of concerns, approvals, really
4 ensuring that we meet the broad reentry
5 goals and objectives.

6 And so from the Kentucky ACRES
7 advisory committee, we'll also, again,
8 develop the Core Project Team. So I know
9 you all have heard us speak, and hopefully,
10 within the next week you'll hear from us.
11 We, again, will also develop a Core Project
12 Team. So that will be representation from
13 our Medicaid folks, areas and divisions
14 within Medicaid that the waiver is really
15 going to impact, DOC, DJJ, our MCO partners,
16 and then again, our other state agencies
17 will be involved as a partner in the core
18 team. So they, again, will also be
19 overseeing the implementation and the
20 project needs.

21 And so what are the policy
22 development -- overseeing policy development
23 and execution of the policies? That, again,
24 they are going to provide that direct
25 oversight to our project workstreams. And

1 so again, project workstreams, we can
2 envision that as, you know, typical, like,
3 sub workgroups.

4 And again, these will be comprised of
5 subject matter experts of each of the
6 workstreams. And so the workstreams, again,
7 you can see where we will be working through
8 operations, right? And we'll get into
9 the -- we'll show you kind of what the
10 workflow is going to look like.

11 So how are we going to implement the
12 policies that need to be developed? So the
13 policies and procedures to do that, right?
14 That's going to be another workgroup.
15 Fiscal management, our IT systems, so again,
16 part of the demonstration is really
17 integrating our IT systems and able to share
18 data, our health records about these
19 individuals because, again, it is going to
20 take a collaborative effort to ensure that
21 we are working together to meet the needs of
22 these individuals returning back into the
23 community.

24 And so there, again, will be
25 extensive monitoring metrics and reporting.

1 There will need to be training and technical
2 assistance for our partners that are
3 involved in implementation. And so again,
4 workforce development, capacity building,
5 several things here that you can see. And
6 so each of these workgroups will pull in
7 from our Core Project Team. They'll
8 identify who are the subject matter experts
9 in their area to work on each of these
10 workstreams. In addition, we will pull in
11 individuals from the ACRES advisory
12 committee, and if there are any individuals,
13 again, outside of these that need to be
14 pulled into these workstreams, we'll do that
15 as well.

16 But the project team and the
17 workstreams will be kicking off hopefully
18 here at the end of May, and you all will
19 hear from us in invites about that. So our
20 advisory committee will meet every other
21 month, our Core Project Team will meet
22 monthly, and then our workstreams will be
23 meeting bimonthly -- or excuse me, every
24 other week.

25 So again, I'm not --

1 MR. SHANNON: And TAC members may
2 participate in some of those?

3 MS. SPARROW: Yes, so we can --

4 MR. SHANNON: Some of the TAC members
5 -- yeah.

6 MS. SPARROW: -- identify, Steve --
7 yeah, we can identify some of those
8 individuals that might be appropriate in the
9 different workstreams.

10 And so the workstreams, again, are
11 really going to develop the proposed reentry
12 process. And I -- again, I'm not going to
13 go step-by-step. We'll send you these
14 slides so you can look at this, but this is
15 really kind of breaking down the steps from
16 the time that the individual enters the
17 correctional or justice system until they
18 are released and post-release.

19 And so our workstreams will really --
20 and the components of the demonstration will
21 be mapping out and planning how do we
22 implement this proposed workflow in order to
23 implement, right, the demonstration? And so
24 that's really kind of to bring it all
25 together, this is the big picture: Our

1 workstreams, the core team, our advisory
2 group is really going to be our governance
3 structure to ensure that we meet the goals,
4 the milestones, and able to implement this
5 very complex and comprehensive
6 demonstration.

7 And so this, again, is for our
8 adults. Oh, go ahead, Steve.

9 MR. SHANNON: Yeah, JAI is justice
10 involved individuals, right?

11 MS. SPARROW: Yeah, justice involved
12 individuals, yes.

13 MR. SHANNON: It's a very --

14 MS. SPARROW: And then this --

15 MR. SHANNON: -- complicated flow
16 chart.

17 MS. SPARROW: Yeah. And this is just
18 the proposed --

19 MR. SHANNON: Congratulations, to
20 whoever did that, they have more talent than
21 I do.

22 MS. SPARROW: Right. And again,
23 hopefully if -- and we may have them sit on
24 some of the, you know, welcome if they want
25 to be a part of the TACs too, but again,

1 Myers and Stauffer has been assisting us
2 with project management and, you know,
3 oversight of this, and so you will hear from
4 them in terms of invitations and invites and
5 meetings. And so again, if you do -- if
6 they reach out to you, they are assisting
7 with the state in this project.

8 And so again, this is just the
9 proposed workflow and process for our youth.
10 And so again, our stakeholder -- when we do
11 say that there will be more stakeholder
12 interviews, like I said, it will be
13 different than those initial pre-submission.
14 This is where we really start -- those
15 initial stakeholder interviews helped us
16 create this map and workflow. And then the
17 stakeholder interviews that we will be
18 having over the next quarter, so -- is to
19 really get into the weeds of this and the
20 current process and policies and procedures.
21 So it will be different. It was more
22 high-level. We'll be actually really
23 getting into the step by steps in those as
24 well. And so those stakeholder interviews
25 may also be an addition to the workstream

1 subgroups as well, so.

2 All right, so where are we now?

3 Again, we have been receiving some
4 communication from CMS and discussion. In
5 April of this year, they did announce that
6 they are piloting, again, a strategy to
7 expedite application reviews for pending
8 states with reentry demonstration
9 applications. And they're going to be
10 utilizing a bundled cohort, if you will,
11 approval approach. And so it will be
12 through -- it will be like a quarterly
13 approval for the pending states, or those
14 states that come on board. So selected
15 states will be approved each quarter
16 together in kind of a cohort. And they are
17 implementing more standardized approaches to
18 the approvals in order to expedite this
19 process.

20 Again, the importance --
21 understanding the importance for the states
22 to be able to obtain approval and continue
23 through the steps to actually implement and
24 ensure access to these much-needed services,
25 and so I think there were 15 or so states

1 with pending applications, 4 have been
2 approved so far. So again, you can see
3 they've communicated to states that the
4 bundles were based on just a combination of
5 factors: Applications, you know, are they a
6 part of pending applications, demonstration
7 applications, and so forth.

8 But -- so Kentucky is included in the
9 first bundle --

10 MR. SHANNON: Good.

11 MS. SPARROW: -- which is great news

12 --

13 MR. SHANNON: Yeah.

14 MS. SPARROW: -- and it's with the
15 expected approval by July 1st. So in this
16 quarter, we're hoping, again, to obtain that
17 approval. I think there may be six other
18 states in the -- and I have them down in the
19 notes, and I can look at the end -- that are
20 included in the first bundle.

21 So with that being said, they're
22 really kind of going through the application
23 and through that more standardized process
24 to ensure that we meet the requirements for
25 this expedited path. So that's, again, why

1 it was important that we really -- again, if
2 we wanted to obtain the expedited approval
3 and be eligible for that, you know, to stay
4 really in the guardrails of that app -- of
5 the letter and guidance.

6 So states that don't meet the
7 expedited path or they can opt out, they
8 again, would go through the regular review
9 process, and that's going to be later in
10 2025. So with the amount in volume we can
11 see, again, why we really stress the
12 importance of we know there are many needs,
13 but we do want to go ahead and be able to
14 seek approval and build as we go. So once
15 we get approval, we can amend and move
16 forward, but we really -- again, this again,
17 just kind of outlines the complexity of if
18 we don't fit into the expedited approach,
19 what the time frame might be for a later
20 approval.

21 So next steps, again, we are doing
22 obviously everything that we need to do and
23 intend to do to comply with the expedited
24 approval process, and so CMS has asked us to
25 complete some documents and information.

1 Our teams are working through that, and we
2 do intend to return those as requested by
3 the end of this week. And then CMS will
4 review those, come back to the state if
5 there's any questions, and then they will
6 begin to create the standard terms and
7 conditions, so our STCs. And their plan is
8 to get those to states by the end of June --
9 early June, and allow the states to review
10 those, if there are any concerns, and then
11 get those back to CMS in order to meet the
12 end of June approval date.

13 Again, we talked about core team,
14 workstreams. These are to kick off
15 hopefully, end of May, and you'll hear from
16 us about those. And so also wanted to make
17 sure that -- some of you are aware, but we
18 also have a pending application, NASHP and
19 HARP released an opportunity, the state
20 reentry learning collaborative. When you
21 get the slides, it will -- there -- this is
22 a link, and you can -- if you want to read
23 more about it, obviously all the details --
24 you can.

25 We submitted our application in

1 April. We're hoping to hear back next week
2 if we've been selected. So five states that
3 have been either approved or have pending
4 reentry applications are eligible to
5 participate. It is an 18-month
6 collaborative, so with the collaborative we
7 have an opportunity with the other states to
8 have peer-to-peer calls, which would be very
9 beneficial, and discuss, you know, how are
10 they implementing, what are their concerns,
11 what's working for them.

12 Again, I think that that would be a
13 great opportunity, and then we can also
14 receive technical assistance through the
15 learning collaborative, but really, we feel
16 like after looking at the requirements, that
17 the learning collaborative is really going
18 to fit in what our framework already is in
19 terms of our Core Project Team, our
20 workstreams, we're already developing our
21 implementation design and plan. And so the
22 learning collaborative will just, I think
23 again, be able to supplement that in terms
24 of if we have any concerns or things, we'll
25 have technical assistance that we can, you

1 know, be able to leverage. But again,
2 really feel like the learning collaborative
3 is really what we're already -- what we've
4 discussed on these calls in terms of our
5 plan and design and implementation.

6 MR. SHANNON: And what are those two
7 groups, who are they?

8 MS. SPARROW: The National
9 Association of State Health Plans.

10 MR. SHANNON: Okay.

11 MS. SPARROW: Somebody else might
12 have to help me out. And then HARP is a --
13 it was a -- sorry.

14 MR. SHANNON: That's okay.

15 MS. SPARROW: Let me look up here,
16 Steve.

17 MR. SHANNON: That's all right, don't
18 worry about it.

19 MS. SPARROW: Yeah, we'll look it --
20 I'll look it up -- when we get to the end,
21 I'll look it up. I should have put it in
22 there. When I put the link, I meant to put
23 that in there.

24 MR. SHANNON: I thought HARP was just
25 a wannabe carp. It's a joke.

1 MS. SPARROW: (Laughter). No, it's,
2 uh, honestly, we'll have to -- it was a --

3 MR. SHANNON: It's all right.

4 MS. SPARROW: Yeah, it was a CMS I
5 think initiative. And so again, this is a
6 -- they -- this is also a CMS initiative
7 that they've asked these agencies to oversee
8 the learning collaborative.

9 Okay, so implementation roadmap, I
10 know this is a lot of information, and some
11 of you, you probably might get tired of
12 hearing it. So this is -- we're kind of --
13 and I say this, right? So typically, we are
14 in this CMS negotiation phase. Because of
15 this expedited approval process and
16 approach, again, there is I think some room
17 for negotiation, but at the same time,
18 again, it is a kind of standard approval
19 approach, right? So there is kind of less
20 negotiation, if you will, typically, and so
21 if there's really things outside of, you
22 know, the guidance that states want to
23 request, you can absolutely do that. You
24 may fit in another bucket and the
25 negotiations may take longer if that makes

1 sense. So that's why I say, again, the
2 typical CMS negotiations.

3 We, again, hoping in the next bit for
4 the waiver approval. So what happens once
5 we let's say hopefully get the waiver
6 approval before July 1st? The states will I
7 think have 180 days to submit. It's a
8 little bit longer for the reentry process
9 because there are additional components.
10 One hundred and eighty days to submit our
11 implementation plan to CMS.

12 And so all of the work that we talked
13 about through the advisory workgroup,
14 workstream, and core team, that's what we're
15 doing, right? Developing what is that
16 implementation plan, and so we'll have 180
17 days to complete that. So that would be
18 required to be submitted to CMS by the end
19 of 2024 essentially, right? So if we --
20 obviously, the goal would be to, you know,
21 not need all of that time, but that's what
22 would be permitted.

23 And then CMS would review the
24 implementation plan in that time period. I
25 think they're giving themselves 180 days

1 under the expedited approach. I'll have to
2 go back and look at the guidance to be sure,
3 but, you know, again, it's in their hands in
4 terms of approval from the implementation
5 plan. So the states could not go live and
6 implement until CMS approves the
7 implementation plan. So that's kind of the
8 next steps in terms of that.

9 In addition, the states also have to
10 submit monitoring protocols, and our
11 evaluation designs, and a reinvestment plan
12 which is outside of the implementation plan.
13 Historically I think, again, through other
14 waivers CMS has -- states have been able to
15 implement without monitoring protocols and
16 so forth being approved yet. And so that
17 hasn't always been, you know, a must have
18 before implementation. But again, you can
19 also see prior, so we get approval for the
20 implementation plan, and then we have to
21 undergo provider readiness assessments, our
22 system changes, all of that before go-live.
23 So just wanted to be transparent about, you
24 know, what's to come after that.

25 MR. SHANNON: So it could be a year

1 implementation approval process maybe we
2 could be waiting?

3 MS. SPARROW: Correct.

4 MR. SHANNON: Okay.

5 MS. SPARROW: Yeah, and so again, you
6 know, that is another factor in, right,
7 wanting to try to obtain a timely approval
8 because even once you get the timely
9 approval, the --

10 MR. SHANNON: There's still --

11 MS. SPARROW: -- other approval
12 components are still, you know, can be a
13 lengthy process. So I just want to mention
14 this because you may start to hear more
15 about this, and we'll say that there is
16 definitely more to come, but this doesn't
17 fall into the reentry plan, but if you are
18 familiar with the Consolidations
19 Appropriations Act, CAA, there are
20 requirements that state Medicaid agencies
21 must meet under the act, and there I think
22 again, there's information that's
23 forthcoming to states so we don't have a lot
24 of information, and, Steve, we might talk
25 about this in, you know, the next TAC or so.

1 What we -- although this doesn't fall
2 under the 1115, there's going to be some
3 overlapping with the 1115 and things that we
4 will have to work with CMS on to identify
5 what that means. So as a part of the
6 Consolidated Appropriations Act of 2023,
7 again, Congress included -- there's a
8 section, 5121, and it is to address Medicaid
9 and CHIP requirements for certain Medicaid
10 and CHIP beneficiaries that are
11 incarcerated. And so this is for the youth
12 -- our youth.

13 And so section 5121 is mandatory for
14 state Medicaid agencies and the provisions
15 do take effect on January 1st, 2025. So
16 some of the things that we learn about the
17 state's requirements to meet under CAA may
18 impact our timeline for reentry because
19 there's going to be some overlapping
20 components.

21 So there's some things we were
22 planning to do through reentry and for our
23 youth that we may have to have in place
24 sooner, and so again, there's lots to still
25 be determined as you can see. We -- all

1 states are asking for it, but we have been
2 told that we are tentatively supposed to
3 really be getting guidance, and they said
4 spring of 2024, so we think, again, this
5 month, sometime this month. So until we
6 really -- this is just -- this is just
7 overview of what, you know, what states know
8 to-date, and again, there's still a lot of
9 information to come, and we're going to have
10 to have some conversations with our CMS 1115
11 folks about this as well. So again, I just
12 wanted -- you'll probably start to hear
13 more, and you'll probably have many of the
14 same questions that we have.

15 So section 5121: For the purposes of
16 section 5121, an eligible juvenile means
17 that it is a Medicaid eligible individual
18 who is under 21 years of age. So that age
19 is different, if you will, than what we in
20 Medicaid typically would define a youth.
21 And again, in the reentry waiver the youth
22 who are typically placed in our juvenile --
23 in our detention centers that would be
24 eligible for services, again, usually would
25 not go up to 21. So there is, again, some

1 things that have to be worked out and
2 discussed, but that has been made clear to
3 states. It is an eligible individual who is
4 under 21 years of age, or again, for those
5 that are 18 to 26 that are from a foster
6 care that fall into that category.

7 Whoops, sorry, let me go back.

8 MR. SHANNON: We've got some folks
9 who are 19, 20, 21 who are at a correction
10 facility. So that now has to be tracked to
11 cover -- okay. Right?

12 MS. SPARROW: So their -- yes, yes.

13 MR. SHANNON: Kristin Porter
14 understands that I think.

15 MS. PORTER: I do.

16 MS. SPARROW: It is, yeah. Yeah,
17 it's -- yeah, it -- we're -- anyhow. It's
18 --

19 MS. PORTER: Yeah.

20 MS. SPARROW: That's all, right?
21 It's just --

22 MS. PORTER: Right.

23 MS. SPARROW: -- a little speechless
24 right now at the moment. I think we all are
25 until we get some guidance --

1 MS. PORTER: Yeah.

2 MS. SPARROW: So, yes, absolutely.

3 So there are going to be some gaps in, you
4 know, the CAA requirements and the reentry
5 demonstration ask. And so again, it was the
6 guidance just was not available to states at
7 the time that we submitted, but we will work
8 through it as we always do, right?

9 MR. SHANNON: Mm-hmm.

10 MS. SPARROW: So we'll get there.

11 So under section 5121, state Medicaid
12 and CHIP programs are required to have a
13 plan in place, and so that's what's really
14 to be determined is what does a plan in
15 place mean by January 1st of 2025? And so
16 that's what we are, I think, really
17 anticipating in the next few weeks to hear.

18 So 30 days prior to release -- and
19 they also say or, you know, within a week to
20 your best of knowledge, right, but at least
21 30 days prior to release -- certain
22 screenings and diagnostic services in
23 accordance to EPSDT requirements for
24 Medicaid or the approved CHIP state plan.
25 And so this will also include behavioral

1 health screenings or diagnostic services to
2 those eligible juveniles, which again, is
3 anyone under 21 years of age who is
4 post-adjudicated in public institutions, and
5 then targeted case management services for
6 Medicaid in the 30 days prior to release and
7 for 30 days following release.

8 And so what we're really, again,
9 waiting to hear in guidance through the
10 reentry demonstration, you know, we had
11 requested 60 days, and so what does that
12 mean? You know, we were hoping to be able
13 to meet CAA requirements through the
14 reentry, but we are still going to have to
15 submit some state plans according to what
16 we've heard thus far to meet those
17 requirements. And, you know, and again,
18 some of the services that we were planning
19 would be the case management through the
20 managed care organizations up to 12 months.
21 And so again, there's some things in the
22 reentry -- under the reentry waiver that we
23 asked that was more than just the minimum
24 requirements under section 5121.

25 So just to be determined. I just,

1 again, put this out here because you're
2 probably going to hear much more of this,
3 and so while it doesn't fall under the
4 reentry demonstration, it is going to have
5 some impacts on the demonstration and some
6 overlaps, so.

7 Okay, so I'll pause. Like I always
8 said, I know this is --

9 MR. SHANNON: A lot of information.

10 MS. SPARROW: -- a lot of information
11 to throw at you all, but we just want to
12 make sure that you're, again, aware of the
13 requirements and the asks. And we're very
14 thankful, I know we all are for the
15 opportunity.

16 MR. SHANNON: Yep.

17 MS. SPARROW: We, again, know that
18 this is -- there are more asks that we would
19 like to include, and again, over time, would
20 love to do that. We've talked about and we
21 will through some of the workstreams and our
22 workgroups. Hopefully there's some avenues
23 that we can still start to address some of
24 those known needs, and also be able to use
25 some braided and blended funding to do that

1 until Medicaid, again, gets the waiver off
2 the ground and again, amend and grow our
3 benefit package and our coverage settings
4 over time.

5 So any questions?

6 MS. PORTER: Hey, Angela, I can't
7 remember, do you remember -- I know
8 California, but I can't remember who the
9 other states are that have already been
10 approved. Do you remember off the top of
11 your head? I can google it and find it
12 later if not.

13 MS. SPARROW: Good question. I did,
14 but on the spot, um, is it I think Montana
15 maybe was one of --

16 MS. PORTER: I can look and find
17 out --

18 MS. SPARROW: We'll Google it. No --

19 MS. PORTER: -- I just didn't know if
20 you remember off the top of your head.

21 MS. SPARROW: -- because you're
22 correct. Is Washington -- Washington I
23 think was one of those.

24 MS. PORTER: Okay.

25 MS. SPARROW: Let me -- Washington --

1 it was one of the M states. I think
2 Montana.

3 MS. PORTER: I know, I know, it's
4 okay, it's okay, don't -- I don't want to
5 take up time from the group, so I'll --

6 MR. SHANNON: Marcie Timmerman just
7 reported Montana and Washington.

8 MS. PORTER: Montana and Washington.

9 MS. SPARROW: Montana, Washington,
10 California, and then I think maybe Mass was
11 the other one. There was one that just
12 within the last couple of weeks.

13 MS. PORTER: Okay.

14 MS. SPARROW: And so here is the -- I
15 did try to put that in the notes here. So
16 the first bundle, so the other states that
17 are included with Kentucky: Oregon, Utah,
18 Vermont, Illinois, New Hampshire, and New
19 Mexico. Those are the other states included
20 in this first approval bundle.

21 MS. PORTER: Thank you.

22 MS. SPARROW: You're welcome.

23 MR. SHANNON: Other questions? That
24 was a lot of information.

25 (No response).

1 MR. SHANNON: It's kind of exciting
2 though. I mean, we've been meeting for a
3 couple of years, and now we have something
4 tangible before us. So -- and we'll all get
5 those PowerPoints, you know, so they'll be
6 available for folks, they can look at them
7 and maybe generate more questions.

8 But, Angela, that's great work, you,
9 and your team. We appreciate that; Leslie,
10 you as well. And you spoke nonstop for an
11 hour, so take a breath.

12 So normally we're done by ten. We
13 can keep going, but if folks have things
14 they need to do, it's okay by me if we pick
15 up the MCO reports in two months. What's
16 the will of the group?

17 MR. INGRAM: I'm going to have to
18 sign off, so if there's anything we need to
19 vote on, I'll stay though for a minute or
20 two.

21 MR. SHANNON: Yeah, let's do the
22 minutes real quick. I think that's the real
23 deal, and then we'll pick up where we left
24 off in two months. So we initially had a
25 vote. Cameras need to be on for voting,

1 right?

2 MS. BICKERS: Yes, please.

3 MR. SHANNON: So let's get the
4 minutes done. Do I have a motion to
5 approve?

6 MR. INGRAM: So moved.

7 MR. SHANNON: Van Ingram. Do I have
8 a second?

9 MR. HARLEY: Second, Brandon.

10 MR. SHANNON: Brandon. All in favor,
11 signal by saying aye.

12 (Aye).

13 MR. SHANNON: Approved. And MCO
14 partners, I apologize that you are on, but
15 you got to hear good information I think, so
16 it was worthwhile. Maybe --

17 MR. OWEN: Yeah, we greatly -- I just
18 want to say -- this is Stuart Owen, we
19 greatly appreciate the presentation by
20 Angela today by the way.

21 MR. SHANNON: Yeah, it was really
22 good.

23 MR. HARLEY: Yeah, agree. Well done,
24 Angela.

25 MR. SHANNON: All right, we'll see

1 everyone July 11th.

2 MR. OWEN: Have a great rest of the
3 day.

4 MR. SHANNON: You too, take care.
5 Nice work, Angela.
