

HEPATITIS B

WHAT YOU NEED TO KNOW

Hepatitis B is a serious and deadly viral disease that infects people of all ages. It is an inflammation of the liver.

Transmitted through blood or bodily fluids or from mother to infant. Leading cause of liver cancer. Can be a silent infection.

SYMPTOMS:

- Fatigue
- Poor appetite
- Stomach pain
- Nausea
- Jaundice
- Dark urine

YOU HAVE THE POWER TO PROTECT YOURSELF AND THE ONES YOU LOVE!

The hepatitis B vaccine is the first cancer prevention vaccine. The series is recommended to be started at birth.
