

# MPOX

Mpox is a disease caused by a virus. Mpox is spread through close or intimate contact with a person with mpox, direct contact with an infected animal or close contact with contaminated objects.

## SIGNS AND SYMPTOMS

Mpox can cause a rash that may look like pimples or blisters anywhere on the body including the hands, feet, chest, face or mouth and sometimes on or near the genitals or anus.

A person can spread mpox from the time symptoms start until the rash has fully healed and a fresh layer of skin has formed.

## OTHER SYMPTOMS MAY INCLUDE:

Fever

Headache

Exhaustion

Respiratory Symptoms  
(sore throat, nasal congestion or cough)

Chills

Muscle aches  
& backache

Swollen  
lymph nodes

If you have symptoms, isolate from others and contact a healthcare provider right away.
