Collection and Packaging of Newborn Screening Specimens

The filter paper forms should be stored in a cool, dry place. Be sure to take note of the form expiration date printed on the filter paper margin below the circles. The filter paper forms are to be used on or before the expiration date. Destroy all outdated forms immediately and request a new supply from the Kentucky Public Health Laboratory. Order no more forms than can be used in 6 months.

- 1) Obtain a specimen from each infant between 24-48 hours of age, but before the infant leaves the hospital.
- 2) It is recommended that specimens be collected prior to blood transfusion. Repeat screening is required for infants who receive transfusions. Specific requirements for repeat screening are included in 902 KAR 4:030.
- 3) All infants tested before 24 hours of life MUST be retested prior to reaching 48 hours of age for all tests.
