**Delivery Modes:**

**In-person** - 100% in person for all participants, typically in a classroom like setting. Make-up sessions can be made up in person, online, or distance.

**Online** - 100% online for all participants. They log into the sessions via a computer, tablet, or smartphone. Live Lifestyle Coach interaction is required several times during the program using emails, phone calls, and text messages. Make-up sessions can be made up in person, online, or distance.

**Distance Learning** - 100% remote classroom or telehealth for all participants. The coach instructs in one location while participants call in or videoconference from another location. Make-up sessions can be made up in person, online, or distance.

**Combination** - Delivery mode can be a combination of any of the above delivery modes. Multiple delivery modes must be used. In-person and distance learning components must be led by a trained Lifestyle Coach, and online components must have live interaction (bi-directional texts/emails) with a trained Lifestyle Coach. All of your cohorts must be using the combination delivery mode. For example: Cohort 1 - in person and distance, Cohort 2 - online and distance, etc. But you cannot have Cohort 1 in combination and Cohort 2 delivering in person only.

**For more information, please contact the Kentucky Diabetes Prevention and Control, DPP Administrator at [diabetes@ky.gov](mailto:diabetes@ky.gov)**
