# 2023 ANNUAL ADMINISTRATIVE CLAIMS DATA REPORT – CARDIAC CATHETERIZATION

## INTRODUCTION

Thank you for your interest in the **2024 Annual Administrative Claims Data Report – Cardiac Catheterization**. This report covers the utilization of Cardiac Catheterization Labs by licensed Kentucky hospitals for the calendar year January 1, through December 31, 2024. The Health Facilities and Services Data, submitted by hospitals and ambulatory facilities as required by 900 KAR 7:030 – Data Reporting by Health Care Providers, was used to produce the utilization information in this report.

The Kentucky Annual Administrative Claims Data Report – Cardiac Catheterization uses administrative claims data to determine utilization. Table 1 of this report details the hospitals, including the number of cardiac catheterization labs authorized to provide catheterization services. The source of this information comes from the Certificate of Need Inventory, which may be viewed on the following website: <https://chfs.ky.gov/agencies/os/oig/dcn/Pages/inventory.aspx>.

Cardiac catheterization is a diagnostic or therapeutic procedure in which a catheter is introduced into a large vein or artery, usually of an arm or leg, and threaded through the circulatory system to the heart. A single procedure lasts from the time the catheter is inserted until the time that the catheter is completely withdrawn from the patient. Regarding cardiac catheterization services, the term “laboratory” (lab) means each dedicated room within a fixed-site facility that is individually equipped and staffed for the purposes of performing cardiac catheterizations.

To determine the number of cardiac catheterization procedures performed, inpatient hospitalization records and outpatient encounter records were identified using a cardiac catheterization service marker developed by the Kentucky Hospital Association. This service marker aligns with the Certificate of Need standards in the Kentucky State Health Plan. The most recent version of the State Health Plan is available on the Office of Inspector General’s webpage at: <https://www.chfs.ky.gov/agencies/os/oig/dcn/Pages/cn.aspx>.

The claims are counted in three ways. The number of procedures classified as “All Therapeutic” is a count of administrative claims records where the record included a therapeutic marker, and no diagnostic marker. Similarly, the number of procedures classified as “All Diagnostic” is a count of administrative claims records where the record included a diagnostic marker, but no therapeutic marker. Finally, the number of procedures classified as “Therapeutic and Diagnostic” is a count of the number of claims records where the record included a diagnostic marker AND a therapeutic marker. This count overlaps the other two counts.

**All Therapeutic:** Includes a count of the number of administrative claims records where the record included at least one Therapeutic Code regardless of the presence of any Diagnostic Code(s).

**All Diagnostic:** Includes a count of the number of administrative claims records where the record included at least one Diagnostic Code regardless of the presence of any Therapeutic Code(s)

**Therapeutic & Diagnostic:** Includes a count of the number of administrative claims records where the record included at least one Diagnostic Code AND at least one Therapeutic Code. This count includes the overlap of the previous two groups.

## Summary of 2024 Data

In 2024, cardiac catheterization procedures were performed in 47 Kentucky hospitals, located in 32 counties. There were 10 hospitals with a total of 11 labs licensed to perform diagnostic catheterizations only. There were 36 hospitals, with a total of 108 labs, licensed as comprehensive, which can perform both diagnostic and therapeutic catheterizations. There were 42,828 diagnostic catheterizations performed and 18,495 therapeutic catheterizations performed. The volume of diagnostic procedures increased by 1,731 (4.2%) and the volume of therapeutic decreased by 3,842 (17.2%) since 2023.

“Pediatric” means the patient age is 17 years or less. “Adult” means the patient age is 18 years or greater.

Questions or comments regarding the data contained in this report should be directed to Michael Lawson by e-mail: [MichaelC.Lawson@ky.gov](mailto:MichaelC.Lawson@ky.gov).

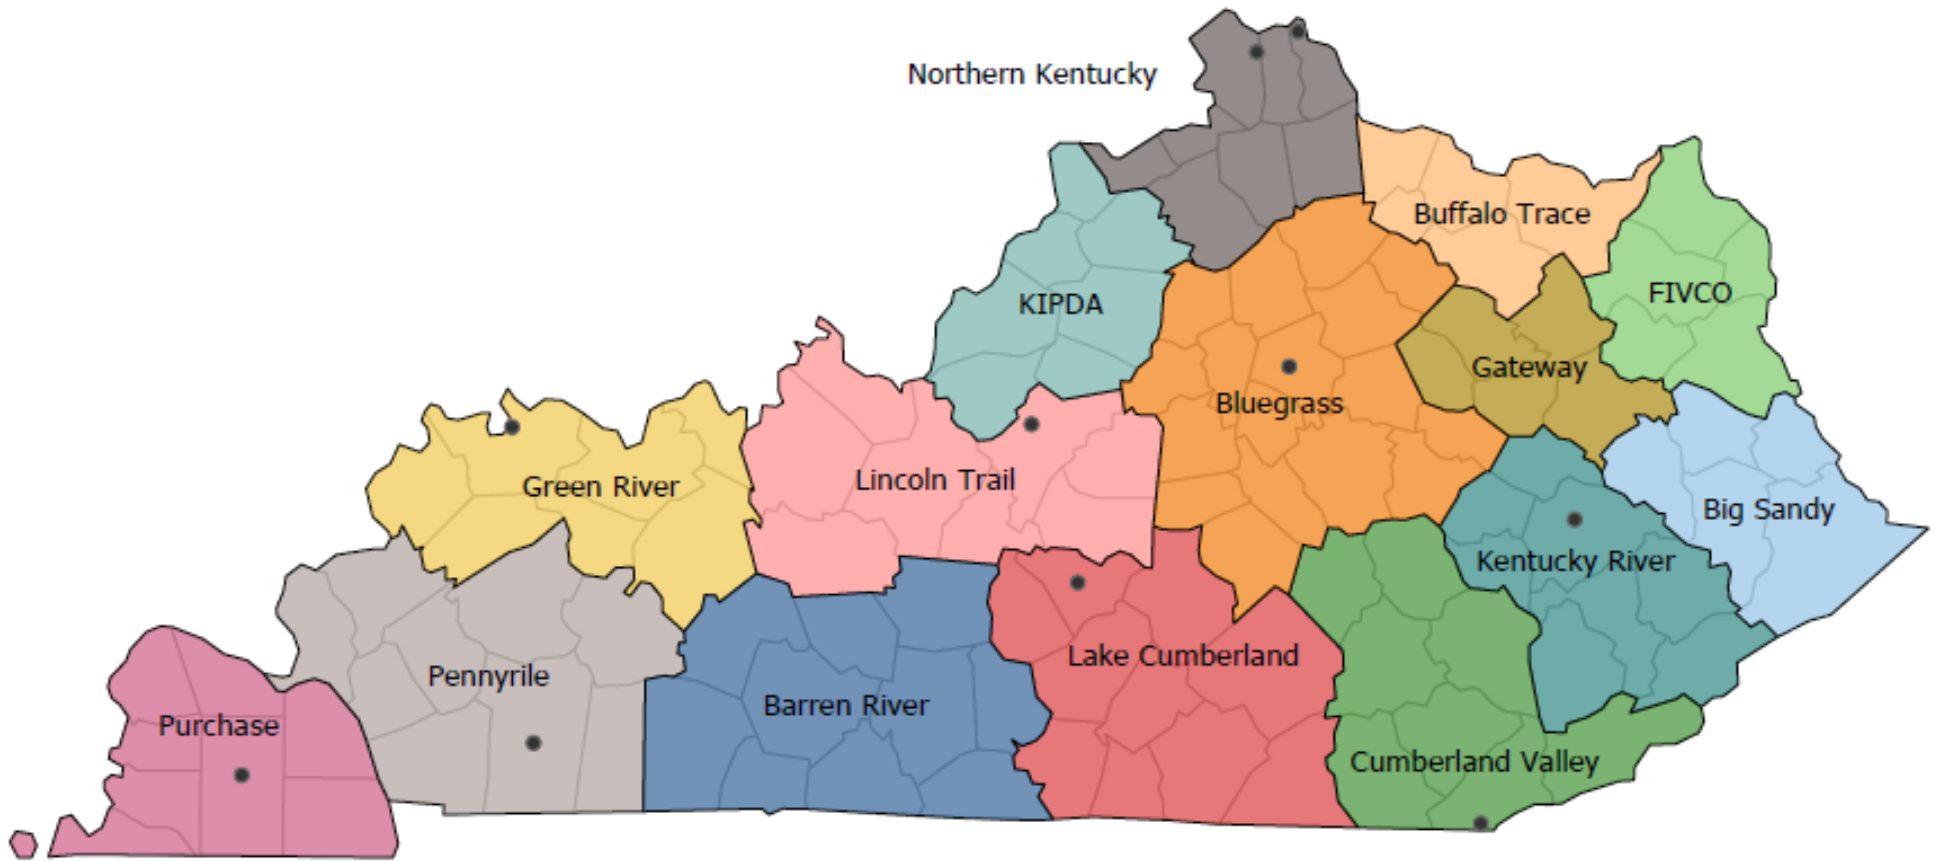

### **Note:**

**Throughout the document, cell sizes between 1 and 10 have been suppressed to protect patient privacy, in addition to totals from which the suppressed cell size could be derived. This is in accordance with KRS 216.2927 & 900 KAR 007:040.**
