

2024 Kentucky AHRQ Prevention Quality Indicators

The Prevention Quality Indicators (PQIs) identify issues of access to outpatient care, including appropriate follow-up care after hospital discharge. More specifically, the PQIs use data from hospital discharges to identify admissions that might have been avoided through access to high-quality outpatient care. The PQIs are population-based indicators that capture all cases of the potentially preventable complications that occur in a given population (in a community or region) either during a hospitalization or in a subsequent hospitalization. The PQIs are a key tool for community health needs assessments.

The 2024 Kentucky Prevention Quality Indicators are calculated using Kentucky hospitalization data for discharge dates January 1, 2024 – December 31, 2024. Patient county is used, and each county's risk adjusted rate is then compared to the most recent National Rates (2021).

The PQIs provide a good starting point for assessing quality of health services in the community. The PQIs use administrative data found in a typical hospital discharge abstract to:

- Flag potential health care quality problem areas that need further investigation;
- Provide a quick check on primary care access or outpatient services in a community;
- Help organizations identify unmet needs in their communities.

https://www.qualityindicators.ahrq.gov/Modules/pqi_resources.aspx

Prevention Quality Indicators Include:

PQI 01	Diabetes Short-Term Complications Admission Rate, per 1,000 Population
PQI 03	Diabetes Long-Term Complications Admission Rate, per 1,000 Population
PQI 05	Chronic Obstructive Pulmonary Disease (COPD) or Asthma in Older Adults Admission Rate, per 1,000 Population
PQI 07	Hypertension Admission Rate, per 1,000 Population
PQI 08	Heart Failure Admission Rate, per 1,000 Population
PQI 11	Bacterial Pneumonia Admission Rate, per 1,000 Population
PQI 12	Urinary Tract Infection Admission Rate, per 1,000 Population
PQI 14	Uncontrolled Diabetes Admission Rate, per 1,000 Population
PQI 15	Asthma in Younger Adults Admission Rate, per 1,000 Population
PQI 16	Lower-Extremity Amputation Among Patients With Diabetes Rate, per 1,000 Population
PQI 90	Prevention Quality Overall Composite, per 1,000 Population
PQI 91	Prevention Quality Acute Composite, per 1,000 Population
PQI 92	Prevention Quality Chronic Composite, per 1,000 Population
PQI 93	Prevention Quality Diabetic Composite, per 1,000 Population

2024 - AHRQ Prevention Quality Indicators

Diabetes Short-term Complications Admission Rate (PQI 01)

Counties/Numbers are significantly lower than the National Average.

Counties/Numbers are significantly higher than the National Average.

2021 National Crude Rate: 0.82

County FIPS	County Name	Cases	Population	Crude Rate (per 1,000 ppl)	Risk Adj. LCL	Risk Adjusted Rate	Risk Adj. Rate UCL
