	Southern Ky Rehab Hosp	Intensive Care	Designated Covid Recovery Unit with 15 beds. When census was low we could partition the unit for traditional rehab pts. and flex up as needed. We did prepare to transition addtl beds as necessary based on community need.
	The Medical Center At Bowling Green	Intensive Care	MCBG operated an additional 24 beds as intensive care during 2020 - in addition to the standard 18 ICU beds. Patient count, patient days, and deaths reported in the Med/Surg ICU section reflect activity from these additional 24 beds.

	University Of Louisville Hospital	Intensive Care	The reason the occupancy rate is higher than 100% for Level II is that a newborn will be put into a Level III bed and receive Level III care. Then downgraded to Level II but stays in the Level III bed, resulting in higher Level II days.
