<b>Total Cases*</b>	76,587
Confirmed	66,148
Probable	10,439
<b>Total Deaths*</b>	1,223
Confirmed	1,211
Probable	12
<b>Duplicates Removed**</b>	5

<b>Total New Cases Today</b>	*2,398
<b>Total New Deaths Today</b>	5

\*Due to an upload of a significant backlog of case data from one jurisdiction, the majority of today's cases are from weeks past. The actual number of new cases today without the backlog is **926**.

\*Total cases and deaths include both confirmed and probable.

\*\*This number reflects duplicate cases and patients that did not meet case definition for confirmed cases.

<b>Total PCR Tests</b>	<b>Total Serology Tests</b>	<b>Total Antigen Tests</b>	<b>Total Number of Tests</b>

**COVID-19 Testing Positivity Rate: 4.21%\***

\*Based on a 7-day rolling average. Timing of reporting overall lab results versus positives, repeat testing of individuals, duplicate entries and lack of reporting by some labs, make the data imprecise and more appropriate or useful for trending.

The data collected by the Kentucky Department for Public Health (KDPH) on case patients comes from a number of sources, including electronic laboratory reports, provider case disease and COVID-19 investigation reports, local health department investigation results, hospital infection prevention clinical patient data, and KDPH investigation results. Data is often found incomplete and/or incorrect and during KDPH investigation individual patient-level data is added to, corrected, and de-duplicated so that overall case counts and aggregate data values change daily.
