2,177,509	87,275	71,347	2,336,131
<b>Total <u>PCR</u> Tests</b>	<b>Total <u>Serology</u> Tests</b>	<b>Total <u>Antigen</u> Tests</b>	<b>Total Number of Tests</b>

**COVID-19 Testing Positivity Rate: 6.77%\***

\*Based on a 7-day rolling average. Timing of reporting overall lab results versus positives, repeat testing of individuals, duplicate entries and lack of reporting by some labs, make the data imprecise and more appropriate or useful for trending.

The data collected by the Kentucky Department for Public Health (KDPH) on case patients comes from a number of sources, including electronic laboratory reports, provider case disease and COVID-19 investigation reports, local health department investigation results, hospital infection prevention clinical patient data, and KDPH investigation results. Data is often found incomplete and/or incorrect and during KDPH investigation individual patient-level data is added to, corrected, and de-duplicated so that overall case counts and aggregate data values change daily.
